Preface

This volume documents the seventeenth wave of data collected in the Panel Study of Income Dynamics, interviews taken in 1984 on income for 1983. Volumes I and II of A Panel Study of Income Dynamics contain tape codes, indexes, available data, questionnaires and procedures specific to our first five years of data collection (1968-1972). These volumes also describe the early history of the study and some of the basic procedures that are common to all sixteen years of interviewing. Twelve supplemental volumes, including this one, cover procedures, codes and questionnaires for Waves VI-XVII. Ten volumes of findings entitled Five Thousand American Families--Patterns of Economic Progress are available and so is a volume called Years of Poverty, Years of Plenty by Greg J. Duncan and colleagues. The book covers ten years of PSID findings from 1969 through 1978.

All the above volumes may be ordered from ISR Publication Sales, The University of Michigan, P.O. Box 1248, Ann Arbor, MI 48106.

The User Guide

The User Guide to the Panel Study of Income Dynamics is distributed by the Inter-University Consortium for Political and Social Research, P.O. Box 1248, Ann Arbor, MI, 48106. The guide is a supplement to the PSID Procedures and Tape Codes volumes. It clarifies recurrent areas of confusion and provides other information that a researcher needs to know in order to use the panel study data effectively. The guide is in loose leaf format and purchasers will be sent updates as necessary to add to their copies.

Staff

Greg J. Duncan and James N. Morgan are the study's principal researchers. Others responsible include Ron Amos, Joan Brinser, Barbara Browne, C. Gaye Burpee, Mary Corcoran, Anita Ernst, Thomas Gonzales, Peggy Gunnesch, Priscilla Hildebrandt, Dan H. Hill, Martha S. Hill, Margaret Hoad, Tecla C. Loup, Lenore Pienta, Michael Ponza, Anne Sears, Marita Servais, and Mary Wreford.

SECTION I

PROCEDURES FOR THE 1984 INTERVIEWING YEAR

Part 1: The 1984 Questionnaire, Data Processing, Interviewing Procedures, Occupation Codes, Data Quality, Independent Part Samples, Weights

The 1984 Questionnaire

There were three new series of questions in the 1984 questionnaire. One, for Heads and Wives/"Wives" who were working, asked which, if any, of a list of fringe benefits were provided by their employer and if they were covered by a retirement plan. Many details on the retirement plan were asked. The second series asked for an estimate of the cash value of assets owned by family members such as cars, real estate other than current residence, investments, bank accounts and inheritances. Thirdly, event dating questions were asked for employment histories of Heads and Wives/"Wives" from the time of the interview back to January 1, 1983; dating of 1983 income was also recorded. The remainder of the questionnaire was much as usual.

Data Processing

We continue to use direct data entry coding and find that it is both efficient and economical. The system here is fully compatible with OSIRIS, and PSID tapes are released in OSIRIS format.

Interviewing Procedures

We did not use the Survey Research Center's Ann Arbor interviewers at all in 1984. Interviewing was done entirely by SRC interviewers in the field (mostly by telephone). They also called respondents back for missing information, recontacted respondents to whom persuasion letters had been sent, and took a few telephone interviews with respondents living in other countries. Most respondents who live abroad fill out their own questionnaires.

We took 6918 interviews out of an estimated 7153 for an overall response rate of 96.7 percent. Subtracting from the base the 55 respondents who had died since the last interview, had moved into institutions where we were not able to interview them, were too ill to talk to us, or had gone back to being the wife in a reunited couple, raises the response rate to 97.7 percent. This includes interviews with 257 new splitoffs out of a possible 278 for a 92.4 percent response. For the reinterview panel only (again with the deceased, etc., subtracted from the base) the response rate was 98.0 percent.

The average length of the 1984 interview was 34.6 minutes. This was more than 10 minutes longer than the year before, due to the new fringe benefits, work history and assets questions. We continued to pay \$10 for the interview and an extra \$5 for returning the address correction postcard.

Occupation Codes

We use the 1970 Census three-digit occupation and industry codes for the current main jobs of employed Heads and Wives/"Wives." They are also used for the most recent jobs held by Heads and Wives/"Wives" who are currently unemployed and looking for work and for any job held in 1982 by a Head or Wife/"Wife" who is now retired or no longer in the labor force. Additionally, these codes were used in

coding the work histories. We continue to use the Survey Research Center's two-digit occupation codes, which are brackets of the 1970 Census codes, for extra jobs held by a Head or Wife/"Wife" and for the kinds of jobs they were seeking if they were unemployed and looking for work. For comparability to past data, one-digit occupation codes are used to code Head's first job and Head's father's occupation, since these data items are collected only for families with new Heads.

Data Quality

Ninety-two percent of the 1984 interviews were taken by telephone (Table 2). The remaining 8 percent of respondents have no telephones, prefer personal interviews due to party lines or hearing difficulties, or live out of range of our interviewers and fill out their own questionnaires. Every year a few more wives answer the questions for their husbands (Table 3). However, there is very little year-to-year variation in the number of assignments we have to make (Table 4), so the quality of the data, according to our measure of it, continues to be good. The overall response rate remained at 97 percent (Table 1). If the cumulative response rate is based on the interviews actually obtained in 1968 and the splitoffs from those families, the cumulative response rate after the seventeenth year is 57.4 percent.

As of 1984, 10,515 members of the original 1968 panel families were still in the sample. Of these, 319 were currently in institutions (away at school or college, in the armed forces, in hospitals, nursing homes, jails, etc.). 5,312 children born to panel families since 1968 still live in these families, and two are in institutions. There are also 4,004 nonsample individuals living in panel families.

Independent Part Samples

The use of part samples is suggested for separating the selection of a preferred model from the assessment of its stability and power. Simple random subsamples are not independent of the rest of the sample because of the clustered nature of area probability samples. Therefore, four independent quarter-samples are designated in the code (V11056). How much of the sample should be reserved for statistical testing depends on how unsure one is about the best model and how important the estimation and testing of one optimal model is felt to be. For illustrations of the results of this separation of the searching from the assessing procedures, see the volumes of findings, Five Thousand American

*Table 4 is based on four variables:

Accuracy of Head's Labor Income (V10257 + V10262)

Accuracy of Wife's Labor Income (V10264)

Accuracy of Asset Income of Head and Wife (V10276)

Accuracy here is determined by the number of assignments made by the editors in order to recreate data missing from an interview. The more assignments, the less reliable the data. The accuracy code values and their meanings are:

0. Adequate response: No assignments made.
1. Minor assignment: Response was inadequate, but estimates could be made within a probable error of under \$300 or 10 percent of the assignment by using previous years' data or other data in the interview.
2. Major assignment: Response was inadequate, and estimates had a probable error of at least \$300 and at least 10 percent of the value of the assignment, using any information available in previous interviews or in the current one. Usually these values were assigned from an assignment table.

This table shows the sum of the accuracy codes for the three different income measures. The maximum value possible here would be eight for married couples, six for single heads.

Families--Patterns of Economic Progress, Volume I, pp. 6-8 and pp. 342-344; Volume II, Chapter 9; and Volume IV, Chapter 2 (Survey Research Center, Ann Arbor, Michigan). There are also several variables for use in defining paired strata for repeated replication of half-samples for computing sampling errors (V11057-11060). See Chapter 17 of Vol. IX of Five Thousand American Families, and Section I, Part 5 in this volume.

Weights

The sample was entirely reweighted in 1984 for each year of data. This is a population weight for reducing bias in estimates, not a variance weight for efficiency. See Section I, Part 5 of this volume or the PSID User Guide, Chapter E for a discussion of reweighting theory and techniques.

Part 2: 1984 Questionnaire

The 1984 questionnaire follows, with cross-year family-level variable numbers added at the appropriate questions. Certain data items have been transferred to edited worksheets, and are so indicated. See Part 3, this section for the worksheets.

Part 3: Editing Procedures and Worksheets

The editing process serves three main purposes: (1) accounting for all year-to-year changes in family membership, (2) rectifying discrepancies within the interview before coding, and (3) calculating and recording numeric data on the worksheets and interviews for coding. It is a complicated task requiring a high degree of accuracy, so each interview is checked by another editor.

Each interview is screened for discrepancies that require a return trip to the field for further information. Family composition editing and occupation coding comprise the next step. Finally, the massive edit of income and work is done, and interviews are considered "clean" for coding.

The full array of past interviews is available to editors, though only the past year's interview is usually consulted to solve problems. It is used when the current interview is vague, contradictory, or incomplete despite previous attempts to clarify the family's situation. Project staff closely oversee the editing process and make substantive decisions regarding the handling of specific problems.

Most of the techniques used to edit previous waves were again used to edit Wave XVII, although the addition of employment history questions provided a new dimension in the editing of work weeks. Specifically, the work hours and employment histories were cross-checked for inconsistencies, and interviews were returned to the field for the resolution of discrepancies. Thus, information on annual work time is probably slightly more accurate than in the past.

Additionally, questions were added to distinguish time unemployed and looking for work from time out of the labor force, so that measures of unemployment hours are cleaner. Detailed discussion of techniques for editing other variables will be found in the Waves I-V (1968-1972) documentation, Volume 1, pp. 270-339. Specific changes since that time have been documented annually in Section I, Part 3 of the succeeding documentation volumes.

Family Composition Editing

All people in a panel family at the time of the previous year's interview must be accounted for in the current year. They may either remain in the family or they may have moved out to form a new family. Sample members 18 or older who move out and form their own households are followed and interviewed as new panel families. In addition to the usual tasks for family composition editing, the type of institution was coded for those FU members in the armed forces, educational and health facilities, and other such institutions. The more detailed relationship to Head and birthdates were coded for 1984, as well as 1983.

Wave XVII Changes

In addition to retaining all of the data items restored to the 1983 questionnaire (see Wave XVI documentation, pp. 73-74), the addition of event dating added the coding of many new variables to the editing task. Month-by-month coding of whether employed and by whom, position changes, unemployment, time out of the labor force, and employment on second jobs was done from the time of the interview back through January, 1983 for both Heads and Wives/"Wives". Months in which different types of income were received were also coded. See the family-

level tape code and editing worksheets which follow, V10049-V10126, V10143-V10220, and several income variables in the sequence V10241-V10365.

SALARIED WORKERS' WAGE RATES

We are continuing to use "real work hours" to convert salaried workers' current income into hourly wage rates. This was described in the Wave XIV (1981) documentation, p. 66, and below are the current instructions given to the editors:

In order for you NOT to use one of our conventions for converting a yearly/monthly/weekly salary, the following conditions must ALL be met.¹

1. Head/Wife must not receive overtime pay.
2. Head/Wife must have had their present position for over a year.
3. Head/Wife must work significantly more than our conventional figure (i.e., at least 45 hours per week).

These rules also apply for those working significantly less than 40 hours per week (i.e., less than 35 hours per week) with one difference--it does not matter if they receive any overtime payment.

MARGINAL TAX RATE

For the past few years, our tax estimations and marginal tax rates have been generated by computer (see Wave XIII (1980) documentation volume, Section 1, Part 5 for a detailed description). Of the almost 7000 panel families, between 20 and 30 require calculation of taxes by hand. This occurs when a New Head or New Wife has moved into a panel family after December 31st of the previous year but by the time of the current year's interview, which means that a currently married couple (or family) functioned as two separate family units in the previous year. As some components of taxable income are not coded separately for Heads and Wives/"Wives," separate taxes must be calculated for each. The sum of the two separate calculations is placed in the variable for Total Taxes of Head and Wife/"Wife" (V11009). The variable for Marginal Tax Rate of Head and Wife/"Wife" (V11010) contains the higher of the two tax rates.

ASSIGNMENT TABLES

In Wave XVII, as in Waves XII-XVI, we used inflation factors for some of our assignment tables. The tables were first drawn using the unweighted data from the last year (Wave XVI); then each figure was increased by the percent of inflation for that category. The inflation factors were derived from the Implicit Price Deflators for gross national product of the Commerce Department's Survey of Current Business, January 1982, by comparing the fourth quarter of 1982 to the fourth quarter of 1983. The factors used are as follows:

House Value for Homeowners (V10018), 105.3%.

(Note that if a house value was given for this dwelling in the previous year's interview, we used that amount with an accuracy code value of 1 in preference to the table amount, which always carries an accuracy code value of 2.)

Annual Rent for Renters (V10026), 104.8%

Imputed Annual Rent for Nonowners/Nonrenters (V10028), 104.8%

Annual Food Cost Except Food Stamps (V10235), 102.4%

Annual Cost of Eating Out (V10237), 102.4%

¹The conventions are as follows: yearly=2000 hours; monthly=167 hours; and weekly=40 hours.

Part 4: Coding Procedures

Production coding the questionnaire is the final step in putting the data onto computer tape. This occurs after the questionnaire has been edited as described in Part 3 above. The coding process converts non-numerical answers into numerical values.

The coders entered the edited variables and coded the questionnaire using the system designed by the Computer Support Group at ISR's Survey Research Center for direct data entry. The system, Interactive System for Input of Survey Data (ISISD), is compatible with ISR's OSIRIS analysis package and has been used by the PSID for five years. It incorporates wild code checking and data consistency checking during the actual coding process. These checks insure that coders cannot enter invalid code values, and thus the necessity of later data cleaning by the Panel Study staff is greatly reduced.

This section deals only with the question of reliability, or intercoder variance. Reliability is the measure of ambiguity of codes as well as accuracy of the coders. Slightly more than 10 percent of the interviews (727) were coded twice, once by the coder and a second time by a Panel Study staff member or a check coder. Check coding consists of an item-by-item check of all data values for a case which have been independently coded by a second person, thus enabling the study staff to determine early in the processing whether any individual coder is having difficulty and whether any codes are causing problems.

Coders are trained by a member of the study staff before they are allowed to production-code interviews. Training begins with a short introduction on the history and purpose of the study and a question-and-answer session. The coders code two practice interviews which have been coded previously by the study staff member. The coders and the study staff member review the practice interviews in detail, discussing any coding differences with particular emphasis on problems that could arise during production coding and responses that may present coding difficulty.

A difference is a disagreement between the coder and the check coder. Differences become errors when so judged by the check coder; for example, a coder may use an erroneous code value, enter a wrong digit on the terminal keyboard, or miss a specific direction in the code book. Those disagreements which are not errors involve coding of open-ended questions; decisions on the final codes chosen rest with the study staff member.

Coding Differences for Wave XVII

Most of the differences of 2.5 percent or over occurred on open-ended questions. Such questions vary in the degree of coding difficulty, depending on question content. Questions ascertaining reasons for various behaviors, that is to say, "Why?" questions, are the most difficult for both code building and actual coding.

The first question, A8 (V10431) "During the last year, about how many miles did you (and your family) drive in your [car(s)/(and) truck(s)]?", showed a surprising number of differences. These were largely between the zero or inap. code and the "not ascertained" category, or due to conceptual differences between miles driven during 1983 versus miles driven in the past twelve months.

Question B3 (V10435) "How is your (home/apartment) heated--with gas, electricity, oil, or what?" (second mention) showed differences through use of the "other" category when it was possible to recode this "other" into one of the remaining codes. This error was due to the printing of a code value next to the "other" category. It has been corrected for further waves.

Questions B29 (V10449) "Why did you (HEAD) move?" and B32 (V10452) "Why (will/might) you move?" have a history of reliability problems since the study began. Replies involving consumptive reasons are most usually so specific to each respondent's situation that new coders' ability to conceptualize these replies in terms of the given code categories may be very difficult. At this point in the study, however, changing the codes for these questions would also be more difficult, due to comparability problems.

Table 5
RELIABILITY SCORES

Differences 2.5 Percent or Over		
Question Number	Variable Number	Percent Error
A8	V10431	3.2
B3 (second mention)	V10435	2.6
B29	V10449	5.9
B32	V10452	8.7

Overall coding rates of difference for 1984 were 2.56.

Check Coding of Occupation and Industry Codes

During the coding process, a separate checking procedure was continued as in previous years to obtain information on reliability rates for the three-digit 1970 Census occupation and industry codes. A total of 509 interviews were selected for this process. Since each Head must answer either Section C or D or E, the check coder used the occupation and industry information from the appropriate section for overall totals. A similar procedure was followed for Wives/"Wives," using Sections F, G and H. Of the 509 interviews selected, 390 contained information for Heads and 183 for Wives/"Wives." The remainder represent families with non-working Heads or Wives/"Wives" or with no Wife/"Wife" in 1984.

Overall reliabilities (including the inapplicable cases) were:

Head's Occupation:	92.3%
Head's Industry:	95.3%
Wife's/"Wife's" Occupation:	96.7%
Wife's/"Wife's" Industry:	98.0%

When adjusted for removal of inapplicable cases, these figures became:

Head's Occupation:	90.0%
Head's Industry:	93.8%
Wife's/"Wife's" Occupation:	90.7%
Wife's/"Wife's" Industry:	94.5%

Matched differences, that is, cases in which the coder and check coder differed in the same way more than once, did not occur on any of the cases checked.

Occupation and industry codes yielding the highest numbers of differences were:

<u>Head</u>	<u>Occupation</u>	<u>Number of Differences</u>
	Managers and Administrators, n.e.c. (245)	4
	Checkers, Examiners, and Inspectors: Manufacturing (610)	2

Looking at all differences for Heads and Wives/"Wives", 52.2% of the differences on both occupation and industry occurred within the same Census major heading groups.

Heads' occupation differences were predominantly within the Professional, Technical and Kindred Workers group and the Operatives except Transport group. Occupation problems for Wives/"Wives" were scattered in several groups.

Industry code differences for Heads were most frequent in the Manufacturing group and the Construction group. Differences in industry codes for Wives/"Wives" were almost all within the Manufacturing group.

Appendix 2 of the Wave XIV (1980) documentation volume lists the three-digit occupation and industry classifications used. These are taken from U.S. Bureau of the Census, 1970 Census of Population Alphabetical Index of Industries and Occupations, U.S. Government Printing Office, Washington, DC, 1971, pp. vii-xiv.

Prior to 1981, an attempt was made to reconcile inconsistencies in the coding of the same occupation between years. Cases with the same Head for each pair of years and in which this Head had reported no change in job were inspected for

clues as to which occupation code was correct. This task proved to be both monumental and relatively fruitless, and was discontinued.

Part 5: Generated Variables and Additional Data

Various indexes, bracket variables, and complex measures of economic status have been constructed each year using variables derived directly from coded interview data. Inter-year changes in the interview schedule have made additions and deletions of indexes necessary. In general, if an index could not be built to be exactly comparable to a previous index, no index was constructed.

Income

Several measures of economic status have been generated for all seventeen years, including money income variables and measures of income adequacy. Family Money Income, one of the simplest indexes, is the total of all members' earnings, transfers, and asset income (1984: V11022).

Bracket Variables

Until Wave X (1977), several numerical variables, such as family money income, had been given also as bracket (interval) codes. Such interval codes had been constructed for most of the measures where a distribution was useful and appropriate. This includes practically all of the income variables and their components. For Waves X-XVII we have provided two pieces of information in the family-level tape code which allow users to bracket as their own uses dictate: (1) weighted percent of nonzero cases, and (2) weighted mean value of those cases. This information is provided for any variable which was bracketed in 1976.

Race

Because the interview schedules are now designed for telephone use, race of respondent, which comes from interviewer observation, has not been obtained since the 1972 interviewing year. Families were therefore assigned race codes from the 1972 data. For splitoffs, race was assigned from the 1972 values for their main families (V11055).

Regional Data Measures

In addition to personality and behavior, locational and environmental factors are potentially important determinants of an individual's economic status. Consequently, the interview data have been supplemented with information on some employment and income characteristics of the county in which the panel family resides (V11061-V11063). Questionnaires are sent each year to state employment offices asking about current labor market conditions in these counties.

Sampling Error Computation Unit (SECU) Variables

The 1984 data tape includes two variables that may be used for computation of variances (V11059-V11060), as well as two variables for balanced half-sample replication (V11057-V11058). Please see the 1983 Documentation Volume, pp. 89-90, for details.

New Heads and New Wives/"Wives"

Two variables were generated for 1983 and 1984 that indicate the year in which the current Head most recently became Head (V11068) and the year in which the current Wife/"Wife" most recently became Wife/"Wife" (V11069). (It is

possible that an individual becomes Head or Wife/"Wife" more than once in the course of the panel due to marital breakups, remarriages and reconciliations.) These variables contain as code values the last two digits of the year in which the background data for Heads (V10967-V11005) or Wives/"Wives" (V10955-V10965) was asked. Updating some of the background items, such as work history of the Head (V10992-V10995) or Wife/"Wife" (V10962-V10965), or ages and number of Head's children (V10974-V10978) is thus facilitated, since only data from years subsequent to the asking of these items need to be searched for more recent information. For example, number of years Head worked since age 18 (V10992) can be updated by looking at annual work hours for the Head in each year following. If work hours are greater than zero in a given year, the number of years worked may be incremented by one.

Family Composition and Sample Member Data

The variable Couple Status in the FU (V11067) allows users to easily identify cases with female Heads and husbands at the family level. Additionally, through the coding of relationship to Head in more detail (Individual-level: V30455), cohabitators are distinguishable from legally married couples at the family level. The variable, Whether Head and Spouse Are Sample Members (V11070) allows the user to know how the family-level weight (V11079) has been calculated for each case. The family-level weight is defined as the average of the Head's and the Wife's/"Wife's" individual weights; nonsample individuals have weights of zero. See the section below for more detail on calculation of weights.

Revised Weights for 1968-1984

In 1968, the original set of family weights was created to reflect differential sampling fractions, overlap of the Census and ISR samples, and initial response rates by area. Since, at the beginning of the study, each individual's chance of being in the sample was the same as that of his or her family's, individual and family weights were identical in 1968.² Since that time, individual-level weights were periodically adjusted for subsequent nonresponse in 1972 and 1978, and, at the family level, the weights were additionally adjusted each year for marriages to and divorces from nonsample spouses. Thus, individual-level weights were carried forward intact in years when no new nonresponse adjustments were made, although, as stated above, the family-

²In later years, individual-level and family-level weights diverged as families regrouped through marriages of sample and nonsample individuals to each other. The family-level weights are generated from the individual-level weights; the family weight equals the mean of the head's and spouse/cohabitor's individual weights. Thus, in a family with a single head (no spouse/cohabitor present), the family weight is identical with that head's individual weight. For couples, there are a few possible situations:

- a) Head and spouse/cohabitor are both sample members, their individual weights are identical, and therefore the family weight is also identical.
- b) Head and spouse/cohabitor are both sample members, but their weights are not identical; the family weight is the average of the two individual weights.
- c) Head and spouse/cohabitor are not both sample; one of the two has moved into a sample household. The family weight, therefore, is equal to half that of the sample individual.

In this imperfect world, we have mistakenly, on rare occasions, interviewed families where neither head nor spouse/cohabitor is sample. In such cases, the remainder of the family listing is scanned for sample members, and the family weight becomes the average of all such persons' weights. If no sample members are in the family, then the family weight equals zero.

level weights were modified when necessary. No adjustment was made for mortality, however, and as a result our weights, particularly for older people, were becoming increasingly too large. This year, using the complete file of all individuals ever connected with the Panel Study of Income Dynamics, we have produced mortality-corrected individual-level and family-level weights for each year of data (1968-1984).³ Later, for 1985, we plan to add special individual and family weights for the SRC sample only.⁴

The revisions performed this year involved adjusting the family-level and individual-level weights for 1969, 1974, 1979, and 1984 to take account of mortality. The adjustments used individual-level weights and were based on expected mortality,⁵ as actual mortality is not currently known with certainty. Since annual mortality for most segments of the population has been quite modest, five-year adjustments were deemed sufficient. The five-year periodicity for updating the weight generally seemed adequate for nonresponse adjustments as well. Annual response rates were quite high (96 or 97 percent) in all years except 1968 and 1969. The lower response rates in 1969 prompted us to estimate a separate weight adjustment for 1969, and the high response rates of subsequent years allowed us to follow a pattern of five-year readjustments for the years following 1969.

The process for derivation of the weights was a sequential one, building from the original 1968 weight. One-year adjustments (1968-1969), down for mortality and up for nonresponse, were first made to the 1968 weight in order to produce the 1969 weight. The 1969 weight then became the basis for producing the 1974 weight, with five-year (1969-1974) mortality and nonresponse probabilities used to make the conversion. The 1974 weight was, in turn, adjusted by subsequent five-year (1975-1979) mortality and nonresponse to produce the 1979 weight, and, likewise, the 1979 weight, when adjusted by 1980-1984 mortality and nonresponse, became the 1984 weight. Weights for intermediate years were those of the most recently revised weights, adjusted at the family level for marital changes.

Our old weights reflected the (inverse of the) probability of a respondent in an initial year both surviving to the next period and responding in that next period. This involves the intersection of two events-- R_{t+1} , which represents the act of responding at time $t+1$, and S_{t+1} , which represents the act of surviving from time t to time $t+1$. For short periods of time this intersection would, for most segments of the sample, reflect only the influence of the response event, and thus knowledge about response would be all that would be needed to make proper adjustments to the weights. However, with the study now in its seventeenth year,

³The 1969 family-level weight has heretofore been nonexistent. A variable was added for this (V1014), as there were a few unused tape locations between the 1969 and 1970 family-level data. The tape locations for this new variable are 1037-1038.

