TABLE OF CONTENTS

| | |
|--|-----|
| Section III: Indexes | 1 |
| Part 1: Numerical Index of Twenty-Two-Year Family-Level Data | 1 |
| Part 2: Numerical Index of Twenty-Two-Year Individual-Level Data | 97 |
| Part 3: Index of the 1989 Employment Sections | 108 |

SECTION III INDEXES

Three variable indexes which attempt to organize the data for easy reference are included in this volume. Part 1 is a list of the 1989 family-level data in order by 1989 variable number, with comparable 1968-1988 variables included for each item. Next, Part 2 is an individual-level index similar in format to the family-level index just described. Please note that all individual-level variable numbers are valid only for the twenty-two-year merged tapes.¹ Part 3, the third index, compares questions from questionnaire Sections B and C (Head's employment), and Sections D and E (Wife's/"Wife's" employment) for user convenience. Complete indexes of all PSID variables from every wave are located in Volume III, are arranged alphabetically by content, and include tape locations and field widths for each variable.

Although all of these indexes have been checked and double-checked, the possibility exists that errors may still remain. Therefore, we cannot warn the user strongly enough to please use these only in conjunction with the tape codes.

The indexes have been reformatted for 1989. Due to limitations in paper width, we have been forced to use two sets of lines for each data item. The first set of variable numbers, for 1983-1989, is printed in bold type, but the second set, for 1968-1982, is not.

These indexes list variable numbers only. For those who are using tape location format, a listing of the dictionary (found on the first file, preceding the data, on a standard OSIRIS data set) will provide a quick reference of the tape locations corresponding to each variable number.²

Part 1: Numerical Index of Twenty-Two-Year Family-Level Data

This index lists the 1989 family-level variables in numerical order and includes comparable 1968-1988 variables. Note that both the 1976 and 1985 Heads and Wives/"Wives" interview data are listed in the 1976 and 1985 columns respectively.

Where blanks occur, no similar data item from earlier years exists for that particular 1989 variable.³ Data items not asked in 1989 are also not included. Thus, this index does not contain all the cross-year family-level variables. Small differences, such as coding formats or field width variations, have been annotated; the lower case alphabetic characters appearing directly beneath the variables to which they refer indicate footnoted differences. These footnotes are identical with those used for the alphabetical family-level index in Volume III. For convenience, a list of the footnotes is also located at the end of this index.

¹Do not use the variable numbers from this individual-level index on any other cross-year tapes. These numbers are unique to the 1968-1989 cross-year data only.

²Be sure to use the cross-year family-individual dictionary that matches your cross-year family-individual data.

³The exceptions are the employment-related variables that were coded only once for all Heads (1968 and 1969 data) or all Wives/"Wives" (1968-1975, 1977 and 1978 data) regardless of employment status. These are listed with the appropriate

All variables listed herein should be comparable for analysis purposes with, perhaps, some recoding. Again, despite careful checking, errors may exist, and the user should consult the tape codes before doing analysis.

Please send information regarding errors to:

Tecla Loup
 Panel Study of Income Dynamics

Family-level variables are associated with interviewing years as follows:*

Variables 1-439 1968 family data

Variables 441-909 1969 family data that precede change variables
 (includes raw data and most generated variables)

Variables 910-989 1968-69 change variables**

Variables 990-998,
 1008-1016 1969 family data that follow change variables
 (includes deciles and a few other variables)

Variables 999-1007 calculated in 1969 for responding 1969 families only.
 Values are for their 1968 data.

Variables 1101-1624, 1766-
 1767 1970 family data

Variables 1625-1627 1969 labor market data, based on 1970 sample; i.e.,
 gathered in 1970 for responding 1970 families, but
 values are for their 1969 data

Variables 1701-1748 1970 Census data on county. See Wave VII (1974)
 documentation, pp. 154-161, for details.

Variables 1749-1763 Consumer price indexes for each area for each year
 1968-1972, based on 1974 sample, i.e., calculated in
 1974 for responding 1974 families but values are for
 their 1968-1972 data. See Wave VII (1974)
 documentation, pp. 162-166, for details.

