TA211992 "H44 HOW OFTEN PARENTS PUSHED EACH OTHER" NUM(1.0)

H44. (Before you were age 18, how often did [your/[your]] [mother/stepmother/other female relative/other female non-relative/father/stepfather/other male relative/other male non-relative/this person] and [your/[your]] [mother/stepmother/other female relative/other female non-relative/father/stepfather/other male relative/other male non-relative/the 2 people who raised you]) push, grab, or shove each other?
(Would you say often, sometimes, not very often, or never?)

If R says only one parent did this, PROBE: Would you say this happened often, sometimes, not very often, or never?

This variable is a component of the Adverse Childhood Experiences (ACES) - Household Challenges Subscale (TA212339 for Parent #1 and TA212343 for Parent #2) where higher scores are indicative of greater adversity in childhood. The subscale includes 12 items where 1 point is added to the scale for each item unless the response is "No" or "Never". These variables together with TA211936, TA211941, TA211946, TA211951, TA211956 and TA211962 make the subscale for Parent #1, while these variables together with TA211963, TA211968, TA211973, TA211978, TA211983 and TA211989 make the subscale for Parent #2.

TA212015 "H59 HOW OFTEN NO SAFE PLACE TO STAY" NUM(1.0)

H59. (Before you were age 18,) how often did you not have a safe place to stay? (Would you say often, sometimes, not very often, or never?)

This variable is a component of the Adverse Childhood Experiences (ACES) - Neglect Subscale (TA212341 for Parent #1 and TA212345 for Parent #2) where higher scores are indicative of greater adversity in childhood. The subscale includes 7 items where 1 point is added to the scale if the non-missing value is 3 or 4. These 4 items together with TA212001, TA212002 and TA212003 make the subscale for Parent #1 while these 4 items together with TA212009, TA212010 and TA212011 make the subscale for Parent #2.

TA212069 "H83A HOW OFTEN FELT NERVOUS IN PAST MO" NUM(1.0)

H83a. Now I would like to ask you some questions about how you have been feeling in the past month. During the past 30 days, how often did you feel nervous? Would you say all of the time, most of the time, some of the time, a little of the time, or none of the time?

This variable is a component of the Non-Specific Psychological Distress-K6 Scale (TA212321).

This scale is the sum of all non-missing responses to 6 items, where a score of 13 or higher indicates sensitivity around the threshold for the clinically significant range of the distribution of nonspecific distress.

TA212069	H83a	How Often Felt Nervous in Past Month
TA212070	H83b	How Often Felt Hopeless in Past Month
TA212071	H83c	How Often Felt Restless in Past Month
TA212072	H83d	How Often Felt Everything an Effort in Past Month
TA212073	H83e	How Often Felt Too Sad in Past Month
TA212074	H83f	How Often Felt Worthless in Past Month

To create the scale, the items are rescored as follows:

A response of

- 'All of the Time' = 4 points
- 'Most of the Time' = 3 points
- 'Some of the Time' = 2 points
- 'A Little of the Time' = 1 point
- 'None of the Time' = 0 points

The scores are then summed; a score of 13 or higher indicates sensitivity around the threshold for the clinically significant range of the distribution of nonspecific distress.

This variable may be based on fewer than the above six variables. Items containing "don't know" and "refused" responses are not included in the calculation of the scale.

In addition to the K-6 Scale components, item H83g. measures the magnitude of effect on daily life.

This scale was developed by Dr. Ronald Kessler, Professor of Healthcare Policy at Harvard Medical School.

TA212072 "H83D HOW OFTEN FELT EVERYTHING EFFORT" NUM(1.0)

H83d. (During the past 30 days, how often did you...)

Feel that everything was an effort?

(Would you say all of the time, most of the time, some of the time, a little of the time, or none of the time?)

This variable is a component of the Non-Specific Psychological Distress-K6 Scale (TA212321).

This scale is the sum of all non-missing responses to 6 items, where a score of 13 or higher indicates sensitivity around the threshold for the clinically significant range of the distribution of nonspecific distress.

TA212069	H83a	How Often Felt Nervous in Past Month
TA212070	H83b	How Often Felt Hopeless in Past Month
TA212071	H83c	How Often Felt Restless in Past Month
TA212072	H83d	How Often Felt Everything an Effort in Past Month
TA212073	H83e	How Often Felt Too Sad in Past Month
TA212074	H83f	How Often Felt Worthless in Past Month

To create the scale, the items are rescored as follows:

A response of

'All of the Time' = 4 points

'Most of the Time' = 3 points

'Some of the Time' = 2 points

'A Little of the Time' = 1 point

'None of the Time' = 0 points

The scores are then summed; a score of 13 or higher indicates sensitivity around the threshold for the clinically significant range of the distribution of nonspecific distress.

This variable may be based on fewer than the above six variables. Items containing "don't know" and "refused" responses are not included in the calculation of the scale.

