2013: Family Rosters and Transfers Module - Census Place and Distance File

RT13V60 "RELEASE NUMBER" NUM(1.0)

Release Number

*For Release 2 we have generated a new distance measure RT13V112 which is a calculation in whole miles between the Main Family place code coordinates and the Parent/Child place code coordinates. Please note this new variable may be obtained under restricted contract only.*

*For Release 3 we have generated a new categorical distance measure RT13V133 on the Parent/Child File using RT13V112 variable Miles. We have also updated all Person Numbers so that the Parent/Child File correctly merges with the latest 1968-2015 Cross Wave Individual File.*

*For Release 4 we have corrected a handful of Parent/Child Person Numbers on the Parent/Child file that were not correctly updated to latest version on the 2015 Parent Identification File.*

*For Release 5 we have updated all Person Numbers so that the Parent/Child File correctly merges with the latest 1968-2017 Cross Wave Individual File.*

*For Release 6 we have a handful Parent/Child records that had a mismatch between the number of parent records on the Parent/Child File and the summary variable RT13V10 on the family file. We also make a handful of Person Number changes based on changes to Parent Identification File.*

*For Release 7 we have updated all Person Numbers so that the Parent/Child File correctly merges with the latest 1968-2019 Cross Wave Individual File.*