Variables 1801-2346 1971 family data

Variables 2401-2980 1972 family data

Variables 3001-3311 1973 family data

Variables 3401-3731,
 1764-1765 1974 family data

Variables 3801-4232 1975 family data

Variables 4301-4707 1976 Head's interview data

Variables 4708-5027 1976 Wife's interview data

Variables 5028-5114 1976 other family data

Variables 5201-5672, 5681-
 5682 1977 family data

Variables 5672-5679 Change in marital status variables, based on 1977
 sample; i.e., their 1968-1976 data calculated in 1977
 for responding 1977 families but values are for their
 1968-1976 data.

1989 variables from the sections asked about employed Heads and Wives/"Wives", but not with the questions for unemployed Heads and Wives/"Wives".

Variables 5701-6221 1978 family data
Variables 6301-6815 1979 family data
Variables 6901-7457 1980 family data
Variables 7501-8111 1981 family data
Variables 8201-8739 1982 family data
Variables 8801-9433 1983 family data
Variables 10001-11079 1984 family data
Variables 11101-12446 1985 family data
Variables 12501-13687 1986 family data
Variables 13701-14737 1987 family data
Variables 14801-16208 1988 family data
Variables 16301-17612 1989 family data

* Skips in numerical sequence are due to dummy variables separating each year's data.

** These variables are described but not listed individually in this index.

NONCOMPARABILITY NOTES

- a No missing data allowed for this variable.
- b In 1972 there are four codes for this variable. However, they may be combined to produce comparable categories.
- c Data on religious preference are incomplete for families with new Heads in 1978. See the notes in the Wave XVI (1983) Documentation. Section II, Part 1, under V9357 and V9358 or refer to the User Guide.
- d Code is truncated; see tape code.
- d If missing data were coded for the 1984 versions of the 1984 wealth components (V10899-V10953), no amounts were imputed, as they were for 1989. We included imputed versions of the 1984 data with the 1989 family data (V17589-V17608).
- e A code for missing data was allowed for this variable, but in other years missing data were assigned.
- f This variable cannot be made comparable to the other years' variables.
- g Field widths differ. Truncation of some variables in this list is necessary. See tape codes.
- h In 1968, illness hours were calculated differently; only eight hours per day were allowed after the first eight weeks, as opposed to twelve in subsequent years.
- i Alcohol and cigarette costs were asked in these years and subtracted from the food bill if the respondent said they were included. Therefore, these variables may not be strictly comparable.
- j There was a greater possibility of double counting of food subsidies for total food expenditures in earlier years, which was largely eliminated beginning in 1972 with revised question formats. Since 1979 (reflected in 1980 and later years' data), food stamps have cost nothing, so errors should be negligible.
- k This variable occasionally includes Others; thereafter only Head and/or Wife were included.
- l Dates differ; check tape codes.
- m This is a bracket variable. If field amounts only were coded in other years, they may be bracketed for comparability.
- n Coding structure and/or categories differ; see tape codes for details.
- o Combines information on Heads (or Wives/"Wives") with different employment statuses. In other years, separate variables were coded for the employed, the unemployed, and those out of the labor force. See questionnaires and/or tape codes for details on who was asked what.
- p Code 999 includes those who do not have an hourly wage (e.g., salaried, paid by piecework, or on commission). The other variables in the list include such persons in the 000 code.
- q This variable is one of two mentions coded from the responses or is a double-mention variable (a two-digit variable with the first digit equalling the data value for the first mention and the second equalling the data value for the second mention). Both first and second mention variables may or may not be priority coded. See tape codes for details.
- r Has extra and/or alternate components; see tape code descriptions for details.
- s For these years, code 9, not ascertained, includes cases where data are missing on whether lump sums were received or not. In all successive waves, however, such cases are included in the code category 0, "inappropriate".
- t Not asked of retired, housewives, students, or permanently disabled Heads in 1968. From 1969 onward, only new Heads were asked these questions. Therefore, these variables provide no information for Heads who have remained the same since 1968 and who were not in the labor force in 1968. From the 1968 through the 1975 waves, code category 0 included such cases. From the 1976 wave

NONCOMPARABILITY NOTES

through the present, such cases have been recoded as 9, not ascertained, for the filter question.

