We'd like to know more about how old HEAD was when (he/she) had the health condition(s) we just talked about.

To help you remember, I want to first ask you about some things that may have happened in (his/her) childhood.

ParentSepEHC. If parents or guardians separated during (his/her) childhood, please tell me how old (he/she) was at the time of each separation, starting with the first time they separated. Any other separations?--SP RPT HEAD AGE < 1

The 3 landmark health EHC questions asked only about ages of the parental separation, move, or school start/change if any of these events happened. If the response to any landmark question was a denial across all 17 possible ages, we recoded those 17 age variables to inap.

We'd like to know more about how old HEAD was when (he/she) had the health condition(s) we just talked about.

To help you remember, I want to first ask you about some things that may have happened in (his/her) childhood.

ParentSepEHC. If parents or guardians separated during (his/her) childhood, please tell me how old (he/she) was at the time of each separation, starting with the first time they separated. Any other separations?--OTR RPT HEAD AGE < 1

The 3 landmark health EHC questions asked only about ages of the parental separation, move, or school start/change if any of these events happened. If the response to any landmark question was a denial across all 17 possible ages, we recoded those 17 age variables to inap.

To help you remember, I want to first ask you about some things that may have happened in your childhood.

We'd like to know more about how old SPOUSE/PARTNER was when she had the health condition(s) we just talked about.

To help you remember, I want to first ask you about some things that may have happened in her childhood.

ParentSepEHC. If SPOUSE'S/PARTNER'S parents or guardians separated during her childhood, please tell me how old she was at the time of each separation, starting with the first time they separated. Any other separations?--SP RPT SPOUSE/PARTNER AGE < 1

The 3 landmark health EHC questions asked only about ages of the parental separation, move, or school start/change if any of these events happened. If the response to any landmark question was a denial across all 17 possible ages, we recoded those 17 age variables to inap.

We'd like to know more about how old SPOUSE/PARTNER was when she had the health condition(s) we just talked about.

To help you remember, I want to first ask you about some things that may have happened in her childhood.

ParentSepEHC. If SPOUSE'S/PARTNER'S parents or guardians separated during her childhood, please tell me how old she was at the time of each separation, starting with the first time they separated. Any other separations?--SP RPT SPOUSE/PARTNER AGE < 1

The 3 landmark health EHC questions asked only about ages of the parental separation, move, or school start/change if any of these events happened. If the response to any landmark question was a denial across all 17 possible ages, we recoded those 17 age variables to inap.

ER64604 "K-6 NON-SPEC PSYCHOL DISTRESS SCALE" NUM(2.0)

The K-6 Non-Specific Psychological Distress Scale

This scale was developed by Dr. Ronald Kessler, Professor of Healthcare Policy at Harvard Medical School. It includes six items, H59a-H59f (ER64598- ER64603), using a scale of 1-5, which ranges from 'all of the time' to 'none of the time.' The items are rescored as follows: A response of 'All of the Time' = 4 points, 'Most of the Time' = 3 points, 'Some of the Time' = 2 points, 'A Little of the Time' = 1 point, and 'None of the Time' = 0 points. The scores are summed; a score of 13 or higher indicates sensitivity around the threshold for the clinically significant range of the distribution of nonspecific distress.

For this series, IO28, we ask the interviewer if the Respondent had help answering any of the interview questions. We follow up asking who helped him/her. The sequence number of the helpers are located on the Respondent record of the PSID 1968-2015 Individual File at ER34313-ER34315. Once we have determined that the Respondent had help with the interview, we ask with which sections each of the helpers aided.

These codes are based on matches to the FIPS state and county codes against the 2013 Rural-Urban Continuum Codes published by USDA downloaded from <https://www.ers.usda.gov/data-products/rural-urban-continuum-codes/.aspx>

The 2013 Rural-Urban Continuum Codes form a classification scheme that distinguishes metropolitan counties by the population size of their metro area, and nonmetropolitan counties by degree of urbanization and adjacency to a metro area. The official Office of Management and Budget (OMB) metro and nonmetro categories have been subdivided into three metro and six nonmetro categories. Each county in the U.S. is assigned one of the 9 codes. This scheme allows researchers to break county data into finer residential groups, beyond metro and nonmetro, particularly for the analysis of trends in nonmetro areas that are related to population density and metro influence. The Rural-Urban Continuum Codes were originally developed in 1974. They have been updated each decennial since (1983, 1993, 2003, 2013), and slightly revised in 1988. Note that the 2013 Rural-Urban Continuum Codes are not directly comparable with the codes prior to 2000 because of the new methodology used in developing the 2000 metropolitan areas.