⁴At present there is no straightforward procedure for an analyst using only the SRC subsample to correct for differential nonresponse and, more importantly, the marriages and divorces of SRC sample persons from non-sample persons when describing the population. A special weight to be added next year will allow such adjustments.

⁵Expected mortality rates were derived from the Life Tables published in Vital Statistics of the United States (USGPO: 1969, 1974, 1979 and 1984; Table 5-1).

the S event may now be quite influential. The object of our re-estimation of weights was to make adjustments that took account of the influence of S.

To understand our adjustments, it is useful to note that the probability of the intersection of R and S can be decomposed into a product of two other probabilities as follows:

$$[1] \Pr(R_{t+1} \cap S_{t+1}) = \Pr(S_{t+1}) \Pr(R_{t+1} | S_{t+1}).$$

When the purpose of the weight is to accurately represent the t+1 population, the conditional probability, $\Pr(R_{t+1} | S_{t+1})$, should be the basis of the t+1 weight, not $\Pr(R_{t+1} \cap S_{t+1})$. Only those surviving to t+1 are still in the population at that time, and we want to know just how many people each surviving person who responds represents in the population at time t+1. $\Pr(R_{t+1} | S_{t+1})$ tells us what the probability of an individual responding in t+1 was, given that that person was indeed among those who survived until t+1. Thus, it is this probability that we wanted to incorporate into our weight adjustments.

To derive the conditional probability component, divide both sides of equation [1] by $\Pr(S_{t+1})$. This yields:

$$[2] \Pr(R_{t+1} \cap S_{t+1}) \div \Pr(S_{t+1}) = \Pr(R_{t+1} | S_{t+1}).$$

The inverse of which

$$[3] [1/\Pr(R_{t+1} \cap S_{t+1})][\Pr(S_{t+1})] = 1/\Pr(R_{t+1} | S_{t+1})$$

is the factor used to adjust the weight for differential nonresponse and mortality.

Since $\Pr(R_{t+1} \cap S_{t+1})$ can be estimated from the PSID data, we can derive the needed $\Pr(R_{t+1} | S_{t+1})$ via this equality if we know $\Pr(S_{t+1})$. Not knowing what mortality rates actually were in our sample, we relied on national estimates of mortality rates given in Vital Statistics, U.S. Census Bureau, disaggregated by age, gender, and race. (See Tables 1 and 2.) These rates were used to construct age-gender-race-specific probabilities of survival, which served as estimates of $\Pr(S_{t+1})$.

The joint probabilities of survival and response, $\Pr(R_{t+1} \cap S_{t+1})$, were estimated from the PSID data for the 1968-1969, 1969-1974, 1974-1979 and 1979-1984 periods using a SEARCH model estimated using the PSID sample responding at the start of the specified period. SEARCH is an OSIRIS software program that sequentially divides the sample into groups, or "response strata", so as to maximize the explained variance in the dependent variable, that, in this case, was a dichotomous response-nonresponse indicator. SEARCH is a very flexible model, with requirements of neither additivity nor linearity. The results of these search analyses are presented in Figures 1-4. The values at the bottom of these "tree boxes" indicate the response rates for different response-typing subgroups (e.g., the 1968 to 1969 response rate for children and grandchildren under age 16, as well as heads, wives or siblings of the head that are themselves under age 16, is 89.3%).⁴

After mortality and nonresponse adjustments, the next step in the weight revision process involved constraining the weights to a two-digit range. Beginning in 1969, the weights were halved. In addition, those less than one (but not zero) were rounded up to one, while a few greater than 99 were truncated to 99. These procedures produced adjustments for individual weights at the four different time points. Then, these individual weight adjustments were carried forward until the next five-year re-estimation by using the adjusted 1969 weight as the initial individual weight for 1970-1973, the adjusted 1974 weight as the

⁴Finally, our reported response rates look substantially higher than those reported in the past because (a) response rates are higher for individuals than for families, since large families have lower dropout rates, and (b) we had not been adjusting our reported response rates for known deaths, much less for presumed ones. The 1968 to 1969 individual response rate conditional on presumed survival is 88.1%. The cumulative five-year conditional individual response rate from 1969 to 1974 is 87.5%. From 1974 to 1979 it is 89.2%, and for 1979 to 1984 it is 88.2%.

initial weight for 1975-1978, and the adjusted 1979 weight as the initial weight for 1980-1983. The adjusted 1984 weight will be carried forward in the future for the years 1985-1988. Our original weights were 1/565 of population estimating weights, but after dividing by two to avoid some becoming more than two digits, each unit of the weight represents 688 persons in the population.

The 1984 weight for an individual who was present in the study in 1968 is thus the 1968 weight, based on the inverse of original sampling and response probabilities, times the product of:

- 1) (a) the 1968-1969 survival probability for the individual's 1968 age-race-gender group times (b) the inverse of the 1968-1969 response rate of the 1968 response-type subgroup into which the individual fell. (This produces the 1969 revised individual weight.)
- 2) (a) the 1969-1974 survival probability for the individual's 1969 age-race-gender group times (b) the inverse of the 1969-1974 response rate of the 1969 response-type subgroup into which the individual fell (giving the 1974 revised individual weight).
- 3) (a) the 1974-1979 survival probability for the individual's 1974 age-race-gender group times (b) the inverse of the 1974-1979 response rate of the 1974 response-type subgroup into which the individual fell (giving a revised 1979 individual weight).
- 4) (a) the 1979-1984 survival probability for the individual's 1979 age-race-gender group times (b) the inverse of the 1979-1984 response rate of the 1979 response-type subgroup into which the individual fell (giving the revised 1984 individual weight).

In mathematical notation the 1984 weight for such an individual 'i' is thus:

$$W_i^{84} = W_i^{68} \prod_{j=69,74,79}^{j=84} \Pr(S_i^j) (1/\Pr(R_i^j | \Omega S_i^j | R_i^{j-1}))$$

where W_i^{68} is the 1968 weight based on the inverse of original sampling and response probabilities, $\Pr(S_i^j)$ is the presumed survival rate for persons of the same race, age and gender as the i^{th} respondent, R_i^j is a response indicator for the i^{th} individual in the j^{th} year, and the occurrence of S_i^j indicates that individual i survived from the year $j-1$ to the j^{th} year.

Note that the individual is classified into some subgroup on eight different occasions to estimate eight different corrections to his/her initial weight (four for mortality and four for nonresponse). Alternatively, one grand adjustment based on the individual's 1968 characteristics for mortality and one for non-response could have been made. However, mortality rates have been changing, particularly at the older ages, during this time period. Additionally, the existence of the response-nonresponse file argued for adjustments to weights in the intervening years.

Our procedure automatically takes care of some tricky problems. For instance, we do not need to adjust for children born to people after they leave the panel. The weights of the children born to people in the panel have been adjusted up for losses in their age groups, and thus the probability that similar

children have been lost to the sample. Similarly, with the family-level weights, marriages of people after they leave the panel are reflected in weight adjustments of those remaining in the panel.

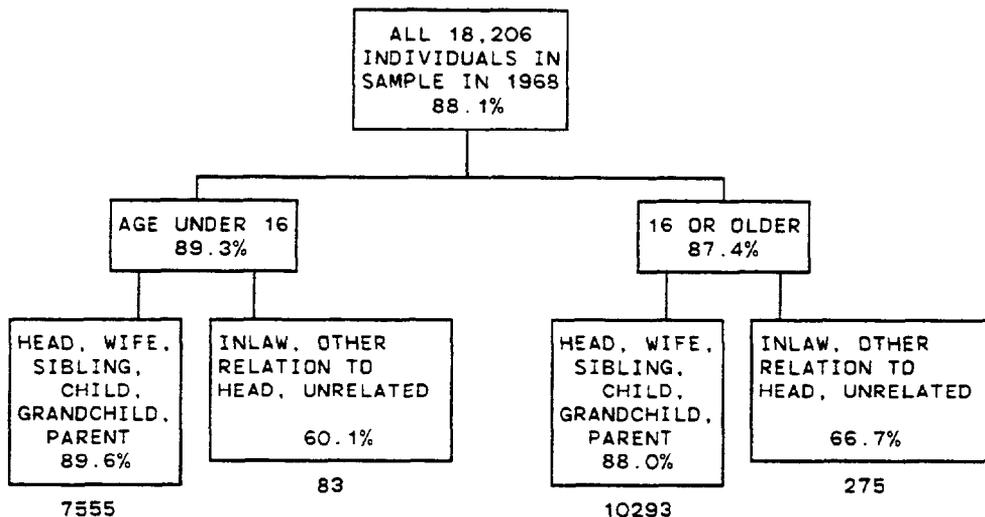

These procedures create individual weights for individuals in the sample at the start of the given period (1968, 1969, 1974, or 1979), but new individuals may enter the sample (i.e., be born to sample members), and weights are needed at the family level as well as the individual level. For these reasons, we also undertook the following additional steps. For each year:

- 1) We assigned weights to those born into the sample in any year using the average weight of head and spouse/cohabitor or the single head's individual weight. These weights were subsequently carried forward to the next adjustment period, with these born-ins treated in subsequent years as regular sample individuals; and
- 2) We assigned family weights using the average individual weight of, again, head and spouse/cohabitor or the single head's individual weight. This automatically takes care of families where someone "married in". For those heads who stop cohabiting with a non-sample spouse/cohabitor, the process automatically doubles the family weight from the prior year since there is no longer a zero weight (for the non-sample spouse) averaged in.⁷

⁷At this stage the weights are cleaned, with assignment of individual weights with values of zero to non-sample individuals, and checks to see that each sample individual receives a weight greater than zero for the years that he or she is connected with a panel family.

(USED IN WEIGHT REVISIONS)

*See Table 2 for mortality assumptions. The SEARCH run used the age, gender, and race classes from this table. Independent variables used for this SEARCH run were, from individual-level 1979 data, relationship to Head (V30299), gender (V30301), and age (V30300); from family-level data, race (V181), number of children in the family (V6465), education level of Head (V6787), Census region (recoded from state of residence (V6303)), total family income (V6766), whether from the Census or the cross-section sample (V3), whether might move (V6487), whether young, unemployed and with no children (recoded from age of individual (V30300), number of children in family (V6465), and unemployment hours (V6344)), whether in a rural area (V6306), and whether Head's occupation was professional and managerial or not (recoded V6497) were used.

Linking Data: Splitoffs

For the 1981 through 1984 waves, data have been provided to assist the user in linking splitoff information with that of their main families. The family-level data for each main family in 1984 (where V10007=0) contains values for V11071 representing the actual number of 1984 splitoff families from each main family that were successfully interviewed. Thus, splitoff nonresponse cases are

not included. On each splitoff data record (V10007=1), the family portion of the record contains the current year's interview number (V10002) of the associated main family at V11072; each individual-level record of splitoff persons also contains this interview number (V30484), as well as month and year the splitoff family was formed (V30482 and V30483).

Month and year that the splitoff family was formed are derived from actual move-out dates of splitoff individuals as reported on the main family coversheets. Thus, in the relatively rare event that two or more individuals move at different times from the main family to form one splitoff family, each individual receives his or her actual date of move as code values for V30482 and V30483. Any other splitoff individuals who did not move out of a main family to the splitoff family, such as nonsample spouses, friends, miscellaneous relatives and newborn children, receive the move-out date given for the splitoff mover-out. When, rarely, more than one splitoff mover-out date exists, these new persons receive the earlier one.

For those individuals who move from institutions to form their own splitoff families, code values of 98 are inserted into the tape locations for both month and year, and the miscellaneous other splitoff family members appearing for the first time in the study receive missing data code values of 99 for these month and year variables.

Linking Data: Families Sharing Households

It is not uncommon for two or more family units to share living quarters. Panel families involved in such a situation may live with persons or families who are not sample members and who are not included by the study as family members because the arrangement is supposedly temporary and the situation resembles that of roommates, where expenses are split between the individuals involved. However, the members of one panel family may also move in with the members of another panel family. Financial disasters such as divorce and unemployment contribute heavily to such patterns of behavior. Most frequently, a former splitoff child already being interviewed separately returns home to live with panel parents for a period of time until resuming life on his or her own. Occasionally, siblings who are each being interviewed move in together to share an apartment, or aging panel parents go to live with their panel children.

To allow users the opportunity of utilizing the data set for such situations, several link variables were created for 1982 through 1984. The first step involved expanding the code for V10015, Current Family Composition, to flag cases where this sharing occurred. The code differentiates between both panel and nonpanel primary and secondary families living in the same households. Codes 4, 6, and 8 indicate that such an arrangement exists between panel families. In a few cases, as many as four panel families lived under the same roof at the time of the 1983 interview, and thus there are three sets of linking variables so that all panel families living together are linked in every possible direction. V11073, V11075, and V11077 contain the 1984 interview number or ID number (V10002) of each of these other families. In addition, variables describing kinship ties between these families (V11074, V11076, and V11078) were created.

Taxes

Each family's federal income taxes were estimated again this year by computer. A new variable (V10876) asked whether the Head itemized tax deductions or not. The response to this question determined whether the total taxes of Head and Wife/"Wife" were calculated using the table included in this section or whether the standard deduction was used. If there were missing data on V10876, then the variable for amount of remaining mortgage principal (V10020) was used to help determine whether or not a family itemized deductions (for details, see the Wave XIII (1980) documentation volume, pp. 85-86).

The deduction for married couples when both work has been incorporated into the tax generation program again for 1984. The deduction allows a subtraction from gross income of 10%, up to a maximum of \$3000, of earned income of the spouse who earns less money regardless of whether the couple itemize or not.

This table for average fraction of income deducted by itemizers in various income classes has been used for both 1983 and 1984 processing. It is truncated at .45 for all incomes under \$15,000. The fractions are the ratios of aggregates and were calculated using Table 2.1 (p. 60) and Table c (p. 4) from 1982 Statistics of Income--Individual Tax Returns, Internal Revenue Service, U.S. Treasury Publication 79 (10-84) USGPO, Washington, DC, October 1984. As before, these itemized deductions are used only when they exceed the standard deduction or "zero bracket amount" (\$2300 for single and head-of-household returns, \$3400 for married returns in 1984--unchanged from 1983).

Taxable Income	1984 Taxes
Less than \$15,000	.45

Age from Birth Date

Since birth month and year were asked and coded for each individual in the family, age of the individual as calculated from date of birth (V30485) was again generated for the individual-level data for 1984. Only if it was clear that a coding error had occurred were corrections allowed on either birth month and year (V30457 and V30458) or reported age (V30456). The calculated age variable (V30485) is generated from the reported month and year of birth (V30457-V30458) and the date of interview (V10416) using the following assumptions: if the month of birth is not ascertained (V30457=99), July is assumed for birthdate; if the date of interview is not ascertained (V10416=9999), July is assumed for interview date; if the date of the interview is less than the fifteenth day of the month, assume that birthdays in the same month did not yet take place.

Part 6: Data Available

For each year of this study, both an individual-level and a family-level tape have been created. In addition, the family-level tape has been merged with the previous years' family tapes so that there are two through seventeen-year merged

family-level tapes. The individual-level tapes were merged on five through seventeen-year bases only. These tapes contain all individuals with data in the current year. Additionally, for 1984 we have created a much expanded version of the data that includes all individuals ever in the study; that is to say, data for all nonresponse individuals are available as a separate file that can be merged with the usual data. See the introduction to the individual-level tape code in Section II, Part 2 of this volume. For a more detailed description of all of the tapes, see the User Guide to the PSID. Two tapes were also created using the 1967 S.E.D. data for the part of the sample that was originally interviewed by the Census.

The new employment histories with event dating include a fairly large amount of data for some Heads and Wives/"Wives" who experienced several job changes. Thus, some cases do not include complete histories, from January 1983 until the time of the 1984 interview, on the merged tape. A separate tape has been created for all Heads and Wives/"Wives" in 1984. This tape contains the additional employment history data, if any, as well as the complete family-level record. There is a complete record for each Head and for each Wife/"Wife", so for married couples, the family-level data are duplicated for the two persons.

All inquiries for information about this study should be made in writing to: Member Services, Inter-University Consortium for Political and Social Research, Institute for Social Research, University of Michigan, P.O. Box 1248, Ann Arbor, Michigan 48106. Refer to ICPSR study number 7439, and please specify to which datasets you are referring.

Part 7: Creating Family-Level Data from the Cross-Year Family-Individual Tape

Since the seventeen-year individual-level data tape is very unwieldy with 20,393 cases for current response and 14,259 current nonresponse, with 20,367 tape locations, and users might well be interested in analyzing the data largely on a family-level basis, we have appended suggestions here on the creation of family files from the cross-year family-individual tapes.

The structure of the individual-level tape combines family-level data for each person in the family unit together with information unique to that person. That is to say, each member of a family has family-level data identical with the data of all the other family members in that family. The following instructions remove the duplication of these data. Each individual is assigned a unique sequence number, which indicates the person's position and status on the 1984 list of family members; thus, the first person listed, the Head of the family, is 01, the second person listed is 02, and so on. To create a family-level file, it is necessary only to write onto a new tape those cases where V30454 (1984 Sequence Number) = 01, since each family must have at least one member, although it may or may not have two or more. It is suggested that V30454 be used instead of V30455, Relationship to Head, because although each family has one and only one current Head (i.e., where V30454 = 01-20 and V30455 = 10), it is possible that the prior year's Head of the family has moved out since the previous interview and a new Head is present for the current interview. Relationship to Head for movers-out is coded with reference to the previous year's Head, so for both the current Head and the previous Head, V30455 = 10. One may also, when creating the family-level tape, truncate the data at V11079, since most individual-level variables for the

Head are also present at the family level. These instructions create a merged 1968-1984 family-level file for currently response families.

For other years' merged family-level files, the response and nonresponse individual files must be concatenated, and the Sequence Number variable for the latest desired year should be used. Again, this produces a file of families who were response in this latest year and eliminates families who had already become nonresponse.

Part 8: PSID User Guide

The PSID staff has completed a User Guide to the panel study. The volume was designed to supplement, but not replace, the documentation volumes issued for each year's data. It is published in a loose-leaf form, so that updates can easily be made as the need arises. Chapters in this User Guide cover PSID history, sample composition and weighting, how to deal with family composition and change, structure of the data tapes, study content, and other topics of interest to users. The alphabetical indexes, formerly found in this volume, for all family-level and individual-level data items have been permanently transferred to the User Guide, due to printing cost considerations. The User Guide is included with the set of documentation volumes that accompany an order for PSID tapes and can be ordered separately as well. For information on obtaining the User Guide, and other PSID products, contact Janet Vavrz, Inter-University Consortium for Political and Social Research, P.O. Box 1248, Ann Arbor, Michigan, 48106 (313) 763-5010.

SECTION II
TAPE CODES FOR WAVE XVII

Part 1: Seventeenth-Year Family-Level Tape Code

The following is the codebook for the seventeenth wave of family-level data from the interview schedule. The seventeen-year individual-level codebook will be found in Part 2 of this section. The variable numbers and tape locations refer to those on the 1968-1984 cross-year tape. For family-level codes for the first five waves of this study, see A Panel Study of Income Dynamics, Volume II. The remainder of the family-level codes for Waves VI through XVI will be found in successive volumes entitled A Panel Study of Income Dynamics: Procedures and Tape Codes. The distributions for the following variables are weighted and based on all families interviewed in 1984. To generate distributions on field amounts, percent nonzero and mean values are provided for relevant variables.

Tape Code Information

The example below illustrates the information contained in this codebook for a typical variable. The numbers in brackets do not appear in the codebook, but refer to the explanations which follow this example.

- [1] Indicates the cross-year variable number. A variable number is assigned to each item in the study. (See the introduction to the alphabetical index, Section III, Part I, for a list of the range of variable numbers specific to each year.)
- [2] Indicates the abbreviated variable name (maximum of 25 characters) used in the OSIRIS system to identify the variable for the user. This abbreviated variable name is identical to the variable name listed in the OSIRIS dictionary for this variable. It is also listed as a subheading of the printout when a variable is accessed in an OSIRIS program. When used in this manner, the abbreviated variable name can be useful as a cross-reference tool, as well as a way to avoid errors. Refer to the list of abbreviations below for some help in translating the names into sensible English.
- [3] Indicates the starting location and ending location for this variable when the data are stored on a magnetic tape in the OSIRIS format.

- [4] Indicates the code value for missing data. In this example, code values equalling nine are missing data (MD=9). Alternative statements for other variables are "MD=0 or GE 8" or "MD=GE 7." In cases where nothing is printed in this space, missing data are not permitted for the variable; values were either assigned for such cases, or missing data were impossible.

Some analysis software packages (including the OSIRIS software package) require that certain types of data which the user desires to exclude from analysis can be designated as "missing data," e.g., inappropriate, unascertained, or ambiguous data categories. Although these codes have been defined by the PSID staff as missing data categories, this does not mean that the user should not or cannot use them in a substantive role if so desired.

- [5] Indicates the full question number that was used in the questionnaire, as well as the exact wording of the questionnaire item; for variables not coded directly from the questionnaire, such as generated data, an appropriate title appears here.
- [6] Indicates the unweighted N for each code value. Blanks indicate that no cases have this value.
- [7] Indicates the weighted percentages for each code value. Blanks indicate that no cases have this value.
- [8] Indicates the code values occurring in the data for this variable. For variables containing field amounts, refer to the notes appearing directly below items [10] and [11] for the range of data values.
- [9] Indicates the textual definitions of the codes. Abbreviations commonly used in the code definitions are "DK" (Don't Know), "NA" (Not Ascertained), and "Inap." (Inappropriate).
- [10] Indicates the "% nonzero" value, where specified. These are weighted.
- [11] Indicates the "mean nonzero" value, where specified. These are weighted.

Family Composition Change between 1983 and 1984

Codes 2 through 8 take priority over codes 0 and 1.

5,155	78.4	0.	No change; no movers-in or movers-out of the family.
1,069	13.1	1.	Change in members other than Head or Wife/"Wife" only.
192	2.4	2.	Head is the same person as in 1983 but Wife/"Wife" left or died; Head has new Wife/"Wife"; used also when cohabiting, nonrelative female becomes "Wife."
131	2.1	3.	Wife/"Wife" from 1983 is now Head.
117	1.0	4.	1983 female Head got married--husband (usually a nonsample member) is now Head. Used also when cohabiting, nonrelative male becomes Head.
199	2.6	5.	Some sample member other than 1983 Head or Wife/"Wife" has become Head of this FU. (Used primarily for male and unmarried female splitoffs.)
51	0.4	6.	Some female other than 1983 Head got married and her husband (nonsample member) is now Head. (Used primarily for married female splitoffs.)
		7.	Female Head in 1983 with husband in institution--husband in FU in 1984 and is now Head.
4	0.0	8.	Other (used for recombined families--these are usually 1968 Heads and Wives who have parted for a year or more, been interviewed separately, and who have reconciled at some time since the 1983 interview but prior to the 1984 interview.

NOTE: V10093 through V10114 were coded from questions C108, C111, C125 and C128 for Heads who were working more than ten hours per week at the time of the interview. Information for unemployed Heads was taken from questions D34, D37, D49, and D52. Heads who were retired, permanently disabled, etc. and who were either not working at all or working ten hours per week or less at the time of the interview were assumed to be either unemployed or out of the labor force in 1983 (code 7 below) for all months not mentioned at question E8, unless more information was volunteered. The 1984 variables were coded with missing data except for the month of the interview, which was coded using question E10.

NOTE: V10187 through V10208 were coded from questions F105, F108, F121 and F124 for Wives/"Wives" who were working more than ten hours per week at the time of the interview. Information for unemployed Wives/"Wives" was taken from questions G32, G35, G46, and G48. Wives/"Wives" who were retired, permanently disabled, etc. and who were either not working at all or working ten hours per week or less at the time of the interview were assumed to be either unemployed or out of the labor force in 1983 (code 7 below) for all months not mentioned at question H8, unless more information was volunteered. The 1984 variables were coded with missing data except for the month of the interview, which was coded using question H10.

V10222 '# IN FU-1984 ' TL0C= 17626-17627

Family Size in 1984 (Number of members in family at time of interview)

mean = 2.5

The range of possible values for this variable is at least 01 but not more than 20. The code value represents the actual number of persons in the FU, and has the same value as V10418. There are no missing data in this variable.

V10223 '# REQUIRED ROOMS ' TL0C= 17628

Number of Rooms Required for FU of This Size, Age, and Sex Composition

The rule for calculating this variable is as follows:

- 2 rooms--for each Head with or without a Wife/"Wife"
- +1 room--for each additional married couple or single person 18 or over
- +1 room--for every two boys under 18
- +1 room--for every two girls under 18

If there is an odd number of children, round up. If there is an odd number of girls and an odd number of boys, pair those under 10 years of age regardless of sex.

