RT13V1 "RELEASE NUMBER" NUM(1.0)

Release Number

For Release 2 we have generated a new distance measure RT13V112 on the Parent/Child File which is a calculation in whole miles between the Main Family place code coordinates and the Parent/Child place code coordinates. Please note this new variable may be obtained under restricted contract only.

For Release 3 we have generated a new categorical distance measure RT13V133 on the Parent/Child File using RT13V112 variable Miles. We have also updated all Person Numbers so that the Parent/Child File correctly merges with the latest 1968-2015 Cross Wave Individual File.

For Release 4 we have corrected a handful of Parent/Child Person Numbers that on the Parent/Child File that were not correctly updated to latest version on the 2015 Parent Identification File.

For Release 5 we have updated all Person Numbers so that the Parent/Child File correctly merges with the latest 1968-2017 Cross Wave Individual File.

For Release 6 we have corrected a handful of cases that had a mismatch between the number of parent records on the Parent/Child File and the summary variable RT13V10 on the family file.

For Release 7 we have updated all Person Numbers so that the Parent/Child File correctly merges with the latest 1968-2019 Cross Wave Individual File.

For Release 8 we have updated all Person Numbers so that the Parent/Child File correctly merges with the latest 1968-2021 Cross Wave Individual File.

RT13V2 "ROSTERS AND TRANSFERS FILE (ID) NUMBER" NUM(5.0)

Rosters and Transfers Interview Number

This number is the merge key between the Rosters and Transfers Family Level File (RT13FAM) and its companion file Rosters and Transfers Parent/Child Level File (RT13PARCHD). There may be some records in the family level file that have no corresponding records on the Parent/Child file however, all records in the Parent/Child file will have a record on the RT Family level file. RT13V2=RT13V61 (Parent/Child file variable). Please note this number is unique on the RT13FAM file but may not be contiguous.

This variable is also the merge key between the Rosters and Transfers Family Level file (RT13FAM) and the 2013 PSID Family Data File (FAM2013ER): RT13V2=ER53002

RT13V5 "WHICH PARENT CHECKPOINT" NUM(1.0)

Which Parent Checkpoint: Head-only FU and Head is 80 years old or older; OR both Head and Wife/"Wife are 80 years old or older

The purpose of this checkpoint is to skip the questions about Head's/Wife's/"Wife's" living parents and any transfers to/from those parents. We have assumed that for most Heads/Wives/"Wives" who have reached age 80, it is rare that they will have any living parents to roster. Cases where RT13V5=1 will have no parent records on the Parent Child file because those questions in the questionnaire section Parent: Roster and Transfers were skipped.

We have assumed that for most Heads/Wives/"Wives" who are 30 years or younger, it is rare that they will have any adult children who are at least 18 years old to roster. Cases where RT13V6=1 will have no child records on the Parent Child file because the questionnaire section Adult Child: Roster and Transfers was skipped.

RT13V11 "FATHER'S STATUS -- HEAD" NUM(1.0)
 Status of Head's father

This is a generated variable created using WHICHPARENT Checkpoint, WHICHPARENT, PR7 Checkpoint and PR7/PR11.

For code 4 those who are 'presumed deceased' are parents of Head/Wives/"Wives" who were too old to be asked this series. For cases where WHICHPARENT CKPT (RT13V5=1), we have presumed their parent is deceased. Cases where WHICHPARENT CKPT (RT13V5=5) and this variable equals 4, their parent was 'reported as deceased'.

'DK' and 'NA; refused' codes on this variable are responses to whether the Head's father is alive (Which Parent). Parents who are marked as 'DK' or 'NA; refused' on vital status will not appear on the RT Parent/Child File. The 'No spouse/partner' category (code 2 of RT13V11) includes responses of 'DK' and 'NA; refused' for Head's father's marital status, which is coded explicitly in RT13V88 on the RT Parent/Child File.