NUM(2.0)

Head's Completed Education Level

Values in the range 1-16 represent the actual grade of school completed; e.g., a value of 8 indicates that the Head completed the eighth grade.

Values were computed as follows: If it is not known whether Head attended college (ER64832=8 or 9) or the number of years of college is unknown (ER64835=8 or 9), then the value is 99. Otherwise, if Head attended college (ER64832=1), then the value is 12 plus the number of years of college attended (ER64835). Otherwise, if Head did not attend college, (ER64832=5), the values are as follows:

- (a) if Head is a high school graduate (ER64821=1), the value is 12;
- (b) if Head received a GED (ER64821=2), the value is the last grade finished (ER64824);
- (c) if Head neither graduated from high school nor got a GED (ER64821=3), the value is the last grade finished (ER64829);
- (d) if it is not known whether Head graduated from high school, got a GED, or neither (ER64821=8 or 9), then the value is 99.

Education is asked only when the FU acquires a new Head/Spouse/Partner. In cases where the Head has retained the same designation of Head/Spouse/Partner from the previous interview (ER64769=5), this variable has been carried forward from previous years' data. If Head/Spouse/Partner reports updated education and it is higher than previously reported, then this variable is updated. Education was reasked of all Heads in 1985 and 2009 and, as of 2013, all returning Heads/Spouses/Partners are asked for an updated education report every wave. Please refer to variable Year Highest Education was Updated-Head (ER64819) for recency of updated education information.

This variable differs from the individual level variable ER34349 in the treatment of Heads who received a GED but did not attend college. The family-level variable value for such Heads is the grade completed; for the individual-level variable, the value is 12.

ER65464 "YEAR NEW HEAD IN FU" NUM(4.0)
Year in Which 2015 Head Most Recently Became New Head/Spouse/Partner

This variable contains the year of data collection in which background information in ER64769-ER64874 was most recently gathered for the 2015 Head. If a Head splits off from the main family, e.g., through divorce, background information is re-asked. Some of this information can change over time; thus, this variable can be used by the analyst to indicate which waves of data might be searched to update the variables concerned. However, in the 1985 and 1997 waves, most background information was re-asked. The 2015 variables that are equivalent to background variables asked of all Heads in 1985 are ER64790-ER64801, ER64808-ER64811, ER64818, ER64821-ER64845, ER64850-ER64867 and ER64869-ER64870; the 2015 variables that are equivalent to background variables asked of all Heads in 1997 are ER64770-ER64776, ER64780-ER64786, ER64810-ER64813, and ER64846. All immigrant sample Heads were asked this information in 1997 (or 1999, for the immigrant sample addition). All recontacts were asked for background information in 2015.

ER65481 "HOUSEHOLD ID #" NUM(5.0)

Household ID Number

This variable was generated to simplify the clustering of multiple panel family units residing in the same households. Its values were assigned simply by selecting a 2015 ID number (ER60002) with the lowest value from among the 2015 ID numbers (ER60002) of those families comprising each such household group. This value was used in these file positions for all of the related households. Thus, if the user sorts the data ordered by this variable, the family units within larger household groups will be adjacent to each other. Family units who did not share their households with any other family unit or shared only with non-panel family units were given their own values for ER60002. The range of values is 1-8738, but the series is not contiguous. See 'Linking Data: Families Sharing Households' in Section I, Part 5, of the guide to the 1993 family data, 93GUIDE.PDF, for a discussion of ways to identify shared households in the early years of the PSID.

- b) each female Head, unless both of the following were true: she was Head, Spouse, or Partner in 2014 and was age 45 or older at the time of the 2015 interview.
- c) each Spouse or Partner, unless both of the following were true: he/he was Head, Spouse, or Partner in 2014 and was age 45 or older at the time of the 2015 interview.
- d) all other family unit members, including husbands of Head (ER34303=90) and first-year cohabitators (ER34303=88), who were age 15 through 44 at the time of the 2015 interview.