V10224 'WEEKLY FOOD NEEDS-1984 ' TL0C= 17629-17633

Weekly Food Needs

mean = 1588.5

This variable's values are based on USDA Low-Cost Plan estimates of weekly food costs, according to the table below (reproduced from Family Economics Review, June 1967), summed for the family as it was at the time of the interview. Please refer to the wave VII (1974) documentation volume, pp. 39-41, for a complete description of the PSID's use of these standards.

INDIVIDUAL FOOD STANDARD (LOW COST)

<u>Age</u>	<u>Male</u>	<u>Female</u>
Under 4	\$3.90	\$3.90
4-6	4.60	4.60
7-9	5.50	5.50
10-12	6.40	6.30
13-15	7.40	6.90
16-20	8.70	7.20
21-35	7.50	6.50
36-55	6.90	6.30
56 and older	6.30	5.40

This same standard has been used in Waves I-XVI. Adjustments for inflation, etc., are left to users. The actual weekly food needs in dollars and cents is coded here.

OSIRIS USERS: Note that this variable is defined in the dictionary as having two decimal places. The mean value above ignores these decimal places.

V10225 'ANNUAL NEEDS STD-1983 ' TL0C= 17634-17638

Annual Need Standard in 1983

mean = 2,993.0

This is the Orshansky-type poverty threshold based on an annual food needs standard which is derived from the weekly food costs in the preceding variable, converted to an annual amount, and adjusted for economies of scale by USDA rules as follows:

```

+-----+
| Single person . . . . .add 20% |
| Two persons . . . . .add 10% |
| Three persons . . . . .add 5% |
| Four persons . . . . .no change |
| Five persons . . . . .deduct 5% |
| Six or more persons . . . . .deduct 10% |
+-----+
    
```

An additional adjustment for diseconomies of small households (in rent, etc.) was made as follows:

- 4.89 times the food needs for single persons
- 3.70 times the food needs for two-person units
- 3.00 times the food needs for all other units

Please refer to the wave VII (1974) documentation volume, pp. 39-41, and to the User Guide, Chapter D, for further details on the need standard. Note that this variable is not adjusted for inflation, nor is it exactly comparable to the official poverty standard; such changes are left to users. This need standard is adjusted for changes in family composition during 1983 and is not adjusted for farmers; see V11024 for an income/needs measure which makes such an adjustment.

NOTE: Labor and asset splits of farm and business income were made using the 1983 work hours on jobs which generated those incomes. The rules are as follows:

- 1) if work hours are greater than or equal to the (positive) dollar amount, then all income is assumed to be labor.
- 2) if work hours are less than the dollar amount, assume that labor is worth at least \$1.00 per hour and that all income above that amount is split equally between labor and asset.

$$\text{Labor Portion} = \text{Total farm or business income} / 2 + \text{work hours} / 2$$

$$\text{Asset Portion} = \text{Total farm or business income} / 2 - \text{work hours} / 2$$
- 3) if total farm or business income represents a loss (i.e., a negative number), then the labor portion equals 0 and the loss is coded in the asset portion.

V10585 'C136 TRAVEL TO WORK H-E ' TL0C= 18428-18430

C136. About how much time does it take you to get to work each day, door to door?

% nonzero = 63.2
mean nonzero = 170.0

The values for this variable in the range 001-998 represent annualized hours spent traveling to work. These hours are calculated by multiplying the travel time in hours times the number of trips per week times the number of weeks worked in 1983. Trips per week are assigned on the basis of hours worked per week on the main job (V10562) according to the table below. Note that for a Head who did not work in 1983 but is now working, this variable equals zero. All missing data were assigned.

Number of Hours Per Week	Number of Trips Per Week
<10	2 or 4, whichever reasonable
<20	6
<35	8
<48	10
48 or more	12

D42. About how much did you make per hour at this?-ALL EXTRA JOBS EXCEPT FIRST

% nonzero = 0.1
 mean nonzero, excluding missing data = 665.8

The values for this variable represent dollars and cents per hour. If the amount was given as something other than an hourly rate, the answers to D43 and D45 were used to calculate it. If Head had more than two extra jobs, the value here represents a weighted average hourly wage from all of them except the first one.

D54. On your last job, how much time did it take you to get to work each day, door to door?

% nonzero = 2.7
 mean nonzero = 137.4

The values for this variable in the range 001-998 represent annualized hours spent traveling to work. These hours are calculated by multiplying the travel time in hours times the number of trips per week times the number of weeks worked in 1983. Trips per week are assigned on the basis of hours worked per week on the main job (V10630) according to the table below. Note that for a Head who did not work in 1983, this variable equals zero. All missing data were assigned.

F125. About how much time does it take your (wife/friend) to get to work (at her present job) each day, door to door?

% nonzero = 26.5
mean nonzero = 124.0

The values for this variable in the range 001-998 represent annualized hours spent traveling to work. These hours are calculated by multiplying the travel time in hours times the number of trips per week times the number of weeks worked in 1983. Trips per week are assigned on the basis of hours worked per week on the main job (V10776) according to the table below. Note that for a Wife/"Wife" who did not work in 1983 but is now working, this variable equals zero. All missing data were assigned.

V11005 'M38-39 RELIGIOUS PREF-HD' TLOC= 19154 MD=9

M38. Is your religious preference Protestant, Catholic, or Jewish, or what?

M39. What denomination is that?

This question was asked of all Heads in 1970, and for the 1971 through 1977 interviews was asked of all new Heads. Values were brought forward from previous data each year for families with the same Heads. In 1978, however, the question was not asked. In 1979, when this question was reinserted into the questionnaire, values were not brought forward from 1977 for families with unchanged Heads since that time. Therefore, any cases with new Heads in 1978 who are still Heads must by necessity contain missing data (i.e., a value of zero). For those cases with the same Heads from 1977 through the present, please use 1977 religious preference, V5617.

mean nonzero, including negative values = 4,049.7

The values for this variable in the range -9999 through 99998 represent the actual estimate made for taxes. V11009 and V11010 were computed using the following variables:

V10277 Taxable Income of Head and Wife/"Wife"

V10280 Total Number of Exemptions of Head and Wife/"Wife"

V10281 Tax Table Used

Negative values are allowed for this variable for those eligible for the earned income credit and whose taxes are less than the amount of the credit. For highly detailed information on the PSID's estimation of taxes, see the 1980 (wave XIII) documentation volume, pp. 83-88. V11022 'TOT FAM MONEY Y 83 ' TL0C= 19201-19207

Total 1983 Family Money Income

mean = 27,006.5

Negative amounts and zeroes are not allowed for this variable because it is used in the generation of the income/needs ratio. The values represent the summation of the following variables:

V10277 Taxable Income of Head and Wife/"Wife"
V10305 Total Transfers of Head and Wife/"Wife"
V10382 Taxable Income of Others
V10396 Total Transfers of Others

The values for this variable represent the actual amount of Head's labor income in whole dollars and sum the following variables:

V10254 Labor Part of Farm Income
V10255 Labor Part of Business Income
V10256 Head's Wages Income
V10258 Head's Bonuses, Overtime, Commissions
V10259 Head's Income from Professional Practice or Trade

V11024 '1983 TOT FAM Y/NEEDS' TL0C= 19214-19217

Total 1983 Family Money Income/Needs for 1983 Family (Income/needs ratio)

mean = 907.6

The formula used in generating this variable is as follows:

Total 1983 Family Money Income (V11022)/1983 Family Needs (V10225).

This ratio is multiplied by 1.25 for farmers (those coded 801 in V10460 or 80 in V10566 and 10570) to adjust for lower food costs. This is the only measure of income to needs on this tape which makes this adjustment for farmers. For a full description on the needs standard used, please refer to the wave VII (1974) documentation volume, pp. 39-41. Note that this need standard has not been adjusted for inflation.

OSIRIS USERS: Note that this variable is defined in the dictionary as having two decimal places. The mean value above ignores these decimal places.

9999. Income/needs ratio of 99.99 or more

V11025 'ANNUAL FOOD STD' TL0C= 19218-19221

Annual 1984 Food Standard

mean = 860.4

This variable is generated by multiplying the weekly food needs (V10224) by 52 and then making the following adjustments for economies of scale:

+20% for one-person families
 +10% for two-person families
 + 5% for three-person families
 no adjustment for four-person families
 - 5% for five-person families
 -10% for families with six or more persons

The values represent the actual annual food standard in whole dollars for the 1984 family.

9999. Food standard of \$9,999 or more

V11026 'HEAD 83 AVG HRLY EARNING' TL0C= 19222-19225

Average Hourly Earnings in 1983 of 1984 Head

% nonzero = 75.2

mean nonzero = 1,034.8

The values for this variable represent the Head's average hourly earnings in dollars and cents per hour. The formula used for this variable's generation is as follows:

1983 Labor Income of Head (V11023)/1983 Hours of Work of Head (V11037)

OSIRIS USERS: Note that this variable is defined in the dictionary as having two decimal places. The mean value above ignores these decimal places.

9999. \$99.99 per hour or more

0000. Zero hourly earnings (V11023=00000); Head did not work for money (V10037=0000)

V11027 'WIFE 83 AVG HRLY EARNING' TL0C= 19226-19229

Average Hourly Earnings in 1983 of 1984 Wife/"Wife"

% nonzero = 33.8
mean nonzero = 755.1

The values for this variable represent the Wife's/"Wife's" average hourly earnings in dollars and cents per hour. The formula used for this variable's generation is as follows:

1983 Labor Income of Wife/"Wife" (V10263)/1983 Hours of Work of Wife/"Wife" (V10131)

OSIRIS USERS: Note that this variable is defined in the dictionary as having two decimal places. The mean value above ignores these decimal places.

9999. \$99.99 per hour or more

0000. Zero hourly earnings (V10263=00000); wife/"wife" did not work for money (V10131=0000); no wife/"wife" in FU (V10421=00)

V11036 'HU VALUE/ROOM - 1984 ' TL0C= 19240-19244 MD=99999

Value Per Room of 1984 Housing Unit

mean, excluding missing data = 9,900.3

The values for this variable represent the actual value per room, calculated according to the following formula:

$$\frac{V11018 + [(V10026 + V10028) \times 10]}{V10432}$$

(1984 House Value)	+	[(1984 Rent Paid)	+	(1984 Value of Rent Received)	x 10]	/	V10432	(Number of Rooms in 1984)
--------------------	---	-------------------	---	-------------------------------	-------	---	--------	---------------------------

The following rules were used for each case, depending on the value of V10437:

Homeowners (V10437=1): House value (V11018) divided by the number of rooms (V10432)

Renters (V10437=5): Dwelling value, assumed to be 10 times the annual rent (V10026), divided by the number of rooms (V10432)

Those neither owning nor renting (V10437=8): Dwelling value, assumed to be 10 times the value of rent received free in return for services (V10028), divided by the number of rooms (V10432)

Note that the maximum value for V10432, excluding missing data, is 8, so data values in this variable are inflated for a few cases.

99998. \$99,998 or more per room

99999. NA number of rooms in dwelling or FU shares room (V10432=0,9)

V11037 'ACTUL MINUS REQ ROOMS 84' TL0C= 19245 MD=9

Actual Minus Required Rooms for the 1984 Family

mean, excluding missing data = 5.4

The formula used for creation of this variable is as follows:

Number of Rooms in Dwelling Unit (V10432) - Number of Rooms Required for a Family of Given Composition (V10223) + 3.

Note that the maximum value for V10432, excluding missing data, is 8, so data values in this variable are inflated for a few cases.

Number of Persons Per Room for the 1984 Family

mean, excluding missing data = 5.1

The values for this variable represent the number of persons per room with one implied decimal place; e.g., a value of 20 here represents 2.0 persons per room. The formula used for creation of this variable is as follows:

Number of Persons in Family (V10222)/Number of Rooms in Dwelling (V10432)

Note that the maximum value for V10432, excluding missing data, is 8, so data values in this variable are inflated for a few cases.

OSIRIS USERS: Note that this variable is defined in the dictionary as having one decimal place. The mean value above ignores this decimal place.

mean = 1.8

The values for this variable represent the actual number of persons 18 years of age and older in the family. If the Head or Wife/"Wife" is under 18, he or she is also included here. No missing data are allowed. The formula used for creation of this variable is as follows:

Number in Family (V10222) - Number of Persons under 18 Years of Age, excluding Head and Wife/"Wife," in the Family (V10422)

V11057 'BRR STRATUM ' TL0C= 19267-19268

Balanced Half-Sample (BHS) Stratum Code

This variable, which for most cases is identical to the first two digits of 1980 V7449, 1981 V8101, and 1982 V9725, was constructed to allow users to calculate proper standard errors for regression coefficients. Families originating from 1968 families were reassigned stratum values in 1983. Splitoffs receive the stratum values assigned to the families in which they were residing in 1968. See Section I, Part 5 of the wave XVI documentation volume for a more detailed discussion of this variable.

V11058 'BRR SECU ' TL0C= 19269

Balanced Half-Sample Sample Error Computation Unit (BHSECU) Code

This variable, which is identical to the third digit of earlier SECU codes, identifies paired clusters necessary for computing sampling errors of regression coefficients by the method of Balanced Half-sample Replications. This variable should be used in conjunction with V11057.

V11059 'PSALMS STRATUM ' TL0C= 19270-19271

Paired Selection Stratum Code

This variable is provided to identify strata necessary in computing proper variances of means and totals using such algorithms as PSALMS in OSIRIS.IV, SESUDAAN in SAS, or CLUSTERS in the World Fertility Surveys. Codes 01-53 identify strata for the self-representing portion of the sample, while code 54 identifies cases from all nonself-representing areas. This variable should be used in conjunction with V11060. See Section I, Part 5 of the wave XVI documentation volume for a more detailed explanation of this variable.

V11060 'PSALMS SECU ' TL0C= 19272-19274

Paired Selection Sample Error Computation Unit Code

This variable identifies clusters necessary for computing sampling errors for means and totals. For the self-representing portion of the sample (V11059=1-53), V11060 identifies matched pairs of clusters for using in a paired difference model. For the nonself-representing portion (V11059=54), V11060 identifies to which of 115 clusters the case belongs. These 115 clusters are arranged in order of similarity in such a manner as to allow the application of a "successive difference" model in estimating variances of means and totals. This variable should be used in conjunction with V11059.

NOTE: The values for V11061-V11063 are obtained from questionnaires sent to state employment offices. See Section I, Part 5 of this volume for further details.

Year in Which 1984 Head Most Recently Became New Head

This variable contains the last two digits of the year of data collection in which background information in V10967-V11005 was most recently gathered for the 1984 Head. If a Head splits off from the main family, e.g., through divorce, background information is reasked. Some of this information can change over time; thus, this variable can be used by the analyst to indicate which waves of data might be searched to update the variables concerned. There have been some changes in background data, and occasionally some items have been reasked of all Heads. This can be ascertained by scanning the indexes in the final section of this volume.

NOTE: The following variables, V11073-V11078, provide the user with a means of linking data between panel families that share the household. Each family involved in such a living arrangement has nonzero values here that represent all of the other panel families in the household. There are three sets of these variables, as that was the maximum number of other such families sharing the household for any given case. Please see PSID User Guide, Chapter F, for a more detailed description.

V11079 '1984 FAMILY WEIGHT ' TLOC= 19311-19312

1984 Family Weight

This weight variable was completely revised in 1984 to account for deaths, marriages to nonsample persons, and differential nonresponse since 1968. See Section I, Part 5 of this volume for further information.

Part 2: Seventeen-Year Individual-Level Tape Code

The following pages contain the code values and corresponding documentation for all seventeen years of individual variables. The variable numbers and tape locations refer to those on the 17-year 1968-1984 family-individual tape only. Note that the individual variable numbers assigned here differ from those assigned on all other cross-year family-individual tapes (i.e., the five-year tape up through the sixteen-year tape). Variable numbers for earlier years' individual variables have been changing with each additional cross-year tape because of our processing design. However, we have now altered this design to accommodate fixed variable numbers for the individual data. This means that beginning with this 1968-1984 merged tape, and for the foreseeable future, individual variable numbers for 1968-1984 will be as follows:

V30001-V30019	1968 individual data
V30020-V30043	1969 individual data
V30044-V30068	1970 individual data
V30069-V30093	1971 individual data
V30094-V30120	1972 individual data
V30121-V30142	1973 individual data
V30143-V30165	1974 individual data
V30166-V30195	1975 individual data
V30196-V30226	1976 individual data
V30227-V30257	1977 individual data
V30258-V30296	1978 individual data
V30297-V30328	1979 individual data
V30329-V30360	1980 individual data
V30361-V30392	1981 individual data
V30393-V30420	1982 individual data
V30421-V30452	1983 individual data
V30453-V30488	1984 individual data
V32001-V32012	Summary variables

The variable numbers for the summary variables at the end of the list will also remain fixed, although the values for these variables may change for an individual in future cross-year tapes because they will be updated with each additional wave of data collection to reflect conditions from 1968 to the most recent year covered by the tape.

The user is encouraged to read appendices G.3, "Individual Data Records," and G.4, "Splitoffs," in the User Guide for more details about individual data.

Two versions of the 1968-1984 merged family-individual data are now available. One of these versions is the usual file that we have heretofore released. It includes only those individuals with data for the current year, i.e., those currently in a panel family, those who moved out or died between the 1983 and 1984 interviews, and those institutionalized individuals connected with a current responding family. Cases included on the other version represent all other individuals, both "sample" and "nonsample," who have ever been in any responding family throughout the course of the study, who are not now connected with a 1984 family. Creation of the file that includes all nonresponse individuals in the PSID not only increased the total number of data records from approximately 21,000 to 31,186, but also increased the percentage of data records that contain a year or more of data with zero values.

Several new individual-level variables have been added to both of these files. Below is a synopsis of the new variables.

342 - INDIVIDUAL DATA

- a) Month/Year Moved In or Out 1968-1974
- b) Splitoff information 1969-1980 (Month, Year, and Main Family ID number)
- c) Weights for all years. Refer to Section I, Part 5 for a description.
- d) Type of Individual Data Record and Reason for NonFU Membership (1968-1984)
- e) Summary variables, located at the end of each individual's record and to be updated annually: the first two variables, 1968 ID Number and Person Number of Mother, contain data only for those in a panel FU for 1983 or 1984. The 1968 ID Number and Person Number were originally coded for response individuals in 1983 or 1984. Consistency checks between 1983 and 1984 versions of these data, where an individual was response in both years, were made. All remaining cases contain zeroes. The 1968 ID Number and Person Number of Father currently contain only zeroes, but the positions were added to the tape in anticipation of kinship data collected in 1985. Additional summary variables define the various types of data records in a system that will hopefully simplify the analyst's use of the data.

There are a few terms used in the following codebook that may need explanation. The phrase "main family nonresponse" means that both the individual and his or her family have at that time become lost to our study, although either or both may reappear in the study in subsequent years. The year prior to becoming nonresponse, the individual was connected with a family interviewed by our study; thus, both family and individual data are available for that prior year, and the individual's Sequence Number at that time was 01-59.¹ Data, however, were collected for neither the individual nor his or her family in the year of nonresponse. The data for the year of nonresponse are zeroes except for the person number variable, type of individual record, and reason for nonresponse. In subsequent years, their data may or may not contain zeroes, depending on whether they rejoined a responding FU.

In contrast, mover-out nonresponse individuals have left a family that was still in the study. Since such individuals were usually present in that family for at least part of the year preceding nonresponse, they have some nonzero data in the year that they became nonresponse. In subsequent years, those who were in institutions have only a few variables coded (sequence number, age, sex, relationship to head) with nonzero values; income, housework, and other individual-level variables are filled with zeroes. Eventually, such individuals may a) become response by moving into a family or by becoming splitoffs, b) move from the institution and remain mover-out nonresponse (shown when Sequence Number=71-89), or c) become main family nonresponse because the family itself became nonresponse. See above paragraph for an explanation of main family

¹Sequence Number in the range 51-59 indicates that such an individual was in an institution in that year. If the individual entered an institution since the previous interview, there are some income data available at the individual level. If, however, the individual had remained in an institution for a wave of data or more, only sequence number, age, relation to head, and sex are available, although family-level data are connected with such an individual's record.

nonresponse data records. Other mover-out nonresponse individuals' data contain zeroes, unless they subsequently rejoined a responding family.

Note that few currently response individuals have data that contain zeroes for an entire year. The bulk of the zero records are for currently nonresponse individuals.

Unweighted Ns and weighted percents are printed for individual-level variables. Case counts include individuals from both the response and nonresponse files. Note that, since nonsample individuals (those persons with Person Number (V30002) in the range 170-228) have weights of zero, their data records are not included in the calculation of the weighted percents. However, the unweighted case counts do include these nonsample individuals. Additionally, each year's distributions are calculated only for those individuals with nonzero data in that year (i.e., where Sequence Number is greater than zero), using that year's weight for the percents. No distributions are printed in the tape code for the Type of Individual Data Record, Reason for Nonresponse, and summary variables. Instead, we have included a table at the end of the tape code with unweighted case counts from the entire response-nonresponse dataset on these variables. Refer to Section I, part 5 of this volume, and the User Guide, Chapter E for more information about both family and individual-level weights.

INDIVIDUAL TAPE CODE, 1968-1984

V30001 '1968 INTERVIEW NUMBER 68' TLOC= 19313-19316

1968 Interview Number (1968 ID Number)

This variable is the 1968 ID number which, when used in combination with Person Number (V30002), provides unique identification for each individual on the data tape. Code values in the range 0001-2930 indicate that the individual was a member of or moved into a family from the SRC cross-section sample in 1968. Those equalling 5001 through 6872 identify individuals who were members of or moved into families from the Census sample.

V30040 'MAIN FAM ID FOR S/O 69' TL0C= 19391-19394

1969 ID Number of the Main Family from which this Individual's Splitoff Family Was Formed

Actual 1969 ID Numbers (0001-4460) were coded for individuals who moved out of main families or institutions to form splitoff families.

9997.	This splitoff individual did not move out of a main family or institution, e.g., nonsample Heads, Wives or others who appeared for the first time in the 1969 splitoff family; children newly born in, etc.
0000.	Inap.; individual was born or moved in after the 1969 interview (V30020>0000 and V30021=00); main family nonresponse for 1969 or mover-out nonresponse from 1968 (V30020=0000); not a splitoff in 1969 (V30026#1 or V30026=1 and V30027#00)

V30041 'TYPE OF IND RECORD 69' TL0C= 19395-19396 MD=99

Type of Individual Data Record in 1969

All individuals who became main family nonresponse in 1969 have 1969 ID numbers equal to 0000 and zero data values for 1969, but have nonzero data values for their 1968 records. Mover-out nonresponse individuals for 1969 have nonzero data for 1969 just as response individuals do; however, the

movers-out have 1969 sequence numbers in the range 51-89. Codes 01-04 below apply to main family nonresponse individuals only; codes 06-07 are reserved for mover-out nonresponse.

For case counts on this variable, please refer to Table 1 at the end of this tape code.

- 01. This sample member was 18 years old or older at the time of main family nonresponse and had been in the FU in 1968.
- 02. This sample member was less than 18 at the time of main family nonresponse and had been in the FU in 1968.
- 04. This sample member had been in an institution in 1968 but his or her main family became nonresponse in 1969.
- 05. This sample member, although connected with a 1969 response family, was in an institution at the time of the 1969 interview.
- 06. This sample member was 18 years old or older and moved out or died between the 1968 and 1969 interviews.
- 07. This sample member was less than 18 and moved out or died between the 1968 and 1969 interviews.
- 09. This individual had not been born or moved in by the time of the 1969 interview (V30020>0000 and V30021=00)
- 10. This spouse had moved out and not returned or died by the time of the 1968 interview (V30002=228 or V30002=227 and V30020=0000)
- 99. NA; DK

V30042 'WHY NONRESPONSE 69' TLDC= 19397-19398 MD=99

Reason for NonFU Membership in 1969

Individuals ineligible for the interview consist of those who were too young (under 18 years old) or who are not sample members.

For case counts on this variable, please refer to Table 1 at the end of this tape code.