- u Does not include adjustment for farmers.
- v In 1968, 9s were coded instead of 0s when Head did no work for money and therefore had no hourly earnings.
- w Contains some components which were not available in later years. Thereafter, new components were added. See tape codes for details.
- x Bracket breakpoints differ from later years'.
- y Note that these variable are not comparable with each other. For a discussion of weights, see Section I, Part 5 of this (1989) Documentation or the User Guide. Weights for all years were completely recalculated in 1989.
- z Extra value of food received with food stamps was added into this variable in 1972 if V2482=5.
- aa This variable was reported by the Head of the family, whereas the variable annotated pp is taken from the Wife's interview. No attempt has been made to reconcile disparities in reporting between these two variables since comparability with other years could be affected.
- bb From 1968-1974, V481, V1154, etc. report annual housework hours for Wife or unmarried Head, and V483, V1156, etc. are those for married male Heads.
- cc These variables were edited to subtract \$100 for insurance premiums if they were included in the amounts reported. Property taxes were imputed and then also subtracted if R said they were included.
- dd There were no missing data on property tax variables in 1968-1975 because they were imputed. Refer to tape codes for those years for formula.
- ee In 1975, these variables include both Heads employed by others and those who work for someone else as well as themselves.
- ff From 1976 on, number of months was coded. In previous years, a bracket code on number of years was used, and only the one question, "How long have you had your present job?" was asked. For those earlier years, overlapping exists between length of present employment and length of present job for some cases.
- gg For calculating this variable, V471, 10 cents per mile was used. In later years, 5 cents per mile was assumed.
- hh From 1976 on, separate questions were asked of employees receiving different forms of compensation. Previously, all were asked to calculate per-hour wage rates.
- ii In 1981 and 1983, costs of separate components of utilities, such as electricity, gas and water, were asked separately. Thus, the total annual utilities variable was generate by adding those components and no assignments were made.
- jj Background section variable, asked only of new Heads/Wives/"Wives". Data values for cases with same Heads/Wives/"Wives" as in the previous year have been carried forward from the time when these persons most recently became new Heads/Wives or when the questions were reasked of all Heads/Wives/"Wives". Some of these variables may require updating. See the User Guide or this Documentation, Section II, Part 1 (family tape code) variable descriptions.
- kk In 1976, these variables included both those working for someone else and those working for someone else and self (V4461=1 and 2).
- ll These variables have been generated since 1977 for comparability with 1968-1976 data. See the User Guide for further details.
- mm Federal Income Tax Variables have been generated by computer beginning in 1980. For a description and details, see the User Guide.

NONCOMPARABILITY NOTES

- nn For these variables, questions were asked separately of Head, Wife/"Wife" and Others for Medicare, Medicaid and similar programs. Filter questions were used for receipt of Social Security, ADC/AFDC, SSI and other welfare, whereas in later years, Medicare/Medicaid benefits questions were asked of all families.
- oo 1968-1972 data have no comparable variable. This can be created, however, by multiplying the annual value of home if rented by .1 by the work for housing code and subtracting it and time spent on care repairs from home production hours. Thus, the formula for this using 1972 data would be:
- $$V2438-V2421-.1(V2433XV2431)$$
- The annual value of home if rented equals zero except for those who neither own nor rent their homes; this is a small fraction of the sample.
- pp These variables are coded directly from Wives/"Wives'" questionnaires, asked in 1976 and 1985, and reported by Wives/"Wives" themselves.
- qq In 1968, all housework hours were imputed. See the Waves I-V (1968-1982) Documentation, Volume II, Section II, code description for V59.
- rr Adding V520 to these components allows comparability with other years. See the Waves I-V (1968-1972) Documentation, Volume II, Section II, for further details.
- ss These variables were first generated in 1978 for the 1978 sample and on the basis of the 1978 Head's family history. Therefore, for a few cases, they may not reflect the 1968 through 1977 family history of a current Head who shares the 1978 ID number but not one or more ID numbers from 1968-1977. See the User Guide for an explanation of this phenomenon.
- tt Hours spent in public schools were not included in these variables. Also, the 1979 variables for child care hours are only for the youngest child under 12.
- uu Hours of help from others outside the FU were included; see tape code.
- vv This amount was assigned for all cases in 1968; see the Waves I-V (1968-1972) Documentation, Volume II, Section II (Family Tape Code) for details.
- ww Amount saved on additions and repairs is not included.
- xx These variables are in the square root form. The square root form makes each of these variables linearly homogeneous in its two components.
- yy These data items are for the family's 1968 and 1974 counties of residence, even though the variables themselves are located between the 1969 and 1970 data on the cross-year tape. Details of the codes are printed in the Wave VIII (1974) Documentation, pp. 151-166.
- zz These variables are less accurate than the variables below. The BRR stratum and BRR SECU should be used in place of V9410.
- aaa Data are missing for many cases. See 1987 Documentation, Section I, Part 5, "Updating Employment History" for an explanation. We suggest that users follow a procedure similar to that used by us in 1987 to correct these 1986 variables.
- bbb Because of changes in Federal income tax laws, it is possible that Heads and Wives/"Wives" may not claim themselves as exemptions because they are dependents of some other family member. Thus, a code of zero has been added to this variable from the 1988 wave onward.
- ccc The variables for Household ID and primacy of the FU within the household were added to the 1969 through 1981 family data years after those family-level tapes were released. The variables are included on the 1968-1989 and later cross-year versions of the data. Codes are located in Section I, Part 5 of Volume I of the Wave XXII (1989) Documentation.

