Annual Need Standard in 1969

Single person	- add 20%
Two persons	- add 10%
Three persons	- add 5%
Four persons	- no change
Five persons	- deduct 5%
Six or more persons	- deduct 10%

An additional adjustment for diseconomies of small households (in rent, etc.) was made as follows for the Annual Need Standard:

xx.xx Ratio of 1969 family net real income net
of cost of housing to 1969 family food
need standard

It is postulated that housing is a lumpy
expenditure which is not proportional to
family size. Income remaining after this
expense may be considered to be applicable to
expenses which are more nearly proportional
to family size. The family food standard does
not incorporate some of the economies of
scale which the family need standard does,
and is thus the appropriate reference
standard for this income measure. However,
the food standard is lower than the need
standard by roughly a factor of 3, so
variable 454 will have substantially greater
numerical value than the other income/needs
variables