- 01. Refusal by all eligible/available FU members.
- 02. No-one at home for contact during the interviewing period
- 03. Respondent absent; some FU member contacted, but not the appropriate respondent.
- 04. Lost; unable to locate any member of the FU at all.
- 05. FU is located too far away for interviewer contact.
- 11. This individual was in the armed forces.
- 12. This individual was in an educational institution.
- 13. This individual was in a health care facility.
- 14. This individual was in jail or prison.
- 19. This individual was in some other type of institution, for example, a religious order. Cases in which the type of institution is unknown are included here, also.
- 21. This individual was not eligible for the interview and the Head or the Wife, whichever is the sample member, became main family nonresponse because he/she was institutionalized by joining the armed forces.
- 22. This individual was not eligible for the interview and the Head or Wife, whichever is sample, became main family nonresponse because he/she was institutionalized by entering an educational institution.
- 23. This individual was not eligible for the interview and the Head or Wife, whichever is the sample member, became main family nonresponse because he/she was institutionalized by entering a health care facility.
- 24. This individual was not eligible for the interview and the Head or Wife, whichever is the sample member, became main family nonresponse because he/she was imprisoned.
- 29. This individual was not eligible for the interview and the Head or Wife, whichever is sample, became main family nonresponse because he/she was institutionalized by some means other than the above; for example, he/she may have

- entered a religious order. Cases in which the type of institution is unknown are included here, also.
31. This individual was unable to cooperate through disability.
 32. This individual was not eligible for the interview and became main family nonresponse because the Head or Wife, whichever is sample, was unable to cooperate through disability.
 41. This individual died between the 1968 and 1969 interviews.
 42. This individual was not eligible for the interview and became main family nonresponse because the Head or Wife, whichever is the sample member, died.
 51. This individual, although followed for interview, was discovered to be nonsample: office error.
 52. This individual should have been followed but was not: office error.
 53. This individual was mistakenly included in two or more response families at once; this record is the duplicate, or erroneous, one.
 59. Other office error
 91. This sample individual moved out of the 1969 main family and was eligible for interviewing but the reason for nonresponse is NA.
 92. This sample individual was not eligible for interviewing at the time he/she moved out because he/she was too young to be followed.
 97. This individual had not been born or moved in by the time of the 1969 interview (V30020>0000 and V30021=00)
 98. This spouse had moved out and not returned or died in the year preceding the 1968 interview (V30002=228 or V30002=227 and V30020=0000)
 99. NA; DK
 00. Inap.; this individual was in a panel family in 1969 (V30021=01-20)

V30043 'INDIVIDUAL WEIGHT 69' TLOC= 19399-19400

1969 Individual Weight

This variable is nonzero only for sample members associated with a 1969 response family. It was recalculated for 1969, taking account of the heavier nonresponse losses suffered in that year, including mortality. Sample members born into the family in 1969 receive either the average of the Head's and spouse's weights or, in the event of a single Head, the child receives the Head's weight. Refer to Section I, Part 5 of this volume for details on the weights themselves.

00. Individual was born or moved in after the 1969 interview (V30020>0000 and V30021=00); nonsample spouse who moved out or died in the year preceding the 1968 interview (V30002=228 or V30002=227 and V30020=0000); nonsample individual (V30025=170-226)

1970 INDIVIDUAL VARIABLES: Distributions are calculated only for cases with nonzero data (V30045=01-89) using the 1970 weight (V30068) for the percents.

V30044 '1970 INTERVIEW NUMBER 70' TLOC= 19401-19404

1970 Interview Number (1970 ID Number)

The values for this variable in the range 0001-4645 represent the 1970 ID number of the interview in which this individual was included in 1970. Individuals moving in or born subsequent to the 1970 interview received the 1970 ID number of the family into which they moved.

0000. This individual was main family nonresponse by 1970 or mover-out nonresponse by 1969

Year Splitoff Moved Out of Main Family Unit

The last two digits of the year the move occurred is coded here. For example, a value of 70 indicates a move during the year 1970. Refer to Section I, Part 5 of this volume for details of this variable's generation.

- 98. Moved out of an institution
- 99. NA year
- 00. Inap.; individual was born or moved in after the 1970 interview (V30044>0000 and V30045=00); main family nonresponse by 1970 or mover-out nonresponse by 1969 (V30044=0000); not a splitoff in 1970 (V30050#1 or V30050=1 and V3051#00)

V30065 'MAIN FAM ID FOR S/O 70' TL0C= 19443-19446

1970 ID Number of the Main Family from which this Individual's Splitoff Family Was Formed

Actual 1970 ID Numbers (0001-4645) were coded for individuals who moved out of main families or institutions to form splitoff families.

- 9997. This splitoff individual did not move out of a main family or institution, e.g., nonsample Heads, Wives or others who appeared for the first time in the 1970 splitoff family; children newly born in, etc.
- 0000. Inap.; individual was born or moved in after the 1970 interview (V30044>0000 and V30045=00); main family nonresponse by 1970 or mover-out nonresponse by 1969 (V30044=0000); not a splitoff in 1970 (V30050#1 or V30050=1 and V3051#00)

V30066 'TYPE OF IND RECORD 70' TL0C= 19447-19448 MD=99

Type of Individual Data Record in 1970

All individuals who became main family nonresponse in 1970 have 1970 ID numbers equal to 0000 and zero data values for 1970, but have nonzero data values for their 1969 records. Mover-out nonresponse individuals for 1970 have nonzero data for 1970 just as response individuals do; however, the movers-out have 1970 sequence numbers in the range 51-89. Codes 01-04 below apply to main family nonresponse individuals only; codes 06-08 are reserved for mover-out nonresponse.

For case counts on this variable, please refer to Table 1 at the end of this tape code.

- 01. This sample member was 18 years old or older at the time of main family nonresponse and had been in the FU in 1969.
- 02. This sample member was less than 18 at the time of main family nonresponse and had been in the FU in 1969.
- 03. This nonsample individual had been in the 1969 FU, and this FU became nonresponse in 1970.
- 04. This sample member had been in an institution in 1969 but his or her main family became nonresponse in 1970.
- 05. This sample member, although connected with a 1970 response family, was in an institution at the time of the 1970 interview.
- 06. This sample member was 18 years old or older and moved out or died between the 1969 and 1970 interviews.
- 07. This sample member was less than 18 and moved out or died between the 1969 and 1970 interviews.
- 08. This nonsample individual moved out or died between the 1969 and 1970 interviews.
- 09. This individual had not been born or moved in for the first time by the time of the 1970 interview.
- 10. This individual had become nonresponse by the time of the 1969 interview
- 99. NA; DK
- 00. Inap.; this individual was in a panel family in 1970 (V30045=01-20)

V30067 'WHY NONRESPONSE 70' TL0C= 19449-19450 MD=99

Reason for NonFU Membership in 1970

Individuals ineligible for the interview consist of those who were too young (under 18 years old) or who are not sample members.

For case counts on this variable, please refer to Table 1 at the end of this tape code.

01. Refusal by all eligible/available FU members.
02. No-one at home for contact during the interviewing period.
03. Respondent absent; some FU member contacted, but not the appropriate respondent.
04. Lost; unable to locate any member of the FU at all.
05. FU is located too far away for interviewer contact.
11. This individual was in the armed forces.
12. This individual was in an educational institution.
13. This individual was in a health care facility
14. This individual was in jail or prison
19. This individual was in some other type of institution, for example, a religious order. Cases in which the type of institution is unknown are included here, also.
21. This individual was not eligible for the interview and the Head or the Wife, whichever is the sample member, became main family nonresponse because he/she was institutionalized by joining the armed forces.
22. This individual was not eligible for the interview and became main family nonresponse because the Head or Wife, whichever is sample, became institutionalized by entering an educational institution.
23. This individual was not eligible for the interview and became main family nonresponse because the Head or Wife, whichever is the sample member, became institutionalized by entering a health care facility.
24. This individual was not eligible for the interview and became main family nonresponse because the Head or Wife, whichever is the sample member, became institutionalized through imprisonment.
29. This individual was not eligible for the interview and became main family nonresponse because the Head or Wife, whichever is sample, became institutionalized by some means other than the above; for example, he/she may have entered a religious order. Cases in which the type of institution is unknown are included here, also.
31. This individual was unable to cooperate through disability.
32. This individual was not eligible for the interview and the Head or Wife, whichever is sample, was unable to cooperate through disability.
41. This individual died between the 1969 and 1970 interviews.
42. This individual was not eligible for the interview and became main family nonresponse because the Head or Wife, whichever is sample, died.
51. This individual, although followed for interview, was discovered to be nonsample: office error.
52. This individual should have been followed but was not: office error.
53. This individual was mistakenly included in two or more response families at once: this record is the duplicate, or erroneous, one.
59. Other office error
91. This sample individual moved out of the 1970 main family and was eligible for interviewing but the reason for nonresponse is NA.
92. Individual moved out of the 1970 main family and was not eligible for interviewing because he/she was either nonsample or too young.
97. This individual had not been born or moved in by the time of the 1970 interview (V30044>0000 and V30045=00)
98. This individual became main family or mover-out nonresponse by 1969 (V30020=0000 and V30044=0000 or V30020>0000 and V30021=71-89 and V30044=0000)

V30068 'INDIVIDUAL WEIGHT 70' TLOC= 19451-194521969 Individual Weight, Updated for 1970

This variable is nonzero only for sample members associated with a 1970 response family. Sample members born into the family in 1970 receive either the average of the Head's and spouse's weights or, in the event of a single Head, the child receives the Head's weight. Those sample members returning to a panel family after becoming nonresponse receive the same weight that they had in the last year that they had nonzero data. Refer to Section I, Part 5 of this volume for details on the weights themselves.

00. Individual was born or moved in after the 1970 interview (V30044>0000 and V30045=00); main family nonresponse by 1970 or mover-out nonresponse by 1969 (V30044=0000); nonsample individual (V30049=170-226)

1971 INDIVIDUAL VARIABLES: Distributions are calculated only for cases with nonzero data (V30070=01-89) using the 1971 weight (V30093) for the percents.

V30069 '1971 INTERVIEW NUMBER 71' TLOC= 19453-194561971 Interview Number (1971 ID Number)

The values for this variable in the range 0001-4840 represent the 1971 ID number of the interview in which this individual was included in 1971. Individuals moving in or born subsequent to the 1971 interview received the 1971 ID number of the family into which they moved.

0000. This individual was main family nonresponse by 1971 or mover-out nonresponse by 1970

V30070 'SEQUENCE NUMBER 71' TLOC= 19457-194581971 Sequence Number

V30089 'YR S/O FAM FORMED 71' TL0C= 19493-19494 MD=99

Year Splitoff Moved Out of Main Family Unit

The last two digits of the year the move occurred are coded here. For example, a value of 71 indicates a move during the year 1971. Refer to Section I, Part 5 of this volume for details of this variable's generation.

98. Moved out of an institution
 99. NA year
 00. Inap.; individual was born or moved in after the 1971 interview (V30069>0000 and V30070=00); main family nonresponse by 1971 or mover-out nonresponse by 1970 (V30069=0000); not a splitoff in 1971 (V30075≠1 or V30075=1 and V30076≠00)

V30090 'MAIN FAM ID FOR S/O 71' TL0C= 19495-19498

1971 ID Number of the Main Family from which this Individual's Splitoff Family Was Formed

Actual 1971 ID Numbers (0001-4840) were coded for individuals who moved out of main families or institutions to form splitoff families.

9997. This splitoff individual did not move out of a main family or institution, e.g., nonsample Heads, Wives or others who appeared for the first time in the 1971 splitoff family; children newly born in, etc.
 0000. Inap.; individual was born or moved in after the 1971 interview (V30069>0000 and V30070=00); main family nonresponse by 1971 or mover-out nonresponse by 1970 (V30069=0000); not a splitoff in 1971 (V30075≠1 or V30075=1 and V30076≠00)

V30091 'TYPE OF IND RECORD 71' TL0C= 19499-19500 MD=99

Type of Individual Data Record in 1971

All individuals who became main family nonresponse in 1971 have 1971 ID numbers equal to 0000 and zero data values for 1971, but have nonzero data values for their 1970 records. Mover-out nonresponse individuals for 1971 have nonzero data for 1971 just as response individuals do; however, the movers-out have 1971 sequence numbers in the range 51-89. Codes 01-04 below apply to main family nonresponse individuals only; codes 06-08 are reserved for mover-out nonresponse.

For case counts on this variable, please refer to Table 1 at the end of this tape code.

01. This sample member was 18 years old or older at the time of main family nonresponse and had been in the FU in 1970.
02. This sample member was less than 18 at the time of main family nonresponse and had been in the FU in 1970.
03. This nonsample individual had been in the 1970 FU, and this FU became nonresponse in 1971.
04. This sample member had been in an institution in 1970 but his or her main family became nonresponse in 1971.
05. This sample member, although connected with a 1971 response family, was in an institution at the time of the 1971 interview.
06. This sample individual was 18 years old or older and moved out or died between the 1970 and 1971 interviews.
07. This sample member was less than 18 and moved out or died between the 1970 and 1971 interviews.
08. This nonsample individual moved out or died between the 1970 and 1971 interviews.
09. This individual had not been born or moved in by the time of the 1971 interview.
10. This individual had become nonresponse by the time of the 1970 interview.
99. NA; DK
00. Inap.; this individual was in a panel family in 1971 (V30070=01-20).

V30092 'WHY NONRESPONSE 71' TL0C= 19501-19502 MD=99

Reason for NonFU Membership in 1971

Individuals ineligible for the interview consist of those who were too young (under 18 years old) or who are not sample members.

For case counts on this variable, please refer to Table 1 at the end of this tape code.

01. Refusal by all eligible/available FU members.
02. No-one at home for contact during the interviewing period.
03. Respondent absent; some FU member contacted, but not the appropriate respondent.
04. Lost; unable to locate any member of the FU at all.
05. FU is located too far away for interviewer contact.
11. This individual was in the armed forces.
12. This individual was in an educational institution.
13. This individual was in a health care facility
14. This individual was in jail or prison
19. This individual was in some other type of institution, for example, a religious order. Cases in which the type of institution is unknown are included here, also.
21. This individual was not eligible for the interview and the Head or the Wife, whichever is the sample member, became main family nonresponse because he/she was institutionalized by joining the armed forces.
22. This individual was not eligible for the interview and became main family nonresponse because the Head or Wife, whichever is sample, became institutionalized by entering an educational institution.
23. This individual was not eligible for the interview and became main family nonresponse because the Head or Wife, whichever is the sample member, became institutionalized by entering a health care facility.

370 - 1971 INDIVIDUAL DATA

24. This individual was not eligible for the interview and became main family nonresponse because the Head or Wife, whichever is the sample member, became institutionalized through imprisonment.
29. This individual was not eligible for the interview and became main family nonresponse because the Head or Wife, whichever is sample, became institutionalized by some means other than the above; for example, he/she may have entered a religious order. Cases in which the type of institution is unknown are included here, also.
31. This individual was unable to cooperate through disability.
32. This individual was not eligible for the interview and the Head or Wife, whichever is sample, was unable to cooperate through disability.
41. This individual died between the 1970 and 1971 interviews.
42. This individual was not eligible for the interview and became main family nonresponse because the Head or Wife, whichever is sample, died.
51. This individual, although followed for interview, was discovered to be nonsample: office error.
52. This individual should have been followed but was not: office error.
53. This individual was mistakenly included in two or more response families at once; this record is the duplicate, or erroneous, one.
59. Other office error
91. This sample individual moved out of the 1971 main family and was eligible for interviewing but the reason for nonresponse is NA.
92. Individual moved out of the 1971 main family and was not eligible for interviewing because he/she was either nonsample or too young.
97. This individual had not been born or moved in by the time of the 1971 interview (V30069>0000 and V30070=00)
98. This individual became main family or mover-out nonresponse by 1970 (V30044=0000 and V30069=0000 or V30044>0000 and V30045=71-89 and V30069=0000)
99. NA; DK
00. Inap.: this individual was in a panel family.

V30093 'INDIVIDUAL WEIGHT 71' TLOC= 19503-19504

1969 Individual Weight, Updated for 1971

This variable is nonzero only for sample members associated with a 1971 panel family. Sample members born into the family in 1971 receive either the average of the Head's and spouse's weights or, in the event of a single Head, the child receives the Head's weight. Those sample members returning to a panel family after becoming nonresponse receive the same weight that they had in the last year that they had nonzero data. Refer to Section I, Part 5 of this volume for details on the weights themselves.

00. Individual was born or moved in after the 1971 interview (V30069>0000 and V30070=00); main family nonresponse by 1971 or mover-out nonresponse by 1970 (V30069=0000); nonsample individual (V30074=170-226)

1972 INDIVIDUAL VARIABLES: Distributions are calculated only for cases with nonzero data (V30095=01-89) using the 1972 weight (V30120) for the percents.

V30094 '1972 INTERVIEW NUMBER 72' TLOC= 19505-19508

1972 Interview Number (1972 ID Number)

The values for this variable in the range 0001-5060 represent the 1972 ID number of the interview in which this individual was included in 1972.

Individuals moving in or born subsequent to the 1972 interview received the 1972 ID number of the family into which they moved.

0000. This individual was main family nonresponse by 1972 or mover-out nonresponse by 1971

V30095 'SEQUENCE NUMBER 72' TLOC= 19509-19510

1972 Sequence Number

This sequence number variable provides a means of identifying an individual's status with regard to the FU at the time of the 1972 interview.

17,336	96.5	01-20.	Individuals in the family at the time of the 1972 interview

V30116 'YR S/O FAM FORMED 72' TL0C= 19548-19549 MD=99

Year Splitoff Moved Out of Main Family Unit

The last two digits of the year the move occurred are coded here. For example, a value of 72 indicates a move during the year 1972. Refer to Section I, Part 5 of this volume for details of this variable's generation.

98.	Moved out of an institution
99.	NA year
00.	Inap.; individual was born or moved in after the 1972 interview (V30094>0000 and V30095=00); main family nonresponse by 1972 or mover-out nonresponse by 1971 (V30094=0000); not a splitoff in 1972 (V30100≠1 or V30100=1 and V30101≠00)

V30117 'MAIN FAM ID FOR S/O 72' TL0C= 19550-19553

1972 ID Number of the Main Family from which this Individual's Splitoff Family Was Formed

Actual 1972 ID Numbers (0001-5060) were coded for individuals who moved out of main families or institutions to form splitoff families.

9997.	This splitoff individual did not move out of a main family or institution, e.g., nonsample Heads, Wives or others who appeared for the first time in the 1972 splitoff family; children newly born in, etc.
0000.	Inap.; individual was born or moved in after the 1972 interview (V30094>0000 and V30095=00); main family nonresponse by 1972 or mover-out nonresponse by 1971 (V30094=0000); not a splitoff in 1972 (V30100≠1 or V30100=1 and V30101≠00)

V30118 'TYPE OF IND RECORD 72' TL0C= 19554-19555 MD=99

Type of Individual Data Record in 1972

All individuals who became main family nonresponse in 1972 have 1972 ID numbers equal to 0000 and zero data values for 1972, but have nonzero data values for their 1971 records. Mover-out nonresponse individuals for 1972 have nonzero data for 1972 just as response individuals do; however, the

movers-out have 1972 sequence numbers in the range 51-89. Codes 01-04 below apply to main family nonresponse individuals only; codes 06-08 are reserved for mover-out nonresponse.

For case counts on this variable, please refer to Table 1 at the end of this tape code.

01. This sample member was 18 years old or older at the time of main family nonresponse and had been in the FU in 1971.
02. This sample member was less than 18 at the time of main family nonresponse and had been in the FU in 1971.
03. This nonsample individual had been in the 1971 FU, and this FU became nonresponse in 1972.
04. This sample member had been in an institution in 1971 but his or her main family became nonresponse in 1972.
05. This sample member, although connected with a 1972 response family, was in an institution at the time of the 1972 interview.
06. This sample individual was 18 years old or older and moved out or died between the 1971 and 1972 interviews.
07. This sample member was less than 18 and moved out or died between the 1971 and 1972 interviews.
08. This nonsample individual moved out or died between the 1971 and 1972 interviews.
09. This individual had not been born or moved in by the time of the 1972 interview.
10. This individual had become nonresponse by the time of the 1971 interview.
99. NA; DK
00. Inap.; this individual was in a panel family in 1972 (V30095=01-20).

V30119 'WHY NONRESPONSE 72' TLOC= 19556-19557 MD=99

Reason for NonFU Membership in 1972

Individuals ineligible for the interview consist of those who were too young (under 18 years old) or who are not sample members.

For case counts on this variable, please refer to Table 1 at the end of this tape code.

01. Refusal by all eligible/available FU members.
02. No-one at home for contact during the interviewing period.
03. Respondent absent; some FU member contacted, but not the appropriate respondent.
04. Lost; unable to locate any member of the FU at all.
05. FU is located too far away for interviewer contact.
11. This individual was in the armed forces.
12. This individual was in an educational institution.
13. This individual was in a health care facility
14. This individual was in jail or prison
19. This individual was in some other type of institution, for example, a religious order. Cases in which the type of institution is unknown are included here, also.
21. This individual was not eligible for the interview and the Head or the Wife, whichever is the sample member, became main family nonresponse because he/she was institutionalized by joining the armed forces.
22. This individual was not eligible for the interview and became main family nonresponse because the Head or Wife, whichever is sample, became institutionalized by entering an educational institution.
23. This individual was not eligible for the interview and became main family nonresponse because the Head or Wife, whichever is the sample member, became institutionalized by entering a health care facility.
24. This individual was not eligible for the interview and became main family nonresponse because the Head or Wife, whichever is the sample member, became institutionalized through imprisonment.

378 - 1972 INDIVIDUAL DATA

- 29. This individual was not eligible for the interview and became main family nonresponse because the Head or Wife, whichever is sample, became institutionalized by some means other than the above; for example, he/she may have entered a religious order. Cases in which the type of institution is unknown are included here, also.
- 31. This individual was unable to cooperate through disability.
- 32. This individual was not eligible for the interview and the Head or Wife, whichever is sample, was unable to cooperate through disability.
- 41. This individual died between the 1971 and 1972 interviews.
- 42. This individual was not eligible for the interview and became main family nonresponse because the Head or Wife, whichever is sample, died.
- 51. This individual, although followed for interview, was discovered to be nonsample: office error.
- 52. This individual should have been followed but was not: office error.
- 53. This individual was mistakenly included in two or more response families at once; this record is the duplicate, or erroneous, one.
- 59. Other office error
- 91. This sample individual moved out of the 1972 main family and was eligible for interviewing but the reason for nonresponse is NA.
- 92. Individual moved out of the 1972 main family and was not eligible for interviewing because he/she was either nonsample or too young.
- 97. This individual had not been born or moved in by the time of the 1972 interview (V30094>0000 and V30095=00)
- 98. This individual became main family or mover-out nonresponse by 1971 (V30069=0000 and V30094=0000 or V30069>0000 and V30070=71-89 and V30094=0000)
- 99. NA; DK
- 00. Inap.; this individual was in a panel family in 1972.

V30120 'INDIVIDUAL WEIGHT 72' TLOC= 19558-19559

1969 Individual Weight, Updated for 1972

This variable is nonzero only for sample members associated with a 1972 panel family. Sample members born into the family in 1972 receive either the average of the Head's and spouse's weights or, in the event of a single head, the child receives the Head's weight. Those sample members returning to a panel family after becoming nonresponse receive the same weight that they had in the last year that they had nonzero data. Refer to Section I, Part 5 of this volume for details on the weights themselves.

- 00. Individual was born or moved in after the 1972 interview (V30094>0000 and V30095=00); main family nonresponse by 1972 or mover-out nonresponse by 1971 (V30094=0000); nonsample individual (V30099=170-226)

1973 INDIVIDUAL VARIABLES: Distributions are calculated only for cases with nonzero data (V30122=01-89) using the 1973 weight (V30142) for the percents.

V30121 '1973 INTERVIEW NUMBER 73' TLOC= 19560-19563

1973 Interview Number (1973 ID Number)

The values for this variable in the range 0001-5285 represent the 1973 ID number of the interview in which this individual was included in 1973. Individuals moving in or born subsequent to the 1973 interview received the 1973 ID number of the family into which they moved.

- 0000. This individual was main family nonresponse by 1973 or mover-out nonresponse by 1972

V30122 'SEQUENCE NUMBER 73' TLOC= 19564-19565

V30139 'MAIN FAM ID FOR S/O 73' TL0C= 19599-19602

1973 ID Number of the Main Family from which this Individual's Splitoff Family Was Formed

Actual 1973 ID Numbers (0001-5285) were coded for individuals who moved out of main families or institutions to form splitoff families.

- 9997. This splitoff individual did not move out of a main family or institution, e.g., nonsample Heads, Wives or others who appeared for the first time in the 1973 splitoff family; children newly born in, etc.
- 0000. Inap.; individual was born or moved in after the 1973 interview (V30121>0000 and V30122=00); main family nonresponse by 1973 or mover-out nonresponse by 1972 (V30121=0000); not a splitoff in 1973 (V30127≠1 or V30127=1 and V30128≠00)

V30140 'TYPE OF IND RECORD 73' TL0C= 19603-19604 MD=99

Type of Individual Data Record in 1973

All individuals who became main family nonresponse in 1973 have 1973 ID numbers equal to 0000 and zero data values for 1973, but have nonzero data values for their 1972 records. Mover-out nonresponse individuals for 1973 have nonzero data for 1973 just as response individuals do; however, the movers-out have 1973 sequence numbers in the range 51-89. Codes 01-04 below apply to main family nonresponse individuals only; codes 06-08 are reserved for mover-out nonresponse.

For case counts on this variable, please refer to Table 1 at the end of this tape code.