NONCOMPARABILITY NOTES

ddd Values for the 1984 interviewing year versions of the 1984 wealth components (V10898-V10926) were not imputed as they were for the 1989 wealth variables. We have included imputed versions of the 1984 variables with the 1989 family data for all 1989 families (V17589-V17608).

eee For confidentiality reasons, the values for this variable have been converted to zeroes for each case.

Part 2: Numerical Index of Twenty-Two-Year Individual-Level Data

The 1989 individual-level variables are listed in numerical order, with the comparable 1968-1988 variables included. Where blanks occur, no similar data item exists in previous years for that particular 1989 variable. Also, some data items from previous years are excluded from this index since no comparable variable exists for 1989. Thus, this index does not include all the cross-year individual-level variables. The alphabetical index of the individual-level variables (Part 2, Appendix 1, in Volume III of this 1989 Documentation), includes all such variables. There are some differences between years in field width and coding format among the variables listed here, which have been annotated. The lower case alphabetic characters indicating such differences appear directly below the variables to which they refer. A list of the footnotes appears at the end of this index.

These variable number ranges have changed for the 1968-1989 cross-year tape, as sex of individual has been removed from each year's individual data and is now included with the summary variables (V32000). The introduction to the individual-level tape code in Section II, Part 2 of Volume 1 lists the old 1968-1988 variable numbers with their corresponding new 1968-1989 variable numbers.

Tape locations always differ from one cross-year tape to the next. If you are using tape locations, be sure that you use this index ONLY with the 1968-1989 cross-year file or a subset thereof. Below are the ranges for each year's individual portion of the data on the twenty-two-year cross-year tape.

| | |
|---------------|----------------------|
| V30001-V30019 | 1968 individual data |
| V30020-V30042 | 1969 individual data |
| V30043-V30066 | 1970 individual data |
| V30067-V30090 | 1971 individual data |
| V30091-V30116 | 1972 individual data |
| V30117-V30137 | 1973 individual data |
| V30138-V30159 | 1974 individual data |
| V30160-V30187 | 1975 individual data |
| V30188-V30216 | 1976 individual data |
| V30217-V30245 | 1977 individual data |
| V30246-V30282 | 1978 individual data |
| V30283-V30312 | 1979 individual data |
| V30313-V30342 | 1980 individual data |
| V30343-V30372 | 1981 individual data |
| V30373-V30396 | 1982 individual data |
| V30399-V30428 | 1983 individual data |
| V30429-V30462 | 1984 individual data |
| V30463-V30497 | 1985 individual data |
| V30498-V30534 | 1986 individual data |
| V30535-V30569 | 1987 individual data |
| V30570-V30605 | 1988 individual data |
| V30606-V30641 | 1989 individual data |
| V31996-V32049 | Summary variables |

Note that the summary variables (V31996-V32049) are listed in the column for 1989, although these variables have been generated using data from other years, as well. It is simply more convenient to list them in this fashion.