In addition to the K-6 Scale components, item H83g. measures the magnitude of effect on daily life.

This scale was developed by Dr. Ronald Kessler, Professor of Healthcare Policy at Harvard Medical School.

TA212177 "K1A HOW OFTEN TREATED W/ LESS COURTESY" NUM(1.0)

K1a. Now I would like to talk about things that can happen in your day-to-day life. In your day-to-day life, how often have any of the following things happened to you?

You are treated with less courtesy than other people.

Would you say this never happens to you, happens less than once a year, a few times a year, a few times a month, at least once a week, or almost every day?

This variable is a component of the Everyday Discrimination Scale (TA212323). The scale is the average of all non-missing responses to 6 items each scored 1-6, where higher scores are indicative of greater levels of discrimination.

TA212204 "K9A HOW OFTEN DID SOMETHING DANGEROUS" NUM(1.0)

K9a. Now please think about the last 6 months.

About how often in those 6 months did you do something you knew was dangerous just for the thrill of it?

Would you say never, once, 2-3 times, 4-6 times, 7-10 times, 11-20 times, or 21 or more times?

This variable is a component of both the Risky Behaviors Scale (TA212324) and Sensation Seeking Scale (TA212325). The Risky Behaviors scale is the average of all non-missing responses to these 5 items. The items are each scored 1-7 where higher scores are indicative of more risk taking:

TA212206	K9b	How Often Damaged Public Property
TA212207	K9c	How Often Got into Physical Fight
TA212208	K9d	How Often Drove When Drunk or High
TA212209	K9e	How Often Rode with Drunk Driver

The Sensation Seeking Scale is the average of non-missing values for these 2 items. The items are each scored 1-7 where higher values indication more sensation seeking behaviors.

TA212204	K9a	How Often Did Something Dangerous
TA212205	K9a2	How Often Did Something Exciting

The origin of the scales are from MSALT Risky Behaviors, Slater, M. D. (2003). TA212207 "K9C HOW OFTEN GOT INTO PHYSICAL FIGHT" NUM(1.0)

K9c. (About how often in those 6 months did you...)

Get into a physical fight?

(Would you say never, once, 2-3 times, 4-6 times, 7-10 times, 11-20 times, or 21 or more times?)

This variable is a component of the Risky Behaviors Scale (TA212324).

It is the average of all non-missing responses to these 5 items. The items are each scored 1-7 where higher scores are indicative of more risk taking:

TA212204	K9a	How Often Did Something Dangerous
TA212206	K9b	How Often Damaged Public Property

TA212383 "SCALE: BODY MASS INDEX"

NUM(4.1)

Body Mass Index

This variable was calculated as follows:

$$BMI = [(Weight\ in\ Pounds) / (Height\ in\ inches) \times (Height\ in\ inches)] \times 703$$

Height and weight values were taken from the following questions:

- TA212063 H77. Weight--Total Pounds
- TA212065 H78. Height--Feet Component
- TA212066 H78. Height--Inches Component

Any extreme results, i.e., BMI of less than 15.0 or greater than 59.9, were recoded to 99, since in such cases the accuracy of height and/or weight values is highly doubtful.

Body mass index (BMI) is a measure of body fat based on height and weight that applies to both adult men and women. BMI categories are:

- Normal weight = 18.5-24.9*
- Overweight = 25.0-29.9*
- Obese = BMI of 30.0 or greater*

TA212393 "URBANICITY"

NUM(2.0)

Beale-Ross Rural-Urban Continuum Code for Residence at the Time of the TA Interview

This variable is suppressed (filled with zeroes) in the public release file to protect the anonymity of respondents. The data are available in a separate file to qualified users under special contractual arrangements with the PSID; for more information, contact us at PSIDhelp@umich.edu.

These codes are based on matches to the FIPS state and county codes against the 2013 Rural-Urban Continuum Codes published by USDA downloaded from <https://www.ers.usda.gov/data-products/rural-urban-continuum-codes/.aspx>

The 2013 Rural-Urban Continuum Codes form a classification scheme that distinguishes metropolitan counties by the population size of their metro area, and nonmetropolitan counties by degree of urbanization and adjacency to a metro area. The official Office of Management and Budget (OMB) metro and nonmetro categories have been subdivided into three metro and six nonmetro categories. Each county in the U.S. is assigned one of the 9 codes. This scheme allows researchers to break county data into finer residential groups, beyond metro and nonmetro, particularly for the analysis of trends in nonmetro areas that are related to population density and metro influence. The Rural-Urban Continuum Codes were originally developed in 1974. They have been updated each decennial since (1983, 1993, 2003, 2013), and slightly revised in 1988. Note that the 2013 Rural-Urban Continuum Codes are not directly comparable with the codes prior to 2000 because of the new methodology used in developing the 2000 metropolitan areas.