- 01. This sample member was 18 years old or older at the time of main family nonresponse and had been in the FU in 1972.
- 02. This sample member was less than 18 at the time of main family nonresponse and had been in the FU in 1972.
- 03. This nonsample individual had been in the 1972 FU, and this FU became nonresponse in 1973.
- 04. This sample member had been in an institution in 1972 but his or her main family became nonresponse in 1973.

- 05. This sample member, although connected with a 1973 response family, was in an institution at the time of the 1973 interview.
- 06. This sample individual was 18 years old or older and moved out or died between the 1972 and 1973 interviews.
- 07. This sample member was less than 18 and moved out or died between the 1972 and 1973 interviews.
- 08. This nonsample individual moved out or died between the 1972 and 1973 interviews.
- 09. This individual had not been born or moved in by the time of the 1973 interview.
- 10. This individual had become nonresponse by the time of the 1972 interview.
- 99. NA; DK
- 00. Inap.; this individual was in a panel family in 1973 (V30122=01-20).

V30141 'WHY NONRESPONSE 73' TLDC= 19605-19606 MD=99

Reason for NonFU Membership in 1973

Individuals ineligible for the interview consist of those who were too young (under 18 years old) or who are not sample members.

For case counts on this variable, please refer to Table 1 at the end of this tape code.

- 01. Refusal by all eligible/available FU members.
- 02. No-one at home for contact during the interviewing period.
- 03. Respondent absent; some FU member contacted, but not the appropriate respondent.
- 04. Lost; unable to locate any member of the FU at all.
- 05. FU is located too far away for interviewer contact.
- 11. This individual was in the armed forces.
- 12. This individual was in an educational institution.
- 13. This individual was in a health care facility
- 14. This individual was in jail or prison
- 19. This individual was in some other type of institution, for example, a religious order. Cases in which the type of institution is unknown are included here, also.
- 21. This individual was not eligible for the interview and the Head or the Wife, whichever is the sample member, became main family nonresponse because he/she was institutionalized by joining the armed forces.
- 22. This individual was not eligible for the interview and became main family nonresponse because the Head or Wife, whichever is sample, became institutionalized by entering an educational institution.
- 23. This individual was not eligible for the interview and became main family nonresponse because the Head or Wife, whichever is the sample member, became institutionalized by entering a health care facility.
- 24. This individual was not eligible for the interview and became main family nonresponse because the Head or Wife, whichever is the sample member, became institutionalized through imprisonment.
- 29. This individual was not eligible for the interview and became main family nonresponse because the Head or Wife, whichever is sample, became institutionalized by some means other than the above; for example, he/she may have entered a religious order. Cases in which the type of institution is unknown are included here, also.
- 31. This individual was unable to cooperate through disability.
- 32. This individual was not eligible for the interview and the Head or Wife, whichever is sample, was unable to cooperate through disability.
- 41. This individual died between the 1972 and 1973 interviews.
- 42. This individual was not eligible for the interview and became main family nonresponse because the Head or Wife, whichever is sample, died.

51. This individual, although followed for interview, was discovered to be nonsample: office error.
52. This individual should have been followed but was not: office error.
53. This individual was mistakenly included in two or more response families at once; this record is the duplicate, or erroneous, one.
59. Other office error
91. This sample individual moved out of the 1973 main family and was eligible for interviewing but the reason for nonresponse is NA.
92. Individual moved out of the 1973 main family and was not eligible for interviewing because he/she was either nonsample or too young.
97. This individual had not been born or moved in by the time of the 1973 interview (V30121>0000 and V30122=00)
98. This individual became main family or mover-out nonresponse by 1972 (V30094=0000 and V30121=0000 or V30094>0000 and V30095=71-89 and V30121=0000)
99. NA; DK
00. Inap.; this individual was in a panel family in 1973.

V30142 'INDIVIDUAL WEIGHT 73' TLOC= 19607-19608

1969 Individual Weight, Updated for 1973

This variable is nonzero only for sample members associated with a 1973 panel family. Sample members born into the family in 1973 receive either the average of the Head's and spouse's weights or, in the event of a single Head, the child receives the Head's weight. Those sample members returning to a panel family after becoming nonresponse receive the same weight that they had in the last year that they had nonzero data. Refer to Section I, Part 5 of this volume for details on the weights themselves.

00. Individual was born or moved in after the 1973 interview (V30121>0000 and V30122=00); main family nonresponse by 1973 or mover-out nonresponse by 1972 (V30121=0000); nonsample individual (V30126=170-226)

1974 INDIVIDUAL VARIABLES: Distributions are calculated only for cases with nonzero data (V30144=01-89) using the 1974 weight (V30165) for the percents.

V30143 '1974 INTERVIEW NUMBER 74' TLOC= 19609-19612

1974 Interview Number (1974 ID Number)

The values for this variable in the range 0001-5517 represent the 1974 ID number of the interview in which this individual was included in 1974. Individuals moving in or born subsequent to the 1974 interview received the 1974 ID number of the family to which they moved.

0000. This individual was main family nonresponse by 1974 or mover-out nonresponse by 1973

V30144 'SEQUENCE NUMBER 74' TLOC= 19613-19614

V30161 'YR S/O FAM FORMED 74' TL0C= 19647-19648 MD=99

Year Splitoff Moved Out of Main Family Unit

The last two digits of the year the move occurred are coded here. For example, a value of 74 indicates a move during the year 1974. Refer to Section I, Part 5 of this volume for details of this variable's generation.

- 98. Moved out of an institution
- 99. NA year
- 00. Inap.; individual was born or moved in after the 1974 interview (V30143>0000 and V30144=00); main family nonresponse by 1974 or mover-out nonresponse by 1973 (V30143=0000); not a splitoff in 1974 (V30149≠1 or V30149=1 and V30150≠00)

V30162 'MAIN FAM ID FOR S/O 74' TL0C= 19649-19652

1974 ID Number of the Main Family from which this Individual's Splitoff Family Was Formed

Actual 1974 ID Numbers (0001-5517) were coded for individuals who moved out of main families or institutions to form splitoff families.

- 9997. This splitoff individual did not move out of a main family or institution, e.g., nonsample Heads, Wives or others who appeared for the first time in the 1974 splitoff family; children newly born in, etc.
- 0000. Inap.; individual was born or moved in after the 1974 interview (V30143>0000 and V30144=00); main family nonresponse by 1974 or mover-out nonresponse by 1973 (V30143=0000); not a splitoff in 1974 (V30149≠1 or V30149=1 and V30150≠00)

V30163 'TYPE OF IND RECORD 74' TL0C= 19653-19654 MD=99

Type of Individual Data Record in 1974

All individuals who became main family nonresponse in 1974 have 1974 ID numbers equal to 0000 and zero data values for 1974, but have nonzero data values for their 1973 records. Mover-out nonresponse individuals for 1974 have nonzero data for 1974 just as response individuals do; however, the movers-out have 1974 sequence numbers in the range 51-89. Codes 01-04 below apply to main family nonresponse individuals only; codes 06-08 are reserved for mover-out nonresponse.

For case counts on this variable, please refer to Table 1 at the end of this tape code.

- 01. This sample member was 18 years old or older at the time of main family nonresponse and had been in the FU in 1973.
- 02. This sample member was less than 18 at the time of main family nonresponse and had been in the FU in 1973.
- 03. This nonsample individual had been in the 1973 FU, and this FU became nonresponse in 1974.
- 04. This sample member had been in an institution in 1973 but his or her main family became nonresponse in 1974.

- 05. This sample member, although connected with a 1974 response family, was in an institution at the time of the 1974 interview.
- 06. This sample individual was 18 years old or older and moved out or died between the 1973 and 1974 interviews.
- 07. This sample member was less than 18 and moved out or died between the 1973 and 1974 interviews.
- 08. This nonsample individual moved out or died between the 1973 and 1974 interviews.
- 09. This individual had not been born or moved in by the time of the 1974 interview.
- 10. This individual had become nonresponse by the time of the 1973 interview.
- 99. NA; DK
- 00. Inap.; this individual was in a panel family in 1974 (V30144=01-20).

V30164 'WHY NONRESPONSE 74' TLOC= 19655-19656 MD=99

Reason for NonFU Membership in 1974

Individuals ineligible for the interview consist of those who were too young (under 18 years old) or who are not sample members.

For case counts on this variable, please refer to Table 1 at the end of this tape code.

- 01. Refusal by all eligible/available FU members.
- 02. No-one at home for contact during the interviewing period.
- 03. Respondent absent; some FU member contacted, but not the appropriate respondent.
- 04. Lost; unable to locate any member of the FU at all.
- 05. FU is located too far away for interviewer contact.
- 11. This individual was in the armed forces.
- 12. This individual was in an educational institution.
- 13. This individual was in a health care facility
- 14. This individual was in jail or prison
- 19. This individual was in some other type of institution, for example, a religious order. Cases in which the type of institution is unknown are included here, also.
- 21. This individual was not eligible for the interview and the Head or the Wife, whichever is the sample member, became main family nonresponse because he/she was institutionalized by joining the armed forces.
- 22. This individual was not eligible for the interview and became main family nonresponse because the Head or Wife, whichever is sample, became institutionalized by entering an educational institution.
- 23. This individual was not eligible for the interview and became main family nonresponse because the Head or Wife, whichever is the sample member, became institutionalized by entering a health care facility.
- 24. This individual was not eligible for the interview and became main family nonresponse because the Head or Wife, whichever is the sample member, became institutionalized through imprisonment.
- 29. This individual was not eligible for the interview and became main family nonresponse because the Head or Wife, whichever is sample, became institutionalized by some means other than the above; for example, he/she may have entered a religious order. Cases in which the type of institution is unknown are included here, also.
- 31. This individual was unable to cooperate through disability.
- 32. This individual was not eligible for the interview and the Head or Wife, whichever is sample, was unable to cooperate through disability.
- 41. This individual died between the 1973 and 1974 interviews.
- 42. This individual was not eligible for the interview and became main family nonresponse because the Head or Wife, whichever is sample, died.

- 51. This individual, although followed for interview, was discovered to be nonsample: office error.
- 52. This individual should have been followed but was not: office error.
- 53. This individual was mistakenly included in two or more response families at once; this record is the duplicate, or erroneous, one.
- 59. Other office error
- 91. This sample individual moved out of the 1974 main family and was eligible for interviewing but the reason for nonresponse is NA.
- 92. Individual moved out of the 1974 main family and was not eligible for interviewing because he/she was either nonsample or too young.
- 97. This individual had not been born or moved in by the time of the 1974 interview (V30143>0000 and V30144=00)
- 98. This individual became main family or mover-out nonresponse by 1973 (V30121=0000 and V30143=0000 or V30121>0000 and V30122=71-89 and V30143=0000)
- 99. NA; DK
- 00. Inap.; this individual was in a panel family in 1974.

V30165 'INDIVIDUAL WEIGHT 74' TLOC= 19657-19658

1974 Individual Weight

This variable is nonzero only for sample members associated with a 1974 response family. Sample members born into the family in 1974 receive either the average of the Head's and spouse's weights or, in the event of a single Head, the child receives the Head's weight. For those sample members either not yet part of the family in 1969 but present by 1973 or who were main family nonresponse in 1969 and moved back into the panel in 1973, the most recent weight is brought forward to these tape locations. Refer to Section I, Part 5 of this volume for details on the weights themselves.

- 00. Individual was born or moved in after the 1974 interview (V30143>0000 and V30144=00); main family nonresponse by 1974 or mover-out nonresponse by 1973 (V30143=0000); nonsample individual (V30148=170-226)

1975 INDIVIDUAL VARIABLES: Distributions are calculated only for cases with nonzero data (V30167=01-89) using the 1975 weight (V30195) for the percents.

V30166 '1975 INTERVIEW NUMBER 75' TLOC= 19659-19662

1975 Interview Number (1975 ID Number)

The values for this variable in the range 0001-5725 represent the 1975 ID number of the interview in which this individual was included in 1975. Individuals moving in or born subsequent to the 1975 interview received the 1975 ID number of the family to which they moved.

- 0000. This individual was main family nonresponse by 1975 or mover-out nonresponse by 1974

V30167 'SEQUENCE NUMBER 75' TLOC= 19663-19664

1975 Sequence Number

This sequence number variable provides a means of identifying an individual's status with regard to the FU at the time of the 1975 interview.

- | | | | |

V30189 'COMPLETED EDUCATION 75' TLOC= 19707-19708 MD=99

Education Completed by 1975

398 - 1975 INDIVIDUAL DATA

The values for this variable represent final educational levels attained by each individual who stopped going to school as indicated in Section A of all interviews through the 1975 wave, as well as those of the 1975 Head and Wife from Section K of the 1975 interview. A code value of 08 here indicates that the individual completed the eighth grade and was no longer attending school. A value of 16 indicates that the individual is at least a college graduate.

- 96. Twenty-four years old or younger in 1975 and in school from 1968 through 1975
- 97. Less than 12 years of age in 1975 and either not in the family or preschool age in 1968 and has never stopped school
- 98. Age is at least 12 but no more than 24 and neither in school nor preschool age in 1968 and has never stopped school
- 99. Attended school in 1968 and turned 25 between 1969 and 1975 and had not stopped school by 25; mover-in who was 25 or older in 1975; age in 1975 was NA; other NA

V30192 'MAIN FAM ID FOR S/O 75' TLOC= 19713-19716

1975 ID Number of the Main Family from which this Individual's Splitoff Family Was Formed

Actual 1975 ID Numbers (0001-5725) were coded for individuals who moved out of main families or institutions to form splitoff families.

- 9997. This splitoff individual did not move out of a main family or institution, e.g., nonsample Heads, Wives or others who appeared for the first time in the 1975 splitoff family; children newly born in, etc.
- 0000. Inap.; individual was born or moved in after the 1975 interview (V30166>0000 and V30167=00); main family nonresponse by 1975 or mover-out nonresponse by 1974 (V30166=0000); not a splitoff in 1975 (V30173≠1 or V30173=1 and V30174≠00)

V30193 'TYPE OF IND RECORD 75' TL0C= 19717-19718 MD=99

Type of Individual Data Record in 1975

All individuals who became main family nonresponse in 1975 have 1975 ID numbers equal to 0000 and zero data values for 1975, but have nonzero data values for their 1974 records. Mover-out nonresponse individuals for 1975 have nonzero data for 1975 just as response individuals do; however, the movers-out have 1975 sequence numbers in the range 51-89. Codes 01-04 below apply to main family nonresponse individuals only; codes 06-08 are reserved for mover-out nonresponse.

For case counts on this variable, please refer to Table 1 at the end of this tape code.

- 01. This sample member was 18 years old or older at the time of main family nonresponse and had been in the FU in 1974.
- 02. This sample member was less than 18 at the time of main family nonresponse and had been in the FU in 1974.
- 03. This nonsample individual had been in the 1974 FU, and this FU became nonresponse in 1975.
- 04. This sample member had been in an institution in 1974 but his or her main family became nonresponse in 1975.
- 05. This sample member, although connected with a 1975 response family, was in an institution at the time of the 1975 interview.
- 06. This sample individual was 18 years old or older and moved out or died between the 1974 and 1975 interviews.
- 07. This sample member was less than 18 and moved out or died between the 1974 and 1975 interviews.
- 08. This nonsample individual moved out or died between the 1974 and 1975 interviews.
- 09. This individual had not been born or moved in by the time of the 1975 interview.
- 10. This individual had become nonresponse by the time of the 1974 interview.
- 99. NA; DK
- 00. Inap.; this individual was in a panel family in 1975 (V30167=01-20).

V30194 'WHY NONRESPONSE 75' TL0C= 19719-19720 MD=99

Reason for NonFU Membership in 1975

Individuals ineligible for the interview consist of those who were too young (under 18 years old) or who are not sample members.

For case counts on this variable, please refer to Table 1 at the end of this tape code.

- 01. Refusal by all eligible/available FU members.
- 02. No-one at home for contact during the interviewing period.
- 03. Respondent absent; some FU member contacted, but not the appropriate respondent.
- 04. Lost; unable to locate any member of the FU at all.
- 05. FU is located too far away for interviewer contact.
- 11. This individual was in the armed forces.
- 12. This individual was in an educational institution.

13. This individual was in a health care facility
14. This individual was in jail or prison
19. This individual was in some other type of institution, for example, a religious order. Cases in which the type of institution is unknown are included here, also.
21. This individual was not eligible for the interview and the Head or the Wife, whichever is the sample member, became main family nonresponse because he/she was institutionalized by joining the armed forces.
22. This individual was not eligible for the interview and became main family nonresponse because the Head or Wife, whichever is sample, became institutionalized by entering an educational institution.
23. This individual was not eligible for the interview and became main family nonresponse because the Head or Wife, whichever is the sample member, became institutionalized by entering a health care facility.
24. This individual was not eligible for the interview and became main family nonresponse because the Head or Wife, whichever is the sample member, became institutionalized through imprisonment.
29. This individual was not eligible for the interview and became main family nonresponse because the Head or Wife, whichever is sample, became institutionalized by some means other than the above; for example, he/she may have entered a religious order. Cases in which the type of institution is unknown are included here, also.
31. This individual was unable to cooperate through disability.
32. This individual was not eligible for the interview and the Head or Wife, whichever is sample, was unable to cooperate through disability.
41. This individual died between the 1974 and 1975 interviews.
42. This individual was not eligible for the interview and became main family nonresponse because the Head or Wife, whichever is sample, died.
51. This individual, although followed for interview, was discovered to be nonsample: office error.
52. This individual should have been followed but was not: office error.
53. This individual was mistakenly included in two or more response families at once; this record is the duplicate, or erroneous, one.
59. Other office error
91. This sample individual moved out of the 1975 main family and was eligible for interviewing but the reason for nonresponse is NA.
92. Individual moved out of the 1975 main family and was not eligible for interviewing because he/she was either nonsample or too young.
97. This individual had not been born or moved in by the time of the 1975 interview (V30166>0000 and V30167=00)
98. This individual became main family or mover-out nonresponse by 1974 (V30143=0000 and V30166=0000 or V30143>0000 and V30144=71-89 and V30166=0000)

V30195 'UPDATED 1972 IND WT 75' TLOC= 19721-19722

1974 Individual Weight, Updated for 1975

This variable is nonzero only for sample members associated with a 1975 panel family. Sample members born into the family in 1975 receive either the average of the Head's and spouse's weights or, in the event of a single Head, the child receives the Head's weight. Those sample members returning to a panel family after becoming nonresponse receive the same weight that they had in the last year that they had nonzero data. Refer to Section I, Part 5 for details on the weights themselves.

00. Individual was born or moved in after the 1975 interview (V30166>0000 and V30167=00); main family nonresponse by 1975 or mover-out nonresponse by 1974 (V30166=0000); nonsample individual (V30171=170-226)

1976 INDIVIDUAL VARIABLES: Distributions are calculated only for cases with nonzero data (V30197=01-89) using the 1976 weight (V30226) for the percents.

V30226 'INDIVIDUAL WEIGHT 76' TLOC= 19786-19787

1974 Individual Weight, Updated for 1976

This variable is nonzero only for sample members associated with a 1976 panel family. Sample members born into the family in 1976 receive either the average of the Head's and spouse's weights or, in the event of a single Head, the child receives the Head's weight. Those sample members returning to a panel family after becoming nonresponse receive the same weight that they had in the last year that they had nonzero data. Refer to Section I, Part 5 for details on the weights themselves.

00. Individual was born or moved in after the 1976 interview (V30196>0000 and V30197=00); main family nonresponse by 1976 or mover-out nonresponse by 1975 (V30196=0000); nonsample individual (V30201=170-226)

1977 INDIVIDUAL VARIABLES: Distributions are calculated only for cases with nonzero data (V30228=01-89) using the 1977 weight (V30257) for the percents.

V30227 '1977 INTERVIEW NUMBER 77' TLOC= 19788-19791

1977 Interview Number (1977 ID Number)

The values for this variable in the range 0001-6007 represent the 1977 ID number of the interview in which this individual was included in 1977. Individuals moving in or born subsequent to the 1977 interview received the 1977 ID number of the family to which they moved.

0000. This individual was main family nonresponse by 1977 or mover-out nonresponse by 1976

V30228 'SEQUENCE NUMBER 77' TLOC= 19792-19793

V30253 'YR S/D FAM FORMED 77' TL0C= 19842-19843 MD=99

Year Splitoff Moved Out of Main Family Unit

The last two digits of the year the move occurred are coded here. For example, a value of 77 indicates a move during the year 1977. Refer to Section I, Part 5 of this volume for details of this variable's generation.

- 98. Moved out of an institution
- 99. NA year
- 00. Inap.; individual was born or moved in after the 1977 interview (V30227>0000 and V30228=00); main family nonresponse by 1977 or mover-out nonresponse by 1976 (V30227=0000); not a splitoff in 1977 (V30234≠1 or V30234=1 and V30235≠00)

V30254 'MAIN FAM ID FOR S/O 77' TLOC= 19844-19847

1977 ID Number of the Main Family from which this Individual's Splitoff Family Was Formed

Actual 1977 ID Numbers (0001-6007) were coded for individuals who moved out of main families or institutions to form splitoff families.

- 9997. This splitoff individual did not move out of a main family or institution, e.g., nonsample Heads, Wives or others who appeared for the first time in the 1977 splitoff family; children newly born in, etc.
- 0000. Inap.; individual was born or moved in after the 1977 interview (V30227>0000 and V30228=00); main family nonresponse by 1977 or mover-out nonresponse by 1976 (V30227=0000); not a splitoff in 1977 (V30234≠1 or V30234=1 and V30235≠00)

V30255 'TYPE OF IND RECORD 77' TLOC= 19848-19849 MD=99

Type of Individual Data Record in 1977

All individuals who became main family nonresponse in 1977 have 1977 ID numbers equal to 0000 and zero data values for 1977, but have nonzero data values for their 1976 records. Mover-out nonresponse individuals for 1977 have nonzero data for 1977 just as response individuals do; however, the movers-out have 1977 sequence numbers in the range 51-89. Codes 01-04 below apply to main family nonresponse individuals only; codes 06-08 are reserved for mover-out nonresponse.

For case counts on this variable, please refer to Table 1 at the end of this tape code.

- 01. This sample member was 18 years old or older at the time of main family nonresponse and had been in the FU in 1976.
- 02. This sample member was less than 18 at the time of main family nonresponse and had been in the FU in 1976.
- 03. This nonsample individual had been in the 1976 FU, and this FU became nonresponse in 1977.
- 04. This sample member had been in an institution in 1976 but his or her main family became nonresponse in 1977.
- 05. This sample member, although connected with a 1977 response family, was in an institution at the time of the 1977 interview.
- 06. This sample individual was 18 years old or older and moved out or died between the 1976 and 1977 interviews.
- 07. This sample member was less than 18 and moved out or died between the 1976 and 1977 interviews.
- 08. This nonsample individual moved out or died between the 1976 and 1977 interviews.
- 09. This individual had not been born or moved in by the time of the 1977 interview.
- 10. This individual had become nonresponse by the time of the 1976 interview.
- 99. NA; DK

00. Inap.; this individual was in a panel family in 1977
(V30228=01-20).

V30256 'WHY NONRESPONSE 77' TLOC= 19850-19851 MD=99

Reason for NonFU Membership in 1977

Individuals ineligible for the interview consist of those who were too young (under 18 years old) or who are not sample members.

For case counts on this variable, please refer to Table 1 at the end of this tape code.

01. Refusal by all eligible/available FU members.
02. No-one at home for contact during the interviewing period.
03. Respondent absent; some FU member contacted, but not the appropriate respondent.
04. Lost; unable to locate any member of the FU at all.
05. FU is located too far away for interviewer contact.
11. This individual was in the armed forces.
12. This individual was in an educational institution.
13. This individual was in a health care facility
14. This individual was in jail or prison
19. This individual was in some other type of institution, for example, a religious order. Cases in which the type of institution is unknown are included here, also.
21. This individual was not eligible for the interview and the Head or the Wife, whichever is the sample member, became main family nonresponse because he/she was institutionalized by joining the armed forces.
22. This individual was not eligible for the interview and became main family nonresponse because the Head or Wife, whichever is sample, became institutionalized by entering an educational institution.
23. This individual was not eligible for the interview and became main family nonresponse because the Head or Wife, whichever is the sample member, became institutionalized by entering a health care facility.
24. This individual was not eligible for the interview and became main family nonresponse because the Head or Wife, whichever is the sample member, became institutionalized through imprisonment.
29. This individual was not eligible for the interview and became main family nonresponse because the Head or Wife, whichever is sample, became institutionalized by some means other than the above; for example, he/she may have entered a religious order. Cases in which the type of institution is unknown are included here, also.
31. This individual was unable to cooperate through disability.
32. This individual was not eligible for the interview and the Head or Wife, whichever is sample, was unable to cooperate through disability.
41. This individual died between the 1976 and 1977 interviews.
42. This individual was not eligible for the interview and became main family nonresponse because the Head or Wife, whichever is sample, died.
51. This individual, although followed for interview, was discovered to be nonsample: office error.
52. This individual should have been followed but was not: office error.
53. This individual was mistakenly included in two or more response families at once; this record is the duplicate, or erroneous, one.
59. Other office error
91. This sample individual moved out of the 1977 main family and was eligible for interviewing but the reason for nonresponse is NA.
92. Individual moved out of the 1977 main family and was not eligible for interviewing because he/she was either nonsample or too young.