NONCOMPARABILITY NOTES

- a In 1968, no dates of moves out were coded. See tape code.
- b The codes for these variables are the reverse of those for the other years.
- c Codes for type of income have changed very much over the years. One can extract at least whether income is labor vs. asset vs. transfer from the variables listed in the index for earlier years. See tape codes for further details.
- d Missing data were allowed in 1968-1974 on this variable; from 1975 onward, assignments were made and accuracy codes were used. See footnote h below.
- e In 1969-1972, the code merely states whether the individual has a disability or the individual needs extra care. For 1976 and 1977, only one question was asked, ascertaining whether this person requires extra care or is disabled. For 1978, however, the disability sequence is much more detailed for each individual.
- f The 1983 and later years' codings of relationship to head are much more detailed than in previous years. Eventually we plan to recode relationship to head for 1968-1982 in the same detail.
- g In 1974, transfer income was defined only as including or not including welfare payments. In 1975 and 1976, transfer income type was divided into the various components that are normally coded on this study. From 1977 on, this variable has been further divided to separate alimony from child support and unemployment from workers compensation, and of necessity the code becomes a two-digit one. Also, the codes assigned to each category differ slightly. Please check tape code before using.
- h Due to a growing demand for more detailed information on individual incomes, each person's income was split into taxable and transfer amounts from 1975 on. By adding these two components, new variables can be created that will be comparable to the individual's total money income of the 1968 through 1974 waves. It was also thought unnecessary to continue the use of missing data codes on individual-level incomes and work hours, as had been done since 1968, because editors must assign amounts for family-level totals anyway. Therefore, each income and hours variable has its own accuracy code from 1975 on. For comparability, one could exclude all cases where an assignment was made from 1975 through the present and cases with missing data in 1968-1974. Great care must be exercised in attempting cross-year comparisons for Heads and/or Wives/"Wives" using the individual-level work hours and money income variables. The following table is a year-by-year synopsis of the rules for creation of these variables. In general, since for Heads and Wives/"Wives" all the income and work hours information is available in a more correct and detailed form at the family level, a recoding program should be utilized to insert those data rather than using information found in the individual portion of the data records--THIS APPLIES TO HEADS AND WIVES/"WIVES" ONLY.
- 1968 V30012: LABOR income only for Heads and Wives.
- 1969 V30033: LABOR income only for Heads and Wives.
- 1970 V30057: LABOR income only for Heads and Wives.
 V30058: This information should have been transferred in for Heads and Wives, but was not. Instead, the field is filled with nines. Use V1138 for Head's work hours. Use V1148 for Wife's work hours.
- 1971 V30081: LABOR income only for Heads and Wives.
 V30082: This information should have been transferred in for Heads and Wives, but was not. Instead, the field is filled with nines. Use V1839 for Head's work hours. Use V1849 for Wife's work hours.
- 1972 V30106: LABOR income only for Heads and Wives.
- 1973 V30130: LABOR income only for Heads and Wives.
- 1974 V30152: LABOR income only for Heads and Wives.
- 1975 V30173: for single Heads=Head's and Wife's total taxable income (V3872); for married Heads=(Head's and Wife's total taxable income (V3872)-Wife's labor income (V3865)-Head's labor income (V3863))/2 + Head's labor income (V3863), whether or not he himself actually had any of the asset income; for Wives=(Head's and Wife's total taxable income (V3872)-(Head's labor income (V3863)-Wife's labor income (V3865))/2 + Wife's labor income (V3865), whether or not she herself actually had any of the asset

NONCOMPARABILITY NOTES

income.

V30177: For Heads with no Wife in the FU and where the accuracy code of Head's ADC/AFDC income (V3878) was greater than or equal to the accuracy code for Head's other transfers (V3888), the work hours were not properly transferred in. Instead, the field is filled with nines. Use the family-level V3823 for Head's work hours.

1976 V30202: For single Heads=Head's and Wife's total taxable income (V4386); for married Heads=(Head's and Wife's total taxable income (V4386)-Wife's labor income (V4379)-Head's wages (V4373))/2+Head's wages (V4373), whether or not he himself actually had any of the asset income. Additionally, note that amounts here include only half of his labor income from sources other than wages; for Wives=(Head's and Wife's total taxable income (V4386)-Head's wages (V4373)-Wife's labor income (V4379))/2+Wife's labor income (V4379), whether or not she herself actually had any of the asset income. Additionally, amounts here include half of Head's labor income from sources other than wages.

