[Panel Study of Income Dynamics Workshop](#)

Objectives:

This interactive workshop is geared toward current and prospective users of the Panel Study of Income Dynamics (PSID, psid.org), the world's longest running longitudinal household panel survey. It provides an overview of the general structure and content of the PSID and its supplemental surveys (including the original and ongoing Child Development Supplements, the Transition into Adulthood Supplement, and the Disability and Use of Time Supplement) as well as on recent data collection efforts (the 2013 Rosters & Transfers Module, the 2014 Childhood Retrospective Circumstances Study, the 2016 Wellbeing and Daily Life Supplement, and the 2017 immigrant refresher). The second half of the workshop includes a walk-through of the PSID website, documentation, and data center as well as a question and answer session. The PSID has collected data on a wide range of topics relevant to demography from a nationally representative sample of US families and their descendants since 1968. Content domains include employment, occupations, income, wealth, education, expenditures, health, aging, marriage, childbearing, child development, youth transitions, philanthropy, intergenerational relations, and numerous other topics.