97. This individual had not been born or moved in by the time of the 1977 interview (V30227>0000 and V30228=00)
98. This individual became main family or mover-out nonresponse by 1976 (V30196=0000 and V30227=0000 or V30196>0000 and V30197=71-89 and V30227=0000)
99. NA; DK
00. Inap.; this individual was in a panel family in 1977.

V30257 'UPDATD 1972 IND WT 77' TLOC= 19852-198531974 Individual Weight, Updated for 1977

This variable is nonzero only for sample members associated with a 1977 panel family. Sample members born into the family in 1977 receive either the average of the Head's and spouse's weights or, in the event of a single Head, the child receives the Head's weight. Those sample members returning to a panel family after becoming nonresponse receive the same weight that they had in the last year that they had nonzero data. Refer to Section I, Part 5 for details on the weights themselves.

00. Individual was born or moved in after the 1977 interview (V30227>0000 and V30228=00): main family nonresponse by 1977 or mover-out nonresponse by 1976 (V30227=0000); nonsample individual (V30232=170-226)

1978 INDIVIDUAL VARIABLES: Distributions are calculated only for cases with nonzero data (V30259=01-89) using the 1978 weight (V30296) for the percents.

V30258 '1978 INTERVIEW NUMBER 78' TLOC= 19854-198571978 Interview Number (1978 ID Number)

The values for this variable in the range 0001-6154 represent the 1978 ID number of the interview in which this individual was included in 1978. Individuals moving in or born subsequent to the 1978 interview received the 1978 ID number of the family to which they moved.

0000. This individual was main family nonresponse by 1978 or mover-out nonresponse by 1977

V30259 'SEQUENCE NUMBER 78' TLOC= 19858-198591978 Sequence Number

Actual 1978 ID Numbers (0001-6154) were coded for individuals who moved out of main families or institutions to form splitoff families.

- 9997. This splitoff individual did not move out of a main family or institution, e.g., nonsample Heads, Wives or others who appeared for the first time in the 1978 splitoff family; children newly born in, etc.
- 0000. Inap.; individual was born or moved in after the 1978 interview (V30258>0000 and V30259=00); main family nonresponse by 1978 or mover-out nonresponse by 1977 (V30258=0000); not a splitoff in 1978 (V30265≠1 or V30266≠00)

V30294 'TYPE OF IND RECORD 78' TL0C= 19923-19924 MD=99

Type of Individual Data Record in 1978

All individuals who became main family nonresponse in 1978 have 1978 ID numbers equal to 0000 and zero data values for 1978, but have nonzero data values for their 1977 records. Mover-out nonresponse individuals for 1978 have nonzero data for 1978 just as response individuals do; however, the movers-out have 1978 sequence numbers in the range 51-89. Codes 01-04 below apply to main family nonresponse individuals only; codes 06-08 are reserved for mover-out nonresponse.

For case counts on this variable, please refer to Table 1 at the end of this tape code.

- 01. This sample member was 18 years old or older at the time of main family nonresponse and had been in the FU in 1977.
- 02. This sample member was less than 18 at the time of main family nonresponse and had been in the FU in 1977.
- 03. This nonsample individual had been in the 1977 FU, and this FU became nonresponse in 1978.
- 04. This sample member had been in an institution in 1977 but his or her main family became nonresponse in 1978.
- 05. This sample member, although connected with a 1978 response family, was in an institution at the time of the 1978 interview.
- 06. This sample individual was 18 years old or older and moved out or died between the 1977 and 1978 interviews.
- 07. This sample member was less than 18 and moved out or died between the 1977 and 1978 interviews.
- 08. This nonsample individual moved out or died between the 1977 and 1978 interviews.

V30295 'WHY NONRESPONSE 78' TL0C= 19925-19926 MD=99

Reason for NonFU Membership in 1978

Individuals ineligible for the interview consist of those who were too young (under 18 years old) or who are not sample members.

For case counts on this variable, please refer to Table 1 at the end of this tape code.

- 01. Refusal by all eligible/available FU members.
- 02. No-one at home for contact during the interviewing period.
- 03. Respondent absent; some FU member contacted, but not the appropriate respondent.
- 04. Lost; unable to locate any member of the FU at all.

428 - 1978 INDIVIDUAL DATA

- 05. FU is located too far away for interviewer contact.
- 11. This individual was in the armed forces.
- 12. This individual was in an educational institution.
- 13. This individual was in a health care facility
- 14. This individual was in jail or prison
- 19. This individual was in some other type of institution, for example, a religious order. Cases in which the type of institution is unknown are included here, also.
- 21. This individual was not eligible for the interview and the Head or the Wife, whichever is the sample member, became main family nonresponse because he/she was institutionalized by joining the armed forces.
- 22. This individual was not eligible for the interview and became main family nonresponse because the Head or Wife, whichever is sample, became institutionalized by entering an educational institution.
- 23. This individual was not eligible for the interview and became main family nonresponse because the Head or Wife, whichever is the sample member, became institutionalized by entering a health care facility.
- 24. This individual was not eligible for the interview and became main family nonresponse because the Head or Wife, whichever is the sample member, became institutionalized through imprisonment.
- 29. This individual was not eligible for the interview and became main family nonresponse because the Head or Wife, whichever is sample, became institutionalized by some means other than the above; for example, he/she may have entered a religious order. Cases in which the type of institution is unknown are included here, also.
- 31. This individual was unable to cooperate through disability.
- 32. This individual was not eligible for the interview and the Head or Wife, whichever is sample, was unable to cooperate through disability.
- 41. This individual died between the 1977 and 1978 interviews.
- 42. This individual was not eligible for the interview and became main family nonresponse because the Head or Wife, whichever is sample, died.
- 51. This individual, although followed for interview, was discovered to be nonsample: office error.
- 52. This individual should have been followed but was not: office error.
- 53. This individual was mistakenly included in two or more response families at once; this record is the duplicate, or erroneous, one.
- 59. Other office error

V30296 '1978 REVISED WEIGHT 78' TLOC= 19927-19928

1974 Individual Weight, Updated for 1978

This variable is nonzero only for sample members associated with a 1978 panel family. Sample members born into the family in 1978 receive either the average of the Head's and spouse's weights or, in the event of a single Head, the child receives the Head's weight. Those sample members returning to a panel family after becoming nonresponse receive the same weight that they had

in the last year that they had nonzero data. Refer to Section I, Part 5 for details on the weights themselves.

00. Individual was born or moved in after the 1978 interview (V30258>0000 and V30259=00); main family nonresponse by 1978 or mover-out nonresponse by 1977 (V30258=0000); nonsample individual (V30263=170-226)

1979 INDIVIDUAL VARIABLES: Distributions are calculated only for cases with nonzero data (V30298=01-89) using the 1979 weight (V30328) for the percents.

V30326 'TYPE OF IND RECORD 79' TL0C= 19991-19992 MD=99

Type of Individual Data Record in 1979

All individuals who became main family nonresponse in 1979 have 1979 ID numbers equal to 0000 and zero data values for 1979, but have nonzero data values for their 1978 records. Mover-out nonresponse individuals for 1979 have nonzero data for 1979 just as response individuals do; however, the movers-out have 1979 sequence numbers in the range 51-89. Codes 01-04 below apply to main family nonresponse individuals only; codes 06-08 are reserved for mover-out nonresponse.

For case counts on this variable, please refer to Table 1 at the end of this tape code.

- 01. This sample member was 18 years old or older at the time of main family nonresponse and had been in the FU in 1978.
- 02. This sample member was less than 18 at the time of main family nonresponse and had been in the FU in 1978.
- 03. This nonsample individual had been in the 1978 FU, and this FU became nonresponse in 1979.
- 04. This sample member had been in an institution in 1978 but his or her main family became nonresponse in 1979.
- 05. This sample member, although connected with a 1979 response family, was in an institution at the time of the 1979 interview.
- 06. This sample individual was 18 years old or older and moved out or died between the 1978 and 1979 interviews.
- 07. This sample member was less than 18 and moved out or died between the 1978 and 1979 interviews.
- 08. This nonsample individual moved out or died between the 1978 and 1979 interviews.

- 00. Inap.; this individual was in a panel family in 1979.

V30328 'INDIVIDUAL WEIGHT 79' TL0C= 19995-19996

1979 Individual Weight

This variable is nonzero only for sample members associated with a 1979 response family. Sample members born into the family in 1979 receive either

438 - 1979 INDIVIDUAL DATA

the average of the Head's and spouse's weights or, in the event of a single Head, the child receives the Head's weight. For those sample members either not yet part of the family in 1974 but present by 1978 or who were main family nonresponse in 1974 and moved back into the panel in 1978, the most recent weight is brought forward to these tape locations. Refer to Section I, Part 5 of this volume for details on the weights themselves.

00. Individual was born or moved in after the 1977 interview (V30297>0000 and V30298=00); main family nonresponse by 1979 or mover-out nonresponse by 1978 (V30297=0000); nonsample individual (V30302=170-226)

1980 INDIVIDUAL VARIABLES: Distributions are calculated only for cases with nonzero data (V30030=01-89) using the 1980 weight (V30360) for the percents.

V30329 '1980 INTERVIEW NUMBER 80' TL0C= 19997-20000

1980 Interview Number (1980 ID Number)

The values for this variable in the range 0001-6533 represent the 1980 ID number of the interview in which this individual was included in 1980. Individuals moving in or born subsequent to the 1980 interview received the 1980 ID number of the family to which they moved.

0000. This individual was main family nonresponse by 1980 or mover-out nonresponse by 1979

V30330 'SEQUENCE NUMBER 80' TL0C= 20001-20002

Actual 1980 ID Numbers (0001-6533) were coded for individuals who moved out of main families or institutions to form splitoff families.

- 9997. This splitoff individual did not move out of a main family or institution, e.g., nonsample Heads, Wives or others who appeared for the first time in the 1980 splitoff family; children newly born in, etc.
- 0000. Inap.; individual was born or moved in after the 1980 interview (V30329>0000 and V30330=00); main family nonresponse by 1980 or mover-out nonresponse by 1979 (V30329=0000); not a splitoff in 1980 (V30336≠1 or V30336=1 and V30337≠00)

V30358 'TYPE OF IND RECORD 80' TL0C= 20059-20060 MD=99

Type of Individual Data Record in 1980

All individuals who became main family nonresponse in 1980 have 1980 ID numbers equal to 0000 and zero data values for 1980, but have nonzero data values for their 1979 records. Mover-out nonresponse individuals for 1980 have nonzero data for 1980 just as response individuals do; however, the movers-out have 1980 sequence numbers in the range 51-89. Codes 01-04 below apply to main family nonresponse individuals only; codes 06-08 are reserved for mover-out nonresponse.

For case counts on this variable, please refer to Table 1 at the end of this tape code.

- 01. This sample member was 18 years old or older at the time of main family nonresponse and had been in the FU in 1979.
- 02. This sample member was less than 18 at the time of main family nonresponse and had been in the FU in 1979.
- 03. This nonsample individual had been in the 1979 FU, and this FU became nonresponse in 1980.
- 04. This sample member had been in an institution in 1979 but his or her main family became nonresponse in 1980.
- 05. This sample member, although connected with a 1980 response family, was in an institution at the time of the 1980 interview.
- 06. This sample individual was 18 years old or older and moved out or died between the 1979 and 1980 interviews.
- 07. This sample member was less than 18 and moved out or died between the 1979 and 1980 interviews.
- 08. This nonsample individual moved out or died between the 1979 and 1980 interviews.
- 09. This individual had not been born or moved in by the time of the 1980 interview.
- 10. This individual had become nonresponse by the time of the 1979 interview.
- 99. NA; DK

00. Inap.; this individual was in a panel family in 1980 (V30330=01-20).

V30359 'WHY NONRESPONSE 80' TLDC= 20061-20062 MD=99

Reason for NonFU Membership in 1980

Individuals ineligible for the interview consist of those who were too young (under 18 years old) or who are not sample members.

For case counts on this variable, please refer to Table 1 at the end of this tape code.

01. Refusal by all eligible/available FU members.
02. No-one at home for contact during the interviewing period.
03. Respondent absent; some FU member contacted, but not the appropriate respondent.
04. Lost; unable to locate any member of the FU at all.
05. FU is located too far away for interviewer contact.
11. This individual was in the armed forces.
12. This individual was in an educational institution.
13. This individual was in a health care facility
14. This individual was in jail or prison
19. This individual was in some other type of institution, for example, a religious order. Cases in which the type of institution is unknown are included here, also.
21. This individual was not eligible for the interview and the Head or the Wife, whichever is the sample member, became main family nonresponse because he/she was institutionalized by joining the armed forces.
22. This individual was not eligible for the interview and became main family nonresponse because the Head or Wife, whichever is sample, became institutionalized by entering an educational institution.
23. This individual was not eligible for the interview and became main family nonresponse because the Head or Wife, whichever is the sample member, became institutionalized by entering a health care facility.
24. This individual was not eligible for the interview and became main family nonresponse because the Head or Wife, whichever is the sample member, became institutionalized through imprisonment.
29. This individual was not eligible for the interview and became main family nonresponse because the Head or Wife, whichever is sample, became institutionalized by some means other than the above; for example, he/she may have entered a religious order. Cases in which the type of institution is unknown are included here, also.
31. This individual was unable to cooperate through disability.
32. This individual was not eligible for the interview and the Head or Wife, whichever is sample, was unable to cooperate through disability.
41. This individual died between the 1979 and 1980 interviews.
42. This individual was not eligible for the interview and became main family nonresponse because the Head or Wife, whichever is sample, died.
51. This individual, although followed for interview, was discovered to be nonsample; office error.
52. This individual should have been followed but was not; office error.
53. This individual was mistakenly included in two or more response families at once; this record is the duplicate, or erroneous, one.
59. Other office error
91. This sample individual moved out of the 1980 main family and was eligible for interviewing but the reason for nonresponse is NA.
92. Individual moved out of the 1980 main family and was not eligible for interviewing because he/she was either nonsample or too young.

97. This individual had not been born or moved in by the time of the 1980 interview (V30329>0000 and V30330=00)
98. This individual became main family or mover-out nonresponse by 1979 (V30297=0000 and V30329=0000 or V30297>0000 and V30298=71-89 and V30329=0000)
99. NA; DK
00. Inap.; this individual was in a panel family in 1980.

V30360 '1980 IND WEIGHT 80' TL0C= 20063-20064

1979 Individual Weight, Updated for 1980

This variable is nonzero only for sample members associated with a 1980 panel family. Sample members born into the family in 1980 receive either the average of the Head's and spouse's weights or, in the event of a single Head, the child receives the Head's weight. Those sample members returning to a panel family after becoming nonresponse receive the same weight that they had in the last year that they had nonzero data. Refer to Section I, Part 5 for details on the weights themselves.

00. Individual was born or moved in after the 1980 interview (V30329>0000 and V30330=00); main family nonresponse by 1980 or mover-out nonresponse by 1979 (V30329=0000); nonsample individual (V30334=170-226)

1981 INDIVIDUAL VARIABLES: Distributions are calculated only for cases with nonzero data (V30362=01-89) using the 1981 weight (V30392) for the percents.

V30361 '1981 INTERVIEW NUMBER 81' TL0C= 20065-20068

1981 Interview Number (1981 ID Number)

The values for this variable in the range 0001-6620 represent the 1981 ID number of the interview in which this individual was included in 1981. Individuals moving in or born subsequent to the 1981 interview received the 1981 ID number of the family to which they moved.

0000. This individual was main family nonresponse by 1981 or mover-out nonresponse by 1980

V30362 'SEQUENCE NUMBER 81' TL0C= 20069-20070

V30390 'TYPE OF IND RECORD 81' TLOC= 20127-20128 MD=99

Type of Individual Data Record in 1981

All individuals who became main family nonresponse in 1981 have 1981 ID numbers equal to 0000 and zero data values for 1981, but have nonzero data values for their 1980 records. Mover-out nonresponse individuals for 1981 have nonzero data for 1981 just as response individuals do; however, the movers-out have 1981 sequence numbers in the range 51-89. Codes 01-04 below apply to main family nonresponse individuals only; codes 06-08 are reserved for mover-out nonresponse.

For case counts on this variable, please refer to Table 1 at the end of this tape code.

01. This sample member was 18 years old or older at the time of main family nonresponse and had been in the FU in 1980.
02. This sample member was less than 18 at the time of main family nonresponse and had been in the FU in 1980.
03. This nonsample individual had been in the 1980 FU, and this FU became nonresponse in 1981.

- 04. This sample member had been in an institution in 1980 but his or her main family became nonresponse in 1981.
- 05. This sample member, although connected with a 1981 response family, was in an institution at the time of the 1981 interview.
- 06. This sample individual was 18 years old or older and moved out or died between the 1980 and 1981 interviews.
- 07. This sample member was less than 18 and moved out or died between the 1980 and 1981 interviews.
- 08. This nonsample individual moved out or died between the 1980 and 1981 interviews.

V30391 'WHY NONRESPONSE 81' TL0C= 20129-20130 MD=99

Reason for NonFU Membership in 1981

Individuals ineligible for the interview consist of those who were too young (under 18 years old) or who are not sample members.

For case counts on this variable, please refer to Table 1 at the end of this tape code.

- 01. Refusal by all eligible/available FU members.
- 02. No-one at home for contact during the interviewing period.
- 03. Respondent absent; some FU member contacted, but not the appropriate respondent.
- 04. Lost; unable to locate any member of the FU at all.
- 05. FU is located too far away for interviewer contact.
- 11. This individual was in the armed forces.
- 12. This individual was in an educational institution.
- 13. This individual was in a health care facility
- 14. This individual was in jail or prison
- 19. This individual was in some other type of institution, for example, a religious order. Cases in which the type of institution is unknown are included here, also.
- 21. This individual was not eligible for the interview and the Head or the Wife, whichever is the sample member, became main family nonresponse because he/she was institutionalized by joining the armed forces.
- 22. This individual was not eligible for the interview and became main family nonresponse because the Head or Wife, whichever is sample, became institutionalized by entering an educational institution.
- 23. This individual was not eligible for the interview and became main family nonresponse because the Head or Wife, whichever is the sample member, became institutionalized by entering a health care facility.
- 24. This individual was not eligible for the interview and became main family nonresponse because the Head or Wife, whichever is the sample member, became institutionalized through imprisonment.
- 29. This individual was not eligible for the interview and became main family nonresponse because the Head or Wife, whichever is sample, became institutionalized by some means other than the above; for example, he/she may have entered a religious order. Cases in which the type of institution is unknown are included here, also.
- 31. This individual was unable to cooperate through disability.
- 32. This individual was not eligible for the interview and the Head or Wife, whichever is sample, was unable to cooperate through disability.
- 41. This individual died between the 1980 and 1981 interviews.

V30392 '1981 IND WEIGHT 81' TL0C= 20131-20132

1979 Individual Weight, Updated for 1981

This variable is nonzero only for sample members associated with a 1981 panel family. Sample members born into the family in 1981 receive either the average of the Head's and spouse's weights or, in the event of a single Head, the child receives the Head's weight. Those sample members returning to a panel family after becoming nonresponse receive the same weight that they had in the last year that they had nonzero data. Refer to Section I, Part 5 for details on the weights themselves.

- 00. Individual was born or moved in after the 1981 interview (V30361>0000 and V30362=00); main family nonresponse by 1981 or mover-out nonresponse by 1980 (V30361=0000); nonsample individual (V30366=170-226)

1982 ID Number of the Main Family from which this Individual's Splitoff Family Was Formed

Actual 1982 ID Numbers (0001-6742) were coded for individuals who moved out of main families or institutions to form splitoff families.

- 9997. This splitoff individual did not move out of a main family or institution, e.g., nonsample Heads, Wives or others who appeared for the first time in the 1982 splitoff family; children newly born in, etc.
- 0000. Inap.; individual was born or moved in after the 1982 interview (V30393>0000 and V30394=00); main family nonresponse by 1982 or mover-out nonresponse by 1981 (V30393=0000); not a splitoff in 1982 (V30400≠1 or V30400=1 and V30401≠00)

V30418 'TYPE OF IND RECORD 82' TL0C= 20186-20187 MD=99

Type of Individual Data Record in 1982

All individuals who became main family nonresponse in 1982 have 1982 ID numbers equal to 0000 and zero data values for 1982, but have nonzero data values for their 1981 records. Mover-out nonresponse individuals for 1982

have nonzero data for 1982 just as response individuals do; however, the movers-out have 1982 sequence numbers in the range 51-89. Codes 01-04 below apply to main family nonresponse individuals only; codes 06-08 are reserved for mover-out nonresponse.

For case counts on this variable, please refer to Table 1 at the end of this tape code.

01. This sample member was 18 years old or older at the time of main family nonresponse and had been in the FU in 1981.
02. This sample member was less than 18 at the time of main family nonresponse and had been in the FU in 1981.
03. This nonsample individual had been in the 1981 FU, and this FU became nonresponse in 1982.
04. This sample member had been in an institution in 1981 but his or her main family became nonresponse in 1982.
05. This sample member, although connected with a 1982 response family, was in an institution at the time of the 1982 interview.
06. This sample individual was 18 years old or older and moved out or died between the 1981 and 1982 interviews.
07. This sample member was less than 18 and moved out or died between the 1981 and 1982 interviews.
08. This nonsample individual moved out or died between the 1981 and 1982 interviews.
09. This individual had not been born or moved in by the time of the 1982 interview.
10. This individual had become nonresponse by the time of the 1981 interview.

V30419 'WHY NONRESPONSE 82' TLOC= 20188-20189 MD=99

Reason for NonFU Membership in 1982

Individuals ineligible for the interview consist of those who were too young (under 18 years old) or who are not sample members.

For case counts on this variable, please refer to Table 1 at the end of this tape code.

01. Refusal by all eligible/available FU members.
02. No-one at home for contact during the interviewing period.
03. Respondent absent; some FU member contacted, but not the appropriate respondent.
04. Lost; unable to locate any member of the FU at all.
05. FU is located too far away for interviewer contact.
11. This individual was in the armed forces.
12. This individual was in an educational institution.
13. This individual was in a health care facility
14. This individual was in jail or prison
19. This individual was in some other type of institution, for example, a religious order. Cases in which the type of institution is unknown are included here, also.
21. This individual was not eligible for the interview and the Head or the Wife, whichever is the sample member, became main family nonresponse because he/she was institutionalized by joining the armed forces.
22. This individual was not eligible for the interview and became main family nonresponse because the Head or Wife, whichever is sample, became institutionalized by entering an educational institution.
23. This individual was not eligible for the interview and became main family nonresponse because the Head or Wife, whichever is the sample member, became institutionalized by entering a health care facility.
24. This individual was not eligible for the interview and became main family nonresponse because the Head or Wife,

- whichever is the sample member, became institutionalized through imprisonment.
29. This individual was not eligible for the interview and became main family nonresponse because the Head or Wife, whichever is sample, became institutionalized by some means other than the above; for example, he/she may have entered a religious order. Cases in which the type of institution is unknown are included here, also.

V30420 '1982 IND WEIGHT 82' TLOC= 20190-20191

1979 Individual Weight. Updated for 1982

This variable is nonzero only for sample members associated with a 1982 panel family. Sample members born into the family in 1982 receive either the average of the Head's and spouse's weights or, in the event of a single Head, the child receives the Head's weight. Those sample members returning to a panel family after becoming nonresponse receive the same weight that they had in the last year that they had nonzero data. Refer to Section I, Part 5 for details on the weights themselves.

00. Individual was born or moved in after the 1982 interview (V30393>0000 and V30394=00); main family nonresponse by 1982 or mover-out nonresponse by 1981 (V30393=0000); nonsample individual (V30398=170-226)

1983 INDIVIDUAL VARIABLES: Distributions are calculated only for cases with nonzero data (V30422=01-89) using the 1983 weight (V30452) for the percents.

V30421 '1983 INTERVIEW NUMBER 83' TLOC= 20192-20195

1983 Interview Number (1983 ID Number)

The values for this variable in the range 0001-6852 represent the 1983 ID number of the interview in which this individual was included in 1983. Individuals moving in or born subsequent to the 1983 interview received the 1983 ID number of the family to which they moved.

0000. This individual was main family nonresponse by 1983 or mover-out nonresponse by 1982

V30422 'SEQUENCE NUMBER 83' TLOC= 20196-20197

1983 Sequence Number

This sequence number variable provides a means of identifying an individual's status with regard to the FU at the time of the 1983 interview.