1977 V30231: For single Heads=Head's and Wife's total taxable income (V5297); for married Heads=(Head's and Wife's total taxable income (V5297)-Wife's labor income (V5289)-Head's wages (V5283))/2+Head's wages (V5283), whether or not he himself actually had any of the asset income. Additionally, note that amounts here include only half of his labor income from sources other than wages; for Wives=(Head's and Wife's total taxable income (V5297)-Head's wages (V5283)-Wife's labor income (V5289))/2+Wife's labor income (V5289), whether or not she herself actually had any of the asset income. Additionally, amounts here include half of Head's labor income from sources other than wages.

1978 V30268: For single Heads=Head's and Wife's total taxable income (V5796); was computed for married Heads and Wives accessing V30267, type of taxable income at the individual level of the data. If Wife had asset income (V30267=2,3), the Wife's assets from sources other than business (V5795) was referenced. If V5795>0, then she was allocated that amount in addition to her labor income (V5788), and he was allocated the sum of his labor income from all sources (V5780 through V5782 and V5784 through V5786) plus the sum of all other asset income (V5790 through V5794). Note that if the Wife had some business asset income in addition to her assets from other sources, the amount was improperly allocated to the Head, whether or not he himself actually had any assets. If, however, V5795=0, then the entire asset amount was split in half, again regardless of whether the Head himself had any asset income at all. If the Wife had no asset income (V30267=0, 1), then the Head was properly allocated all asset income (V5790 through V5794), as well as his labor income.

1979 V30298: For single Heads=Head's and Wife's total taxable income (V6408); was computed for married Heads and Wives accessing V30297, type of taxable income at the individual level of the data. If Wife had asset income (V30297=2, 3), the Wife's assets from sources other than business (V6406) was referenced. If V6406>0, then she was allocated that amount in addition to her labor income (V6398), and he was allocated the sum of his labor income from all sources (V6389 through V6391 and V6393 through V6396) plus the sum of all other asset income (V6400 through V6405). Note that if the Wife had some asset income in addition to her assets in V6406, the amount was improperly allocated to the Head, whether or not he himself actually had any assets. If, however, V6406=0, then the entire asset amount was split in half, again regardless of whether the Head himself had any asset income at all. If the Wife had no asset income (V30297=0-1), then the Head was properly allocated all asset income (V6400 through V6405), as well as his labor income.

1980 V30328: For single Heads=Head's and Wife's total taxable income (V6998); was computed for married Heads and Wives accessing V30327, type of taxable income at the individual level of the data. If the Wife had asset income (V30327=2, 3), the Wife's assets from sources other than business (V6996) was referenced. If V6996>0, then she was allocated that amount in addition to her labor income (V6988), and he was allocated the sum of his labor income from all sources (V6979 through V6981 and V6983 through V6986) plus the sum of all other asset income (V6990 through V6995). Note that if the Wife had some asset income in addition to her assets in V6996, the amount was improperly allocated to the Head, whether or not he himself actually had any assets. If, however, V6996=0, then the entire asset amount was split in half, again regardless of whether the Head himself had any asset income at all.

1981 V30358: For single Heads=Head's and Wife's total taxable income (V7590); was computed for married Heads and Wives accessing V30357, type of taxable income at the individual level of the data. If the Head has no asset income (V30357=0, 1) and the Wife does have asset income (V30357=2, 3), she is allocated all asset income (V7582 through V7588) in addition to any labor income (V7580). If the Head has asset income (V30357=2, 3) but the Wife does not (V30357=0, 1), then he is allocated all asset income (V7582 through V7587) in addition to the sum of his labor income components (V7571 through V7573 and V7575 through V7578). If both have assets (V30357=2, 3 for each), then V7588 is referenced. If V7588>0, then that amount is added to Wife's labor income (V7580). He receives the sum of his labor income components (V7571 through V7573 and V7575 through V7578) plus all other assets (V7582 through V7587). Note that some asset income in V7582 through V7585 belonging to the Wife may have been

NONCOMPARABILITY NOTES

improperly allocated to the Head. If V7588=0, then half of the sum of all assets (V7582 through V7587) is allocated to each.

