CS1. Hello. My name is _____ and I work for the Survey Research Center at the University of Michigan. Your family is part of the Family Economics Study. I am calling about the Child Development Supplement that is a piece of the F.E.S. The purpose of this study is to understand how families, schools, and neighborhoods affect children's and adolescents' growth and development. We recently mailed your household an introduction to this study. Today I would like to gather some basic information about the children and their caregivers who are eligible to participate in the study. This will take about 10 minutes to complete, depending on the number of people in your household. We can also schedule a time to conduct the full interview with you or the children's primary caregiver.