19,424	96.9	01-20.	Individuals in the family at the time of the 1983 interview
325	2.3	51-59.	Individuals in institutions at the time of the 1983 interview
511	0.5	71-80.	Individuals who moved out of the FU or out of institutions between the 1982 and 1983 interviews but who were not included in another responding FU for 1983. All such individuals were nonresponse.
67	0.3	81-89.	Individuals who were living in 1982 but died by the time of the 1983 interview
		00.	Individuals who were born or moved in after the 1983 interview; main family nonresponse by 1983 or mover-out nonresponse by 1982 (V30421=0000)

V30423 'RELATIONSHIP TO HEAD 83' TLOC= 20198-20199

1983 Relationship to Head

Note that these relationships are those to the 1982 Head for any individual whose 1983 sequence number (V30422) is greater than 50, that is, has moved out of the FU. Thus, for example, if the 1982 Head is no longer present at the time of the 1983 interview, his or her relationship to Head is coded 10; the new 1983 Head also is coded 10. Therefore, to select current Heads, the user must select those coded 10 in this variable whose sequence numbers (V30422)=01.

5,556	41.2	10.	Head in 1983; 1982 Head who was mover-out nonresponse by the time of the 1983 interview
2,631	22.4	20.	Legal wife in 1983; 1982 wife who was mover-out nonresponse by the time of the 1983 interview
69	0.4	22.	"Wife"--female cohabitor who has lived with Head for a year or more <u>or</u> who was present in the 1982 family, since consecutive interviews may be taken less or more than twelve months apart; 1982 "wife" who was mover-out nonresponse by the time of the 1983 interview
6,836	32.1	30.	Son or daughter of <u>Head</u> (includes adopted children but not stepchildren)
360	1.9	33.	Stepson or stepdaughter of <u>Head</u> (children of legal wife (code 20) who are not children of Head)
30	0.1	35.	Son or daughter of " <u>wife</u> " but not Head (includes only those children whose mother's relationship to Head is 22 but who are not Head's children)
2	0.0	37.	Son-in-law or daughter-in-law of Head (includes stepchildren-in-law)
4	0.0	38.	Foster son or foster daughter, not legally adopted
80	0.4	40.	Brother or sister of Head (includes step and half sisters and brothers)
18	0.2	47.	Brother-in-law or sister-in-law of Head: i.e., brother or sister of legal wife.
		48.	Brother or sister of Head's cohabitor (the cohabitor's code=22 or 88)
16	0.2	50.	Father or mother of Head (includes stepparents)
10	0.1	57.	Father-in-law or mother-in-law of Head (includes parents of legal wives (code 20) only)
		58.	Father or mother of Head's cohabitor (the cohabitor's code=22 or 88)

466 - 1983 INDIVIDUAL DATA

328	0.7	60.	Grandson or granddaughter of Head (includes only <u>legal</u> wife's (code 20) grandchildren; those of a cohabitor are coded 97)
10	0.0	65.	Great-grandson or great-granddaughter of Head (includes only <u>legal</u> wife's (code 20) great-grandchildren; those of a cohabitor are coded 97)
2	0.0	66.	Grandfather or grandmother of Head (includes stepgrandparents)
		67.	Grandfather or grandmother of legal wife (code 20)
		68.	Greatgrandfather or greatgrandmother of Head
		69.	Greatgrandfather or greatgrandmother of legal wife (code 20)
22	0.1	70.	Nephew or niece of Head
5	0.0	71.	Nephew or niece of legal wife (code 20)
1	0.0	72.	Uncle or Aunt of Head
		73.	Uncle or Aunt of legal wife (code 20)
		74.	Cousin of Head
		75.	Cousin of legal wife (code 20)
		83.	Children of first-year cohabitor but not of Head (this child's parent is coded 88)
2	0.0	88.	First-year cohabitor of Head

		00.	Individual was born or moved in after the 1983 interview (V30421>0000 and V30422=00); main family nonresponse by 1983 or mover-out nonresponse by 1982 (V30421=0000)

V30424 'AGE OF INDIVIDUAL 83' TL0C= 20200-20201 MD=99

Age at the Time of the 1983 Interview

The values for this variable in the range 02-97 represent the actual age reported of the individual in years on his or her most recent birthday. See V30449 for an age variable that is generated from birth date information. Consistency of V30424 with V30425-V30426 was not forced unless it was clear that the interviewer made an error in recording the individual's age or birth date.

- 01. Newborn up to second birthday
- 98. 98 years old or more
- 99. NA: DK
- 00. Individual was born or moved in after the 1983 interview (V30421>0000 and V30422=00); main family nonresponse by 1983 or mover-out nonresponse by 1982 (V30421=0000)

V30449 'AGE FROM BIRTH DATE 83' TLOC= 20254-20255 MD=99

Age at the Time of the 1983 Interview as Generated from Birth Date

The values for this variable in the range 02-97 represent the actual age of the individual in years on his or her most recent birthday. This variable is generated from the reported month and year of birth (V30425-V30426) and the

date of interview (V8958) using the following assumptions: if the month of birth is NA (V30425=99), July is assumed; if the date of interview is NA (V8958=9999), assume July for birth month and that July birthdays did not yet take place; if the day of the interview is less than the fifteenth day of the month, assume that birthdays in the same month did not yet take place. Consistency with V30424, reported age, has not been forced.

- 01. Newborn up to second birthday
- 98. 98 years old or more
- 99. NA; DK (V30426=9999)
- 00. Inap.; individual was born or moved in after the 1983 interview (V30421>0000 and V30422=00); main family nonresponse by 1983 or mover-out nonresponse by 1982 (V30421=0000)

V30450 'TYPE OF IND RECORD 83' TL0C= 20256-20257 MD=99

Type of Individual Data Record in 1983

All individuals who became main family nonresponse in 1983 have 1983 ID numbers equal to 0000 and zero data values for 1983, but have nonzero data values for their 1982 records. Mover-out nonresponse individuals for 1983 have nonzero data for 1983 just as response individuals do; however, the movers-out have 1983 sequence numbers in the range 51-89. Codes 01-04 below apply to main family nonresponse individuals only; codes 06-08 are reserved for mover-out nonresponse.

For case counts on this variable, please refer to Table 1 at the end of this tape code.

- 01. This sample member was 18 years old or older at the time of main family nonresponse and had been in the FU in 1982.
- 02. This sample member was less than 18 at the time of main family nonresponse and had been in the FU in 1982.
- 03. This nonsample individual had been in the 1982 FU, and this FU became nonresponse in 1983.
- 04. This sample member had been in an institution in 1982 but his or her main family became nonresponse in 1983.
- 05. This sample member, although connected with a 1983 response family, was in an institution at the time of the 1983 interview.
- 06. This sample individual was 18 years old or older and moved out or died between the 1982 and 1983 interviews.
- 07. This sample member was less than 18 and moved out or died between the 1982 and 1983 interviews.
- 08. This nonsample individual moved out or died between the 1982 and 1983 interviews.
- 09. This individual had not been born or moved in by the time of the 1983 interview.
- 10. This individual had become nonresponse by the time of the 1982 interview.

V30451 'WHY NONRESPONSE 83' TL0C= 20258-20259 MD=99

Reason for NonFU Membership in 1983

Individuals ineligible for the interview consist of those who were too young (under 18 years old) or who are not sample members.

For case counts on this variable, please refer to Table 1 at the end of this tape code.

- 01. Refusal by all eligible/available FU members.
- 02. No-one at home for contact during the interviewing period.
- 03. Respondent absent; some FU member contacted, but not the appropriate respondent.
- 04. Lost; unable to locate any member of the FU at all.
- 05. FU is located too far away for interviewer contact.

11. This individual was in the armed forces.
12. This individual was in an educational institution.
13. This individual was in a health care facility
14. This individual was in jail or prison
19. This individual was in some other type of institution, for example, a religious order. Cases in which the type of institution is unknown are included here, also.
21. This individual was not eligible for the interview and the Head or the Wife, whichever is the sample member, became main family nonresponse because he/she was institutionalized by joining the armed forces.
22. This individual was not eligible for the interview and became main family nonresponse because the Head or Wife, whichever is sample, became institutionalized by entering an educational institution.
23. This individual was not eligible for the interview and became main family nonresponse because the Head or Wife, whichever is the sample member, became institutionalized by entering a health care facility.
24. This individual was not eligible for the interview and became main family nonresponse because the Head or Wife, whichever is the sample member, became institutionalized through imprisonment.
29. This individual was not eligible for the interview and became main family nonresponse because the Head or Wife, whichever is sample, became institutionalized by some means other than the above; for example, he/she may have entered a religious order. Cases in which the type of institution is unknown are included here, also.
31. This individual was unable to cooperate through disability.
32. This individual was not eligible for the interview and the Head or Wife, whichever is sample, was unable to cooperate through disability.
41. This individual died between the 1982 and 1983 interviews.
42. This individual was not eligible for the interview and became main family nonresponse because the Head or Wife, whichever is sample, died.
51. This individual, although followed for interview, was discovered to be nonsample: office error.
52. This individual should have been followed but was not: office error.
53. This individual was mistakenly included in two or more response families at once; this record is the duplicate, or erroneous, one.
59. Other office error
91. This sample individual moved out of the 1983 main family and was eligible for interviewing but the reason for nonresponse is NA.
92. Individual moved out of the 1983 main family and was not eligible for interviewing because he/she was either nonsample or too young.
97. This individual had not been born or moved in by the time of the 1983 interview (V30421>0000 and V30422=00)
98. This individual became main family or mover-out nonresponse by 1982 (V30393=0000 and V30421=0000 or V30393>0000 and V30394=71-89 and V30421=0000)
99. NA; DK
00. Inap.; this individual was in a panel family in 1983.

V30452 'INDIVIDUAL WEIGHT 83' TL0C= 20260-20261

1979 Individual Weight, Updated for 1983

This variable is nonzero only for sample members associated with a 1983 panel family. Sample members born into the family in 1983 receive either the average of the Head's and spouse's weights or, in the event of a single Head, the child receives the Head's weight. Those sample members returning to a panel family after becoming nonresponse receive the same weight that they had

in the last year that they had nonzero data. Refer to Section I, Part 5 for details on the weights themselves.

00. Inap.; individual was born or moved in after the 1983 interview (V30421>0000 and V30422=00); main family nonresponse by 1983 or mover-out nonresponse by 1982 (V30421=0000); nonsample individual (V30428=170-226)

1984 INDIVIDUAL VARIABLES: Distributions are calculated only for cases with nonzero data (V30454=01-89) using the 1984 weight (V30488) for the percents.

V30453 '1984 INTERVIEW NUMBER 84' TLOC= 20262-20265

1984 Interview Number (1984 ID Number)

The values for this variable in the range 0001-6918 represent the 1984 ID number of the interview in which this individual was included in 1984.

0000. This individual was main family nonresponse by 1984 or mover-out nonresponse by 1983

V30454 'SEQUENCE NUMBER 84' TLOC= 20266-20267

1984 Sequence Number

This sequence number variable provides a means of identifying an individual's status with regard to the FU at the time of the 1984 interview.

V30455 'RELATIONSHIP TO HEAD 84' TLOC= 20268-20269

1984 Relationship to Head

Note that these relationships are those to the 1983 Head for any individual whose 1984 sequence number (V30454) is greater than 50, that is, has moved out of the FU. Thus, for example, if the 1983 Head is no longer present at the time of the 1984 interview, his or her relationship to Head is coded 10; the new 1984 Head also is coded 10. Therefore, to select current Heads, the user must select those coded 10 in this variable whose sequence numbers (V30454)=01.

V30456 'AGE OF INDIVIDUAL 84' TL0C= 20270-20271 MD=99

Age at the Time of the 1984 Interview

The values for this variable in the range 02-97 represent the actual age reported of the individual in years on his or her most recent birthday. See V30485 for an age variable that is generated from birth date information. Consistency of V30456 with V30457-V30458 was not forced unless it was clear that the interviewer made an error in recording the individual's age or birth date.

V30485 'AGE FROM BIRTH DATE 84' TLOC= 20336-20337 MD=99

Age at the Time of the 1984 Interview as Generated from Birth Date

The values for this variable in the range 02-97 represent the actual age of the individual in years on his or her most recent birthday. This variable is generated from the reported month and year of birth (V30457-V30458) and the date of interview (V10416) using the following assumptions: if the month of birth is NA (V30457=99), July is assumed; if the date of interview is NA (V10416=9999), assume July for birth month and that July birthdays did not yet take place; if the day of the interview is less than the fifteenth day of the month, assume that birthdays in the same month did not yet take place. Consistency with V30456, reported age, has not been forced.

- 01. Newborn up to second birthday
- 98. 98 years old or more
- 99. NA; DK (V30458=9999)
- 0000. Inap.; main family nonresponse by 1984 or mover-out nonresponse by 1983 (V30453=0000)

V30486 'TYPE OF IND RECORD 84' TLOC= 20338-20339 MD=99

Type of Individual Data Record in 1984

All individuals who became main family nonresponse in 1984 have 1984 ID numbers equal to 0000 and zero data values for 1984, but have nonzero data values for their 1983 records. Mover-out nonresponse individuals for 1984 have nonzero data for 1984 just as response individuals do; however, the movers-out have 1984 sequence numbers in the range 51-89. Codes 01-04 below apply to main family nonresponse individuals only; codes 06-08 are reserved for mover-out nonresponse.

For case counts on this variable, please refer to Table 1 at the end of this tape code.

- 01. This sample member was 18 years old or older at the time of main family nonresponse and had been in the FU in 1983.

- 02. This sample member was less than 18 at the time of main family nonresponse and had been in the FU in 1983.
- 03. This nonsample individual had been in the 1983 FU, and this FU became nonresponse in 1984.
- 04. This sample member had been in an institution in 1983 but his or her main family became nonresponse in 1984.
- 05. This sample member, although connected with a 1984 response family, was in an institution at the time of the 1984 interview.
- 06. This sample individual was 18 years old or older and moved out or died between the 1983 and 1984 interviews.
- 07. This sample member was less than 18 and moved out or died between the 1983 and 1984 interviews.
- 08. This nonsample individual moved out or died between the 1983 and 1984 interviews.
- 10. This individual had become nonresponse by the time of the 1983 interview.
- 99. NA; DK
- 00. Inap.; this individual was in a panel family in 1984 (V30454=01-20).

V30487 'WHY NONRESPONSE 84' TL0C= 20340-20341 MD=99

Reason for NonFU Membership in 1984

Individuals ineligible for the interview consist of those who were too young (under 18 years old) or who are not sample members.

For case counts on this variable, please refer to Table 1 at the end of this tape code.

- 01. Refusal by all eligible/available FU members.
- 02. No-one at home for contact during the interviewing period.
- 03. Respondent absent; some FU member contacted, but not the appropriate respondent.
- 04. Lost; unable to locate any member of the FU at all.
- 05. FU is located too far away for interviewer contact.
- 11. This individual was in the armed forces.
- 12. This individual was in an educational institution.
- 13. This individual was in a health care facility
- 14. This individual was in jail or prison
- 19. This individual was in some other type of institution, for example, a religious order. Cases in which the type of institution is unknown are included here, also.
- 21. This individual was not eligible for the interview and the Head or the Wife, whichever is the sample member, became main family nonresponse because he/she was institutionalized by joining the armed forces.
- 22. This individual was not eligible for the interview and became main family nonresponse because the Head or Wife, whichever is sample, became institutionalized by entering an educational institution.
- 23. This individual was not eligible for the interview and became main family nonresponse because the Head or Wife, whichever is the sample member, became institutionalized by entering a health care facility.
- 24. This individual was not eligible for the interview and became main family nonresponse because the Head or Wife, whichever is the sample member, became institutionalized through imprisonment.
- 29. This individual was not eligible for the interview and became main family nonresponse because the Head or Wife, whichever is sample, became institutionalized by some means other than the above; for example, he/she may have entered a religious order. Cases in which the type of institution is unknown are included here, also.
- 31. This individual was unable to cooperate through disability.
- 32. This individual was not eligible for the interview and the Head or Wife, whichever is sample, was unable to cooperate through disability.

- 41. This individual died between the 1983 and 1984 interviews.
- 42. This individual was not eligible for the interview and became main family nonresponse because the Head or Wife, whichever is sample, died.
- 51. This individual, although followed for interview, was discovered to be nonsample: office error.
- 52. This individual should have been followed but was not: office error.
- 53. This individual was mistakenly included in two or more response families at once; this record is the duplicate, or erroneous, one.
- 59. Other office error
- 91. This sample individual moved out of the 1984 main family and was eligible for interviewing but the reason for nonresponse is NA.
- 92. Individual moved out of the 1984 main family and was not eligible for interviewing because he/she was either nonsample or too young.
- 98. This individual became main family or mover-out nonresponse by 1983 (V30453=0000 and V30453>0000 or V30453>0000 and V30422=71-89 and V30453=0000)
- 99. NA; DK
- 00. Inap.; this individual was in a panel family in 1984.

V30488 'INDIVIDUAL WEIGHT 84' TLOC= 20342-20343

1984 Individual Weight

This variable is nonzero only for sample members associated with a 1984 response family. Sample members born into the family in 1984 receive either the average of the Head's and spouse's weights or, in the event of a single Head, the child receives the Head's weight. For those sample members either not yet part of the family in 1979 but present by 1983 or who were main family nonresponse in 1979 and moved back into the panel in 1983, the most recent weight is brought forward to these tape locations. Refer to Section I, Part 5 of this volume for details on the weights themselves.

- 00. Main family nonresponse by 1984 or mover-out nonresponse by 1983 (V30453=0000); individual was not a sample member (V30460=170-226)

This variable contains zeroes for all cases. It will be completed for the 1968-1985 merged data.

V32004 'PERSON # OF FATHER' / TLQC= 20355-20357

Person Number of Individual's Father

This variable contains zeroes for all cases. It will be completed for the 1968-1985 merged data.

V32005 'WTR ALWAYS IN RESP FU' / TLQC= 20358

Whether Individual Has Always Been Present in a Responding Panel Family

This variable is generated by selecting individuals whose sequence numbers for every year have been in the range 01-20 from 1969 through the present and whose person numbers are in the range 001-019, and whose relationships to Head in 1968 are in the range 01-09.

For unweighted case counts on this variable, refer to Table 2 at the end of this tape code.

- 0. Always present in an FU
- 1. Not always present in an FU

V32006 'WTR EVER IN INSTITUTION' / TLQC= 20359

Whether Individual Was Ever Institutionalized While Connected to a Responding Family

This variable is generated by selecting individuals whose sequence numbers have been in the range 51-59 in any year from 1969 through the present or whose person numbers are in the range 020-026 (thus indicating institutionalization in 1968.) If such individuals had income during the portion of the year preceding their move out, this past-year income is included in the family-level data of the family from whence they departed. In years following their move, no income questions were asked until they rejoined the family or split off.

For unweighted case counts on this variable, refer to Table 2 at the end of this tape code.

- 1. This individual has been in an institution while connected to a responding family for at least one year during the study.
- 0. All others

V32007 'WTR BORN IN/MOVED IN' / TLQC= 20360

Whether Individual Was Born or Moved into the Panel Subsequent to the 1968 Wave

This variable is generated by selecting only those individuals whose person numbers are in the range 030-226, indicating birth or move in, or whose 1968 data values contain only zeroes because, although in the family in 1968, they were inadvertently omitted from the family listing in 1968. Such individuals were assigned original sample person numbers (001-019). These individuals may have moved into the panel at any time subsequent to 1968.

For unweighted case counts on this variable, refer to Table 2 at the end of this tape code.

1. This individual was born or moved into a panel family after 1968 and therefore has zero data for 1968; subsequent years' data may also contain zeroes.
2. This individual was missed in error in 1968, although an original sample member; 1968 and possibly subsequent data contain zeroes.
0. In 1968, this individual was present, institutionalized, or a spouse who had moved out or died; the data for 1968 are nonzero.

V32008 'WTR MOVED OUT/DIED / TLOC= 20361

Whether Individual Died or Moved Out of a Responding Panel Family or Institution

This variable is generated by selecting any individuals whose sequence numbers have ever been in the range 71-89 from 1969 through the present, or those spouses who moved out or died in the year prior to the 1968 interview, i.e., whose person numbers equal 227 or 228. If such individuals had income during the portion of the year preceding their move out, this part-year income is included in the family-level data of the family from whence they departed.

For unweighted case counts on this variable, refer to Table 2 at the end of this tape code.

1. This individual has moved out of a responding main family or out of an institution and was not included in another responding family in that year.
2. This individual has died while connected with a responding main family.
0. This individual has never moved out or died

V32009 'WTR OUT FOR 1 YR+ / TLOC= 20362

Whether Individual Has Stayed Out of the Panel for a Year or More

This variable is generated by selecting individuals with any year's ID number equalling zero from 1969 through the present. Main family nonresponse for the current year are included here, as well as nonresponse from other years. Mover-out nonresponse, however, must have moved out and stayed out for at least one wave or died in a previous year in order to have any zero data at all on the tape.

For unweighted case counts on this variable, refer to Table 2 at the end of this tape code.

1. This individual has died or moved out and the absence has been for a year or more, or this individual was main family nonresponse.
0. This individual, although he/she may have moved out, was not absent for a year or more. In the case of deceased individuals, they can only have died between the current and the previous waves of data collection in order to have this code value for this variable.

V32010 'WHETHER SAMPLE / TLOC= 20363

Whether Individual Is Sample

This variable is simply a bracketing of person number.

For unweighted case counts on this variable, refer to Table 2 at the end of this tape code.

1. This individual is sample (V30002=001-026, 030-169)
0. This individual is not sample (V30002=227-228, 170-226)

V32011 'YEAR OF MOST RECENT NR / TLOC= 20364-20365

Most Recent Year of Nonresponse, Including Institutionalized Individuals

The last two digits of the most recent year of nonresponse are coded here. For example, a value of 84 indicates that nonresponse occurred most recently during the year 1984. All individuals who are currently nonresponse have code values of 84 here. Individuals who became nonresponse in 1972, for example, but returned to a responding FU in, say, 1980 have values of 80 for this variable and values of 72 for V32012.

For unweighted case counts on this variable, refer to Table 2 at the end of this tape code.

- 68. Was nonresponse most recently in 1968
- 69. Was nonresponse most recently in 1969
- 70. Was nonresponse most recently in 1970
- 71. Was nonresponse most recently in 1971
- 72. Was nonresponse most recently in 1972
- 73. Was nonresponse most recently in 1973
- 74. Was nonresponse most recently in 1974
- 75. Was nonresponse most recently in 1975
- 76. Was nonresponse most recently in 1976
- 77. Was nonresponse most recently in 1977
- 78. Was nonresponse most recently in 1978
- 79. Was nonresponse most recently in 1979
- 80. Was nonresponse most recently in 1980
- 81. Was nonresponse most recently in 1981
- 82. Was nonresponse most recently in 1982
- 83. Was nonresponse most recently in 1983
- 84. Was nonresponse most recently in 1984
- 00. Was never nonresponse

V32012 'YEAR OF FIRST NR / TLOC= 20366-20367

First Year of Nonresponse, Including Institutionalized Individuals

The last two digits of the first year of nonresponse are coded here. For example, a value of 72 indicates that nonresponse first occurred during the year 1972. In the case of main family nonresponse, this year's data contain zeroes. For mover-out nonresponse, this year's data contain some information, including partial income data. The next year's data contain zeroes unless, of course, the individual returned to a responding FU in that year or remained in an institution. If the individual has become nonresponse only once, then the code value here equals that for the previous variable (V32011).

For unweighted case counts on this variable, refer to Table 2 at the end of this tape code.

- 68. Was first nonresponse in 1968
- 69. Was first nonresponse in 1969
- 70. Was first nonresponse in 1970
- 71. Was first nonresponse in 1971
- 72. Was first nonresponse in 1972
- 73. Was first nonresponse in 1973
- 74. Was first nonresponse in 1974
- 75. Was first nonresponse in 1975
- 76. Was first nonresponse in 1976
- 77. Was first nonresponse in 1977
- 78. Was first nonresponse in 1978
- 79. Was first nonresponse in 1979
- 80. Was first nonresponse in 1980
- 81. Was first nonresponse in 1981
- 82. Was first nonresponse in 1982
- 83. Was first nonresponse in 1983
- 84. Was first nonresponse in 1984
- 00. Was never nonresponse

Distributions on Nonresponse and Summary Variables

The tables that follow contain unweighted case counts for the nonresponse and summary variables. These case counts are for all individuals on both the response and nonresponse data files. Thus, the entire complement of 34,652 individuals is included.

For the Reason for NonFU Membership variables, several codes contain no cases. Codes 11-14 and 21-24 require extensive hand coding, which has not yet been done. It will be completed for the 1968-1985 version of these files. Codes 19 and 29 currently contain these individuals. Codes 51, 53 and 59 also must be hand coded. Individuals from these categories are currently included in the missing data code 99. Code 91 is fortuitously null; i.e., no cases are missing information on this item.