1982 V30386: For single Heads=Head's and Wife's total taxable income (V8283); was computed for married Heads and Wives accessing V30385, type of taxable income at the individual level of the data. If the Head has no asset income (V30385=0, 1) and the Wife does have asset income (V30385=2, 3), she is allocated all asset income (V8275 through V8281) in addition to any labor income (V8273). If the Head has asset income (V30385=2, 3) but the Wife does not (V30385=0, 1), then he is allocated all asset income (V8275 through V8280) in addition to the sum of his labor income components (V8263 through V8265 and V8267 through V8270). If both have assets (V30385=2, 3 for each), then V8281 is referenced. If V8281>0, then that amount is added to Wife's labor income (V8273). He receives the sum of his labor income components (V8263 through V8265 and V8267 through V8270) plus all other assets (V8275 through V8280). Note that some asset income in V8275 through V8286 belonging to the Wife may have been improperly allocated to the Head. If V8281=0, then half of the sum of all assets (V8275 through V8280) is allocated to each.

1983 V30415: For single Heads=Head's and Wife's/"Wife's" total taxable income (V8891); was computed for married Heads and Wives accessing V30414, type of taxable income at the individual level of the data. If the Head has no asset income (V30414=0, 1) and the Wife does have asset income (V30414=2, 3), she is allocated all asset income (V8883 through V8889) in addition to any labor income (V8881). If the Head has asset income (V30414=2, 3) but the Wife does not (V30414=0, 1), then he is allocated all asset income (V8883 through V8888) in addition to the sum of his labor income components (V8871 through V8873 and V8875 through V8878). If both have assets (V30414=2, 3 for each), then V8889 is referenced. If V8889>0, then that amount is added to Wife's labor income (V8881). He receives the sum of his labor income components (V8871 through V8873 and V8875 through V8878) plus all other assets (V8883 through V8888). Note that some asset income in V8883 through V8886 belonging to the Wife may have been improperly allocated to the Head. If V8889=0, then half of the sum of all assets (V8883 through V8888) is allocated to each.

1984 V30445: For single Heads=Head's and Wife's/"Wife's" total taxable income (V10277); was computed for married Heads and Wives accessing V30444, type of taxable income at the individual level of the data. If the Head has no asset income (V30444=0, 1) and the Wife does have asset income (V30444=2, 3), she is allocated all asset income (V10265-V10268, V10270, V10272, V10274-V10275) in addition to any labor income (V10263). If the Head has asset income (V30444=2, 3) but the Wife does not (V30444=0, 1) then he is allocated all asset income (V10265-V10268, V10270, V10272, V10274-V10275) in addition to the sum of his labor income components (V10254 through V10256 and V10258 through V10261). If both have assets (V30444=2, 3 for each), then V10275 is referenced. If V10275>0, then that amount is added to Wife's labor income (V10263). He receives the sum of his labor income components (V10254 through V10256 and V10258 through V10261) plus all other assets (V10265-V10268, V10270, V10272, V10274-V10275). Note that some asset income in V10265-V10268, V10270, V10272, V10274 belonging to the Wife may have been improperly allocated to the Head. If V10275=0, then half of the sum of all assets (V10265-V10268, V10270, V10272, V10274-V10275) is allocated to each.

1985 V30480: For single Heads=Head's and Wife's/"Wife's" total taxable income (V11419); for married Heads, total taxable income (V11419)-Wife's/"Wife's" Labor Income (V11404)-Wife's/"Wife's" Share of Asset Income (V11410)-Wife's/"Wife's" Other Asset Income (V11417) gives his share of total taxable income. For Wives/"Wives", Wife's/"Wife's" Labor Income (V11404)+Wife's/"Wife's" Share of Asset Income (V11410)+Wife's/"Wife's" Other Asset Income (V11417) gives her share of total taxable income.