SECTION III INDEXES

Three variable indexes are included in this volume which attempt to organize the data for easy reference. The first index is a list of the 1984 family-level data in order by 1984 variable number with comparable 1968-1983 variables. Next, there is an individual-level index similar in format to the one described above. The third index compares questions from Sections C, D, and E (Head's employment sections), and Sections F, G, and H (Wife's employment sections) of the questionnaire for the convenience of analysts. Please note that all individual-level variable numbers are valid only for the seventeen-year merged tape. Although all of these indexes have been checked and double-checked, the possibility remains that there may still be errors. Therefore, we cannot warn the user strongly enough to please use these only in conjunction with the tape codes.

These indexes list variable numbers only. For those who are using tape location format, a listing of the dictionary (found in the first file, preceding the data, on a standard OSIRIS data set) will provide a quick reference of the tape locations corresponding to each variable number. In prior years, we have also included in this section two indexes, one for family-level and one for individual-level data, that include all of the variables on the cross-year tapes. Due to space, and therefore price, considerations in the production of this volume, we have included those indexes in the PSID User Guide only. 1984 updates to the User Guide for the new versions. Tape locations and field widths are included in those indexes for all variables.

Family-level variables are associated with interviewing years as follows:¹

Variables 1-439	1968 family data
Variables 441-909	1969 family data that precede change variables (includes raw data and most generated variables)
Variables 910-989	1968-69 change variables ^a
Variables 990-998, 1008-1014	1969 family data that follow change variables (includes deciles and a few other variables)
Variables 999-1007	calculated in 1969 for responding 1969 families only. Values are for their 1968 data.
Variables 1101-1624	1970 family data
Variables 1625-1627	1969 labor market data, based on 1970 sample; i.e., gathered in 1970 for responding 1970 families, but values are for their 1969 data
Variables 1701-1748	1970 Census data on county. See Wave VII (1974) documentation, pp. 154-161, for details.
Variables 1749-1763	Consumer price indexes for each area for each year 1968-1972, based on 1974 sample, i.e., calculated in 1974 for responding 1974 families but values are for their 1968-1972 data. See Wave VII (1974) documentation, pp. 162-166, for details.
Variables 1801-2344	1971 family data
Variables 2401-2978	1972 family data
Variables 3001-3309	1973 family data
Variables 3401-3729, 1764-1765	1974 family data
Variables 3801-4230	1975 family data
Variables 4301-4707	1976 Head's interview data
Variables 4708-5027	1976 Wife's interview data
Variables 5028-5112	1976 other family data
Variables 5201-5671, 5680	1977 family data
Variables 5672-5679	Change in marital status variables, based on 1977 sample; i.e., their 1968-1976 data calculated in 1977 for responding 1977 families but values are for their 1968-1976 data.
Variables 5701-6219	1978 family data
Variables 6301-6813	1979 family data
Variables 6901-7455	1980 family data
Variables 7501-8109	1981 family data
Variables 8201-8739	1982 family data
Variables 8801-9433	1983 family data

¹Skips in numerical sequence are due to dummy variables separating each year's data.

concordance. Thus, this index does not contain all the cross-year family-level variables. Small differences, such as coding formats or field width variations, have been annotated; the lower case alphabetic characters appearing directly beneath the variables to which they refer indicate footnoted differences. These footnotes are identical with those used for the alphabetical family index in Part 1 of this section. A list of the footnotes is located at the end of this section, also.

All variables listed herein should be comparable for analysis purposes with, perhaps, some recoding. Again, despite careful checking, errors may exist, and the user should consult the tape codes before doing analysis.

NONCOMPARABILITY NOTES

- ^aNo missing data allowed for this variable.
- ^bIn 1972 there are four codes for this variable. However, they may be combined to produce comparable categories.
- ^cData on religious preference are incomplete for families with new Heads in 1978. See the notes in the Wave XVI (1983) Documentation Volume, Section II, Part 1, under V9357 and V9358 or refer to the User Guide, Chapter D.
- ^dCode is truncated; see tape code.
- ^eA code for missing data was allowed for this variable, but in other years missing data were assigned.
- ^fThis variable cannot be made comparable to the other years' variables.
- ^gField widths differ. Truncation of some variables in this list is necessary. See tape codes.
- ^hIn 1968, illness hours were calculated differently; only eight hours per day were allowed after the first eight weeks, as opposed to twelve in subsequent years.
- ⁱAlcohol and cigarette costs were asked in these years and subtracted from the food bill if the respondent said they were included. Therefore, these variables may not be strictly comparable.
- ^jThere was a greater possibility of double counting of food subsidies for total food expenditures in earlier years, which was largely eliminated beginning in 1972 with revised question formats. Since 1979 (reflected in 1980 and later years' data), food stamps have cost nothing, so errors should be negligible.
- ^kThis variable occasionally includes Others; thereafter only Head and/or Wife were included.
- ^lDates differ; check tape codes.
- ^mThis is a bracket variable. If field amounts only were coded in other years, they may be bracketed for comparability.
- ⁿCoding structure and/or categories differ; see tape codes for details.
- ^oCombines information on Heads (or Wives) with different employment statuses. In later years, separate variables were coded for the employed, the unemployed, and those out of the labor force. See tape codes for details on who was asked what.
- ^pCode 999 includes those who do not have an hourly wage (e.g., salaried, paid by piecework, or on commission). The other variables in the list include such persons in the 000 code.
- ^qThis variable is one of two mentions coded from the responses or is a double-mention variable (a two-digit variable with the first digit equalling the data value for the first mention and the second equalling the data value for the second mention). Both first and second mention variables may or may not be priority coded. See tape codes for details.
- ^rHas extra and/or alternate components; see tape code descriptions for details.
- ^sFor these years, code 9, not ascertained, includes cases where data are missing on whether lump sums were received or not. In all successive waves, however, such cases are included in the code category 0, inappropriate.
- ^tNot asked of retired, housewives, students, or permanently disabled Heads in 1968. From 1969 onward, only new Heads were asked these questions. Therefore, these variables provide no information for Heads who have remained the same since 1968 and who were not in the labor force in 1968. From the 1968 through the 1975 waves, code category 0 included such cases. From the 1976 wave through the present, such cases have been recoded as 9, not ascertained, for the filter question.
- ^uDoes not include adjustment for farmers.
- ^vIn 1968, 9's were coded instead of 0's when Head did no work for money and therefore had no hourly earnings.
- ^wContains some components which were not available in later years. Thereafter, new components were added. See tape codes for details.
- ^xBracket breakpoints differ from later years'.
- ^yNote that these variables are not comparable with each other. For a discussion of weights, see Section I, Part 5 of this volume or the User Guide, Chapter E. Weights for all years were redone in 1984.

^zExtra value of food received with food stamps was added into this variable in 1972 if V2482=5.

^{aa}This variable was reported by the Head of the family, whereas the variable annotated pp is taken from the Wife's interview. No attempt has been made to reconcile disparities between these two variables since comparability with other years could be affected.

^{bb}From 1968-1974, V's 481, 1154, etc. report annual housework hours for Wife or unmarried Head, and V's 483, 1156, etc. are those for married male Heads.

^{cc}These variables were edited to subtract \$100 for insurance premiums if they were included in the amounts reported. Property taxes were imputed and then also subtracted if R said they were included.

^{dd}There were no missing data on property tax variables in 1968-1975 because they were imputed. Refer to tape codes for those years for formula.

^{ee}In 1975, these variables include both Heads employed by others and those who work for someone else as well as themselves.

^{ff}From 1976 on, number of months was coded. In previous years, a bracket code on number of years was used, and only the one question, "How long have you had your present job?" was asked. For those earlier years, overlapping exists between length of present employment and length of present job for some cases.

^{gg}For calculating this variable, V471, 10 cents per mile was used. In later years, 5 cents per mile was assumed.

^{hh}From 1976 on, separate questions were asked of employees receiving different forms of compensation. Previously, all were asked to calculate per hour wage rates.

ⁱⁱIn 1981 and 1983, costs of separate components of utilities, such as electricity, gas and water, were asked separately. Thus, the total annual utilities variable was generated by adding those components and no assignments were made.

^{jj}Background section variable, asked only of new Heads/Wives. Data values for cases with same Heads/Wives as in the previous year have been carried forward from the time when these persons most recently became new Heads/Wives. Some of these variables may require updating. See User Guide, Chapter D, or 1983 Documentation Volume, Section II, Part 1, variable descriptions.

^{kk}In 1976, these variables included both those working for someone else and those working for someone else and those working for someone else and self (V4461=1 and 3).

^{ll}These variables have been generated since 1977 for comparability with 1968-1976 data. See User Guide, Chapter G, for further details.

^{mm}Federal Income Tax Variables have been generated by computer beginning in 1980. For a description and details, see User Guide, Chapter D.

ⁿⁿFor these variables, questions were asked separately of Head, Wife and Others for Medicare, Medicaid and similar programs. Filter questions were used for receipt of Social Security, ADC/AFDC, SSI and other welfare, whereas in later years, Medicare/Medicaid benefits questions were asked of all families.

^{oo}1968-1972 data have no comparable variable. This can be created, however, by multiplying the annual value of home if rented by .1 by the work for housing code and subtracting it and time spent on car repairs from home production hours. Thus, the formula for this using 1972 data would be:

$$V2438-V2421-.1(V2433XV2431)$$

The annual value of home if rented equals zero except for those who neither own nor rent their homes; this is a small fraction of the sample.

^{pp}These variables are coded directly from the wives' questionnaire in 1976, reported by wives themselves.

^{qq}In 1968, all housework hours were taken from tables. See the Waves I-V (1968-1982) Documentation, Volume II, Section II, code description for V59.

^{rr}Adding V520 to these components allows comparability with other years. See the Waves I-V (1968-1972) Documentation, Volume II, Section II, for further details.

^{ss}These variables were first generated in 1978 for the 1978 sample and on the basis of the 1978 Head's family history. Therefore, for a few cases, they may not reflect the 1968 through 1977 family history of a current Head who shares the 1978 ID number but not one or more ID numbers from 1968-1977. See User Guide, Chapter H, CURRENT FAMILY VS. FAMILY HISTORY, for an explanation of this phenomenon.

tt Hours spent in public schools were not included in these variables. Also, the 1979 variables for child care hours are for the youngest child under 12 only.

uu Hours of help from others outside the FU were included; see tape code.

vv This amount was assigned for all cases in 1968; see the Waves I-V (1968-1972) Documentation, Volume II, Section II for details.

ww Amount saved on additions and repairs is not included.

xx These variables are in the square root form. The square root form makes each of these variables linearly homogeneous in its two components.

yy These data items are for the family's 1968 and 1974 counties of residence, even though the variables themselves are located between the 1969 and 1970 data on the merged tape. Details of the codes are printed in the Wave VIII Supplement (1974), pp. 151-166.

zz These variables are less accurate than the variables below. The BRR stratum and BRR SECU should be used in place of V9410.

Part 2: Numerical Index of Seventeen-Year Individual-Level Data

The 1984 individual-level variables are listed in numerical order, with the comparable 1968-1983 variables included. Where blanks occur, there is no similar data item from previous years for that particular 1984 variable. There are also some data items from previous years excluded from this index since no comparable variable exists for 1984. Thus, this index does not include all the cross-year individual-level variables. The alphabetical index of the individual-level variables, now printed in the PSID User Guide, includes all such variables. There are some differences between years in field width and coding format among the variables listed in this numerical index, which have been annotated. The lower case alphabetic characters indicating such differences appear directly below the variables to which they refer. A list of the footnotes appears at the end of this index.

Note that the summary variables (V32001-V32012) are listed in the column for 1984, although these variables have been generated using data from each year. It is simply more convenient to list them in this fashion.

NONCOMPARABILITY NOTES

- ^aIn 1968, no dates of moves out were coded. See tape code.
- ^bThe codes for these variables are the reverse of those for the other years.
- ^cCodes for type of income have changed very much over the years. One can extract at least whether labor vs. asset vs. transfer from the variables listed in the index for earlier years. See tape codes for further details.
- ^dMissing data were allowed in 1968-1974 on this variable; from 1975 onward, assignments were made and accuracy codes were used. See footnote h below.
- ^eIn 1969-1972, the code merely states whether the individual has a disability or the individual needs extra care. For 1976 and 1977, only one question was asked, ascertaining whether this person requires extra care or is disabled. For 1978, however, the disability sequence is much more detailed for each individual.
- ^fThe 1983 and later years' codings of relationship to head are much more detailed than in previous years. Eventually we plan to recode relationship to head for 1968-1982 in the same detail.
- ^gIn 1974, transfer income was defined only as including or not including welfare payments. In 1975 and 1976, transfer income type was divided into the various components that are normally coded on this study. From 1977 on, this variable has been further divided to separate alimony from child support and unemployment from workmen's compensation, and the code of necessity becomes a two-digit one. Also, the codes assigned to each category differ slightly. Please check tape code before using.
- ^hDue to a growing demand for more detailed information on individual incomes, each person's income was split into taxable and transfer amounts from 1975 on. By adding these two components, new variables can be created that will be comparable to the individual's total money income of the 1968 through 1974 waves. It was also thought unnecessary to continue the use of missing data codes on individual-level incomes and work hours, as had been done since 1968, because editors must assign amounts for family-level totals anyway. Therefore, each income and hours variable has its own accuracy code from 1975 on. For comparability, one could exclude all cases where an assignment was made from 1975 through the present and cases with missing data in 1968-1974. Great care must be exercised in attempting cross-year comparisons for Heads and/or Wives/"Wives" using the individual-level work hours and money income variables. The following table is a year-by-year synopsis of the rules for creation of these variables. In general, since for Heads and Wives/"Wives" all the income and work hours information is available in a more correct and detailed form at the family level of the data, a recoding program should be utilized to insert those data rather than using information found in the individual portion of the data records--THIS APPLIES TO HEADS AND WIVES/"WIVES" ONLY.

Wave of Data	Variable Number	Noncomparability Problem
1968	V30012	is <u>labor</u> income only for Heads and Wives.
1969	V30034	is <u>labor</u> income only for Heads and Wives.
1970	V30059	is <u>labor</u> income only for Heads and Wives.
	V30060	This information should have been transferred in for Heads and Wives, but was not. Instead, the field is filled with nines. Use V1138 for Head's work hours Use V1148 for Wife's work hours
1971	V30084	is <u>labor</u> income only for Heads and Wives.
	V30085	This information should have been transferred in for Heads and Wives, but was not. Instead, the field is filled with nines. Use V1839 for Head's work hours; use V1849 for Wife's work hours.
1972	V30110	is <u>labor</u> income only for Heads and Wives.
1973	V30135	is <u>labor</u> income only for Heads and Wives.
1974	V30158	is <u>labor</u> income only for Heads and Wives.
1975	V30181	for single Heads=Head's and Wife's total taxable income (V3872).
	V30181	for married Heads=(Head's and Wife's total taxable income (V3872)-Wife's labor income (V3865)-Head's labor income (V3863))/2 + Head's labor income (V3863), whether or not he himself actually had any of the asset income
	V30181	for Wives=(Head's and Wife's total taxable income (V3872)-Head's labor income (V3863)-Wife's labor income (V3865))/2 + Wife's labor income (V3865), whether or not she herself actually had any of the asset income
	V30185	For Heads with no Wife in the FU and where the accuracy code of Head's ADC/AFDC income (V3878) was greater than or equal to the accuracy code for Head's other transfers (V3888), the work hours were not properly transferred in. Instead, the field is filled with nines. Use the family-level V3823 for Head's work hours.
1976	V30212	for single Heads=Head's and Wife's total taxable income (V4386).
	V30212	for married Heads=(Head's and Wife's total taxable income (V4386)-Wife's labor income (V4379)-Head's wages (V4373))/2 + Head's wages (V4373), whether or not he himself actually had any of the asset income. Additionally, note that amounts here include only half of his labor income from sources other than wages.
	V30212	for Wives=(Head's and Wife's total taxable income (V4386)-Head's wages (V4373)-Wife's labor income (V4379))/2 + Wife's labor income (V4379), whether or not she herself actually had any of the asset income. Additionally, amounts here include half of <u>Head's</u> labor income from sources other than wages.
1977	V30243	for single Heads=Head's and Wife's total taxable income (V5297)
	V30243	for married Heads=(Head's and Wife's total taxable income (V5297)-Wife's labor income (V5289)-Head's wages (V5283))/2 + Head's wages (V5283), whether or not he himself actually had any of the asset income. Additionally, note that amounts here include only half of his labor income from sources other than wages.
	V30243	for Wives=(Head's and Wife's total taxable income (V5297)-Head's wages (V5283)-Wife's labor income (V5289))/2 + Wife's labor income (V5289), whether or not she herself actually had any of the asset income. Additionally, amounts here include half of <u>Head's</u> labor income from sources other than wages.
1978	V30282	for single Heads=Head's and Wife's total taxable income (V5796)

<u>Wave of Data</u>	<u>Variable Number</u>	<u>Noncomparability Problem</u>
	V30282	was computed for married Heads and Wives accessing V9650, type of taxable income at the individual level of the data. If Wife had asset income (V9650=2,3), the Wife's assets from sources other than business (V5795) was referenced. If V5795>0, then she was allocated that amount in addition to her labor income (V5788), and he was allocated the sum of his labor income from all sources (V5780 through V5782 and V5784 through V5786) plus the sum of all other asset income (V5790 through V5794). Note that if the Wife had some business asset income in addition to her assets from other sources, the amount was improperly allocated to the Head, whether or not he himself actually had any assets. If, however, V5795=0, then the entire asset amount was split in half, again regardless of whether the Head himself had any asset income at all. If the Wife had no asset income (V9650=0,1) then the Head was properly allocated all asset income (V5790 through V5794), as well as his labor income.
1979	V30314	for single Heads=Head's and Wife's total taxable income (V6408)
	V30314	was computed for married Heads and Wives accessing V9677, type of taxable income at the individual level of the data. If Wife had asset income (V9677=2, 3), the Wife's assets from sources other than business (V6406) was referenced. If V6406>0, then she was allocated that amount in addition to her labor income (V6398), and he was allocated the sum of his labor income from all sources (V6389 through V6391 and V6393 through V6396) plus the sum of all other asset income (V6400 through V6405). Note that if the Wife had some asset income in addition to her assets in V6406, the amount was improperly allocated to the Head, whether or not he himself actually had any assets. If, however, V6406=0, then the entire asset amount was split in half, again regardless of whether the Head himself had any asset income at all. If the Wife had no asset income (V9677=0-1), then the Head was properly allocated all asset income (V6400 through V6405), as well as his labor income.
1980	V30346	for single Heads=Head's and Wife's total taxable income (V6998)
	V30346	was computed for married Heads and Wives accessing V9704, type of taxable income at the individual level of the data. If the Wife had asset income (V9704=2, 3), the Wife's assets from sources other than business (V6996) was referenced. If V6996>0, then she was allocated that amount in addition to her labor income (V6988), and he was allocated the sum of his labor income from all sources (V6979 through V6981 and V6983 through V6986) plus the sum of all other asset income (V6990 through V6995). Note that if the Wife had some asset income in addition to her assets in V6996, the amount was improperly allocated to the Head, whether or not he himself actually had any assets. If, however, V6996=0, then the entire asset amount was split in half, again regardless of whether the Head himself had any asset income at all.
1981	V30378	for single Heads=Head's and Wife's total taxable income (V7590)

<u>Wave of Data</u>	<u>Variable Number</u>	<u>Noncomparability Problem</u>
	V30378	was computed for married Heads and Wives accessing V9731, type of taxable income at the individual level of the data. If the Head has no asset income (V9731=0,1) and the Wife does have asset income (V9731=2,3), she is allocated all asset income (V7582 through V7588) in addition to any labor income (V7580). If the Head has asset income (V9731=2,3) but the Wife does not (V9731=0,1), then he is allocated all asset income (V7582 through V7587) in addition to the sum of his labor income components (V7571 through V7573 and V7575 through V7578). If both have assets (V9731=2,3 for each), then V7588 is referenced. If V7588>0, then that amount is added to Wife's labor income (V7580). He receives the sum of his labor income components (V7571 through V7573 and V7575 through V7578) plus all other assets (V7582 through V7587). Note that some asset income in V7582 through V7585 belonging to the Wife may have been improperly allocated to the Head. If V7588=0, then half of the sum of all assets (V7582 through V7587) is allocated to each.
1982	V30408	for single Heads=Head's and Wife's total taxable income (V8283)
	V30408	was computed for married Heads and Wives accessing V9759, type of taxable income at the individual level of the data. If the Head has no asset income (V9759=0,1) and the Wife does have asset income (V9759=2,3), she is allocated all asset income (V8275 through V8281) in addition to any labor income (V8273). If the Head has asset income (V9759=2,3) but the Wife does not (V9759=0,1), then he is allocated all asset income (V8275 through V8280) in addition to the sum of his labor income components (V8263 through V8265 and V8267 through V8270). If both have assets (V9759=2,3 for each), then V8281 is referenced. If V8281>0, then that amount is added to Wife's labor income (V8273). He receives the sum of his labor income components (V8263 through V8265 and V8267 through V8270) plus all other assets (V8275 through V8280). Note that some asset income in V8275 through V8286 belonging to the Wife may have been improperly allocated to the Head. If V8281=0, then half of the sum of all assets (V8275 through V8280) is allocated to each.
1983	V30439	for single Heads=Head's and Wife's/"Wife's" total taxable income (V8891)
	V30439	was computed for married Heads and Wives accessing V9790, type of taxable income at the individual level of the data. If the Head has no asset income (V9790=0,1) and the Wife does have asset income (V9790=2,3), she is allocated all asset income (V8883 through V8889) in addition to any labor income (V8881). If the Head has asset income (V9790=2,3) but the Wife does not (V9790=0,1), then he is allocated all asset income (V8883 through V8888) in addition to the sum of his labor income components (V8871 through V8873 and V8875 through V8878). If both have assets (V9790=2,3 for each), then V8889 is referenced. If V8889>0, then that amount is added to Wife's labor income (V8881). He receives the sum of his labor income components (V8871 through V8873 and V8875 through V8878) plus all other assets (V8883 through V8888). Note that some asset income in V8883 through V8886 belonging to the Wife may have been improperly allocated to the Head. If V8889=0, then half of the sum of all assets (V8883 through V8888) is allocated to each.
1984	V30471	for single Heads=Head's and Wife's/"Wife's" total taxable income (V10277)

Wave of Data	Variable Number	<u>Noncomparability Problem</u>
	V30471	was computed for married Heads and Wives accessing V30470, type of taxable income at the individual level of the data. If the Head has no asset income (V30470=0,1) and the Wife does have asset income (V30470=2,3), she is allocated all asset income (V10265-V10268, V10270, V10272, V10274-V10275) in addition to any labor income (V10263). If the Head has asset income (V30470=2,3) but the Wife does not (V30470=0,1), then he is allocated all asset income (V10265-V10268, V10270, V10272, V10274-V10275) in addition to the sum of his labor income components (V10254 through V10256 and V10258 through V10261). If both have assets (V30470=2,3 for each), then V10275 is referenced. If V10275>0, then that amount is added to Wife's labor income (V10263). He receives the sum of his labor income components (V10254 through V10256 and V10258 through V10261) plus all other assets (V10265-V10268, V10270, V10272, V10274-V10275). Note that some asset income in V10265-V10268, V10270, V10272, V10274 belonging to the Wife may have been improperly allocated to the Head. If V10275=0, then half of the sum of all assets (V10265-V10268, V10270, V10272, V10274-V10275) is allocated to each.

ⁱThe 1979-1984 variables indicate the grades of school completed both for nonHead and nonWife individuals either still in school or who have finished their education. The 1968-1978 variables, excepting V30189 and V30114, indicate completed levels only for those who have finished their education. V30189 and V30114, two constructed variables, are comparable with the 1979-1982 variables in that they contain levels of attainment as of the time of the interview for everyone. However, these two variables include values for Heads and Wives, too. There are also some special codes that indicate missing data. See tape codes for details.

^jCategories differ slightly; see tape code for details.

^kField width differs.

^lWeights were completely redone in 1984 for all years. See Section I, Part 5 of this volume on Chapter E of the User Guide for details.

Part 3: Index of the 1984 Employment Sections

This index compares all the variables from the employment sections for Heads (C, D & E) and Wives/"Wives" (F, G & H); if there is a Wife/"Wife" in the Family Unit, V10670=1. The section asked is based on employment status (V10453 and V10455-V10456 for Heads, V10671 and V10673-V10674 for Wives/"Wives").

Many of these variables represent the same or similar questions asked in more than one section. In analysis it might be desirable, for instance, to look at weeks worked in 1983 for all Heads regardless of whether they are currently employed or not. With the tabulations in this index, the user can tell at a glance whether or not the same question was asked of all Heads. Using the example given above, one could generate a new variable on weeks worked in 1983 simply by adding V10561 + V10629 + V10661, since one and only one of these variables contains this information for each Head, the other two contain zeroes, indicating that the question is inappropriate.

Footnotes earmark variables where the wording or framework of the questions varies significantly from those to which they are compared.