1986 V30515: For single Heads=Head's and Wife's/"Wife's" total taxable income (V12818); for married Heads, total taxable income (V12818)-Wife's/"Wife's" Labor Income (V12803)-Wife's/"Wife's" Share of Asset Income (V12809)-Wife's/"Wife's" Other Asset Income (V12816) gives his share of total taxable income. For Wives/"Wives", Wife's/"Wife's" Labor Income (V12803)+Wife's/"Wife's" Share of Asset Income (V12809)+Wife's/"Wife's" Other Asset Income (V12816) gives her share of total taxable income.

1987 V30551: For single Heads=Head's and Wife's/"Wife's" total taxable income (V13920); for married Heads, total taxable income (V13920)-Wife's/"Wife's" Labor Income (V13905)-Wife's/"Wife's" Share of Asset Income (V13911)-Wife's/"Wife's" Other Asset Income (V13918) gives his share of total taxable income. For Wives/"Wives", Wife's/"Wife's" Labor Income (V13905)+Wife's/"Wife's" Share of Asset Income (V13911)+Wife's/"Wife's" Other Asset Income (V13918) gives her share of total taxable income.

1988 V30586: For single Heads=Head's and Wife's/"Wife's" total taxable income (V14935); for married Heads, total taxable income (V14935)-Wife's/"Wife's" Labor Income (V14920)-Wife's/"Wife's" Share of Asset Income (V14926)-Wife's/"Wife's" Other Asset Income (V14933) gives his share of total taxable income. For Wives/"Wives", Wife's/"Wife's" Labor Income (V14920)+Wife's/"Wife's" Share of Asset Income (V14926)+Wife's/"Wife's" Other Asset Income (V14933) gives her share of total

NONCOMPARIBILITY NOTES

taxable income.

1989 V30622: For single Heads=Head's and Wife's/"Wife's" total taxable income (V16435); for married Heads, Total Taxable Income (V16435)-Wife's/"Wife's" Labor Income (V16420)-Wife's/Wife's" Share of Asset Income (V16426)-Wife's/"Wife's" Other Asset Income (V16433) gives his share of total taxable income. For Wives/"Wives", Wife's/"Wife's" Labor Income (V16420)+Wife's/"Wife's" Share of Asset Income (V16426)+Wife's/"Wife's" Other Asset Income (V16433) gives her share of total taxable income.

i Variables from 1979 on indicate the grades of school completed both for nonHead and nonWife individuals either still in school or who have finished their education. The 1968-1978 variables, excepting V30189 and V30115, indicate completed levels only for those who have finished their education. V30189 and V30115, two constructed variables, are comparable with the 1979-1982 variables in that they contain levels of attainment as of the time of Heads and Wives, too. There are also some special codes that indicate missing data. See tape codes for details.

j Categories differ; see tape code for details.

k Field width differs.

l Weights were completely redone in 1989 for all years. See Section I, Part 5 of this (1989) Documentation or the User Guide for details.

Part 3: Index of the 1989 Employment Sections

This index compares all the variables from the employment sections for Heads (B & C) and Wives/"Wives" (D & E); if there is a Wife/"Wife" in the Family Unit, V16973=1. The section asked is based on employment status (V16655-V16657 for Heads, V16974-V16976 for Wives/"Wives").

Many of these variables represent the same or similar questions asked in both sections. In analysis it might be desirable, for instance, to look at weeks worked in 1988 for all Heads regardless of whether they are currently employed or not. With the tabulations in this index, the user can tell at a glance whether or not the same question was asked of all Heads. Using the example given above, one could generate a new variable on weeks worked in 1988 simply by adding V16758 + V16919, since one and only one of these variables contains this information for each Head; the other contains zeroes, indicating that the question is inappropriate.

1989 Comparative Index for Employment Sections B & D
 (Employed or Only Temporarily Laid Off);
 C & E (Not Doing Any Work for Money)
 Sections B & C are for Heads and Sections D & E are for Wives/"Wives"

| Description of Variable | Employed | | Not Employed | |
|---|---|--|--|---|
| | B. Head (V16655=1,2 or V16657=1) | D. Wife/"Wife" (V16974=1,2 or V16976=1) | C. Head (V16655=3-7 & V16657=5) | E. Wife/"Wife" (V16974=3-7 & V16976=5) |
| VARIABLES COMPARABLE ACROSS ALL SECTIONS FOR HEADS & WIVES/"WIVES" | | | | |
